

WEST SIDE
TRANSFER IS
ARRANGED

Special Meeting Next Week
After Some Minor Details
Are Fixed Up — Engineer
Stays Home — Ald. White
Leaves Market Committee

At a special meeting of the common council yesterday afternoon, the agreement for the transfer of the west side lots to the C. P. R. was settled, only a few minor details remaining to be worked out. No change will be made in the real estate setting forth the purpose for which the land is to be used, the council taking the ground that they already approved of that portion of the agreement. The details yet to be arranged, the recorder announced, can be very quickly disposed of as he and the solicitor of the C. P. R. are agreed on the points and it only remains for them to draw up the phraseology in suitable terms. This will be done at once, and a special meeting of the council will probably be held next week to adopt the agreement as a whole.

There was considerable discussion on the agreement of having plans prepared for the building of a new ferry boat, and it was finally decided that as the boat in New York was not suitable, plans should be prepared for a steel or wooden boat, as estimate of cost made and a report submitted to the council for final action. The matter of the shortage in the water supply on the high levels on the west side and on Partridge Island came in for a very animated discussion, and the engineer was rather severely censured by the west side aldermen and by Dr. Riddick, port physician on the island, for allowing the unsatisfactory condition of affairs to continue. It was decided that the engineer should personally visit the west side and look into the matter with a view to arriving at a solution of the difficulty, and that there should be a daily supply of water for the island at the discretion of the engineer. Notwithstanding the fact that The Telegraph and other city papers had in good faith announced that the engineer would leave last night to attend a convention in Winnipeg, his application for permission to do so was refused. In view of the serious condition of affairs with regard to the west side water supply.

The affairs of the market committee and the charges made against Alderman Wigmore by Aldermen Potts and Vanwart, were given an airing and the discussion at times was very spirited. The resignation of Ald. White as a member of the market committee was accepted, and Ald. Smith appointed in his place. The mayor said he also would resign if he were not for the virtue of his office to serve. Ald. Wigmore challenged any member of the council to say that he had ever canvassed for the position of director of public safety. He told of a conversation with Ald. Vanwart when he had said something about the matter as a joke. Ald. Sprout told the council that the statement that he was after the job of the director of public safety was not true, it was the directorship of public works he was seeking.

A report from the chairman of assessors and chamberlain on the question of making a change in the charge for poll tax, recommended that a poll tax of \$5 be imposed on those who were not assessed on real estate, personal estate or income, and \$2 on all others. It was decided to change the day of holding civic elections from Tuesday to Monday, for the convenience of commercial travelers. An application from Police Magistrate R. J. Ritchie for an increase in salary was ordered filed. The mayor presided at the meeting and there were also present Aldermen Smith, Lakey, Elkin, McLeod, Sprout, Willett, Holder, McLeod, Potts, Scully, White, Russell, Vanwart, Hayes, Wigmore, Jones and Christie, with the engineer, superintendent of ferries and common clerk. Ald. Scully thought they should consider the matter of a bridge instead of spending more money for ferries. He said Mr. Ritchie had told him the Western Extension could be put in shape for \$8,000 or \$10,000, but later, after submitting a report to the council, he said the increase was due to the fancy work that was wanted for the boat.

Dr. Riddick, port physician at the island, was heard. He stated that they had been unable to get water at the island for some time. He did not think that the leak in the pipe running to the island was responsible for the lack of water as it had made very little difference when it was shut off. The present leakage was estimated at eight and three-tenths gallons per minute and this was not a large amount. If they could get water, say two or three times a day, three days a week, it would be sufficient. There were cases of typhoid fever on the island and it was essential that they have good pure water.

In response to a communication from the department of public works, permission was given the C. P. R. to strengthen the connection between Nos. 6 and 7 berths, and lay their rails to No. 7 berth, provided there was no expense to the city.

The safety board was authorized to call for tenders for hose.

The mayor urged that the engineer bring in a report as to the advisability of renewing the old cement pipes on the west side.

Ald. Vanwart asked for authority to place a fire alarm box at the corner of Main and Elm streets. This was granted. Ald. Smith, who moved for the re-appointment of Mr. Dunham at the last meeting, said he wanted to explain his position. He believed that the committee had done good work and would continue doing good work. He moved that Ald. Elkin be appointed in the place of Ald. White.

Ald. Willett took the members to task for approving the appointment of William Howe as clerk and then appointing another man. The members at the last meeting were stampeded. The council ran away with the bit in its teeth. He regretted that any one member of the committee would resign and the others not do so.

Ald. Elkin, who was out of the room when he was nominated, said that he would not act on the committee. He considered the council had given the market committee a slap in the face.

Ald. Potts nominated Ald. Holder, but he declined.

Ald. Scully nominated Ald. Smith and on his motion being put, he was elected. Ald. Jones said he had intended resigning at first, but had reconsidered and would continue to try and effect reforms in the market.

The meeting was adjourned at 6:25.

