

FINAL EXAMINATION FOR THE DEGREE OF C.M., M.D.

PRACTICE OF MEDICINE.

THURSDAY, APRIL 4TH