Your friends may tap on your strong points and you may be surprised to find well informed regarding your weak ones.

If We Could Show Every Man in St. John the Matchless Clothing Values We Have Provided for This Great Sale There'd Be No Clothing Sold Anywhere Outside of Oak Hall

We make a new customer of every man who comes here to see for himself what he can get in the kind of clothing he wants to buy. The more he has looked around the better he is pleased with what we have to show him.

Because of the comparisons he must necessarily make he is convinced that he can't get anywhere else within 25 per cent. as good value for his money as he can get at Oak Hall. This is why ours has grown to be the greatest clothing store in the maritime provinces—and this is what it is growing bigger every day. Let us show you, and you'll be convinced—that's all we ask.

It will be particularly worth your while to let us show you now—during this sale, for you'll then get a chance to save more than the usual 25 per cent. difference between our prices and those of other stores. Every garment is of this season's make and has all the newest style touches.

This sale ends tomorrow night. If you have not attended you will need to make up your mind quickly or your opportunity will have passed.

MEN'S OVERCOATS

Made in all the latest styles such as the Convertible, Motor and Chesterfields of such materials as Black Melton, Fancy Scotch and English Tweeds.

PHYSICIANS' INCOMES

Medical Profession in America Is Overcrowded

(New York Times.)

American doctors continue to bewail the fact that their incomes are decreasing. From statistics published from time to time in the medical journals, it is plain that this decrease is going on fast.

Compared with other countries, it seems that the medical profession is overcrowded in the United States. For instance, there are not many more doctors in the whole of France than there are in the state of New York. Here are the latest figures published in the Medical Record and comments on them:

"It is an easy matter to prove that the medical profession in America is overcrowded. In France, there is a population of 37,000,000 or so, there are only 17,000 medical men all told, and in England, with a population of more than 40,000,000 there are about 32,000 medical men, while this country and Canada, with perhaps nearly 90,000,000 people, have more than 120,000 physicians. This proportion is preposterous and the natural consequence is that a considerable proportion of American practitioners have hard work to keep the wolf from the door."

"With an increase in the cost of living the physician earns less than he earned some years ago. There is also another aspect of the case which deserves attention. In all countries the medical man has more difficulty in collecting his just dues than has the member of any other profession or trade."

"This statement may be applied with greater aptness to America than to other countries. It is more customary here for general practitioners to give credit than for those of England or France, for instance. The entire practice of medicine here is based on the credit system."

"When a person is ill no trouble or expense is too great to insure or aid his recovery, the doctor then is his rock of refuge, but when he gets well both his illness and the doctor alike are liable to be forgotten. There are some who even shamelessly evade payment; these are those who in the euphemistic and pertinent slang are termed 'dead beats.'"

"It might not be an overestimate to assert that of a general practitioner's annual earnings almost 25 per cent. will never be collected. The physician is precluded to a great extent by the etiquette of his profession from enforcing payment of his dues in the same manner as members of other professions and trades would enforce payment, and therefore he would seem to be almost hopelessly handicapped. The most bitter feature of the position is that those least able to bear loss are the ones who are usually neglected."

Charles J. Gregory, of Glenora, Me., has kept a diary for 32 years, writing in it every day with the exception of one period of two weeks, when he was so ill that he could not attend to the writing. He has all his diaries filed away so that he can instantly refer to them. In the back of each diary is a neatly kept cash account.

EDUCATIONAL SYSTEM

OF NEW ZEALAND

To the current number of The Chicago Public, George Foulke, M. P., who has been for many years minister of education in the government of New Zealand, contributes a special article on the educational system of that dominion. He broadly states that the policy of the government as regards education is to provide that no child shall grow up without some education, and that every facility shall be given to every person to receive free education according to his or her ability.

Regular attendance is enforced and homes and education are provided for neglected, defective or uncontrollable children. Unless regularly receiving instruction in a private school or in some other satisfactory way, all normal children are compelled to attend a public school from the age of seven until the fifth standard has been passed or attainment of the age of fourteen.

Institutions have also been provided for the blind, deaf-mutes and the mentally defective. Children under care of the state are carefully classified and if over school age are trained in some occupation or trade, or sent to the Boys Training Farm, where they are taught farming and kept under supervision and control.

Free education beyond the compulsory course in the primary course is also available to every boy or girl who obtains a certificate in Standard V. The choice is offered of a free place in a high school, district high school, technical high school, or evening technical school, where by constant effort and good conduct the scholar may in general receive instruction for four or five years.

From the high school entrance can be gained to the learned professions or a university college or to further manual or technical instruction, while girls may be trained in domestic science. Secondary education is also given in district high schools, but the main object is to keep them closely associated with local occupations. In addition to these free places there are two chief classes of scholarships, each entitling the holders to free places

WILL MAKE HAIR GROW

Every up-to-date woman should have radiant hair. Thousands of women with harsh, faded, hairless hair, who do not know it, are suffering from a lack of hair.

In England the hairless women take pride in having beautiful hair. Every Canadian woman can have lustrous and luxuriant hair by using S. L. VITA, The Great American Hair Tonic. The Red Cross Drug Store sells large bottles for 30 cents and guarantees it to banish Dandruff, stop falling hair and itching scalp in ten days, or money back.

To a money allowance and if they have to live away from home to a larger board allowance.

THROUGH OF MEN IN ST. PETER'S

Retreat Opened Last Evening
—Rev. Father Sheehan, in
Strong Sermon, Speaks Of
Sins of the Day—Divorce,
Purity and the Home Life

It must have been gratifying to the priests of the Redemptorist order in St. Peter's church, North End, last night, and to Rev. Father Sheehan, C. S. R., of Brooklyn, to see the vast congregation, composed entirely of men, young and old, who thronged the church on the first night of the retreat for the male members of the parish, and who listened with closest attention to the masterful and eloquent sermon delivered by Father Sheehan, who is preaching the retreat.

The service began at 7:30, with the recitation of the rosary, and this was followed by the sermon and benediction. The pastor, Rev. A. J. Duke, C. S. R., and Father Sheehan expressed their hearty appreciation of the attendance of such a vast concourse of men, and said they hoped for a continuance of the same to night and tomorrow night.

In the course of his sermon, Father Sheehan addressed the married men and the single men as individual bodies, and appealed to them to remain strong in their faith, to lead good Christian lives, and to make their homes as happy and contented as they possibly could. For, said he, "the home is the cradle of the nation." The world today, after many centuries of Christianity, was pagan, and evidence of the pagan-like indifference to God was seen on all sides. Why were there so many cases of fraud in many cities? Why were there divorce courts? Why were there so many crimes committed? Several other questions he asked and answered with the same response—Because the world is pagan.

He dwelt at some length on the sin of impurity, and said that this evil had been responsible for many hardships and calamities in this world, both to nations and individuals, and it was still rampant. Because of this sin the deluge had been poured in history. It had been responsible for the downfall of Persia, Egypt and other countries. Rome had become weakened by it, and the fierce soldiers of her empire had lost the name of soldiers because of it. He appealed to the married men to always remain true to the sacred vows of their entrance into matrimony, for no one was so loathsome, so disgusting, or so miserable as he who wrecked a woman's life. "Be pure," said he, "you married men, as pure as your Catholic wife is pure, and by your example and teaching bring up your children in the true knowledge of God. And to you single men, I desire to impress upon you the firmness and strength of the virtue of purity. Shun the places where you will be led into sin; avoid all occasions of the kind; live good moral lives, and when ripe into devoted husbands and fathers—a credit to that glorious institution which gave you birth—Holy Mother Church.

The speaker in strong terms dwelt on the divorce evil. "There are," he said, "hundreds of men and women walking the streets who do not know their proper name. The law of the church has always been against divorce, and in upholding this law, the church is but obeying the will of her founder—Whom hath joined together, let no man part." Because of the desire of Henry VIII. to put aside a respectable wife, the Catholic church had lost England, but Europe, the Pope could not prevent it, no matter what the rank of the applicant. The Pope could not give the King of England a divorce. "Bank God, he did not. The sacred rites of the marriage ceremony held the husband and wife together 'till death do us part." And if the world today were not pagan, it would recognize the law of the Saviour of mankind in this matter. If the world were not pagan there would not be the frauds and other crimes which would be traced to impurity—because if man led a fast life he must assuredly pay the price.

Father Sheehan then touched upon the pressing need of reform and "You, my dear men, must be the reformers," he said. "It was not so much the preaching of the apostles or the early missionaries that gave the world twenty centuries of the same religion you now enjoy, as it was the example of the early Christians which caused this doctrine to spread as it has done. And it has withstood the attacks of the pagan world for 1900 years. Therefore, men, I leave you to begin at home. Reform the home if there is need of reform, for the latter must also begin at home. Live such a life that you make you respected by your fellow men, avoid impurity in its different forms, and teach your children by your example, to grow up Christians worthy of the name."

WINTER PORT BUSINESS

The exports are rapidly increasing, and the gap between the figures for this season and last is diminishing. The shortage of something like \$600,000 earlier in the season is now reduced to \$158,927. The figures for thirty-two steamers are: Canada, \$1,282,943; foreign, \$1,924,733, making a total of \$3,207,676. Compared with \$2,429,653 for a like number of steamers last year, the difference is \$158,927. This should be made up with two or three good cargoes.

Will Make Hair Grow

Every up-to-date woman should have radiant hair. Thousands of women with harsh, faded, hairless hair, who do not know it, are suffering from a lack of hair.

In England the hairless women take pride in having beautiful hair. Every Canadian woman can have lustrous and luxuriant hair by using S. L. VITA, The Great American Hair Tonic. The Red Cross Drug Store sells large bottles for 30 cents and guarantees it to banish Dandruff, stop falling hair and itching scalp in ten days, or money back.
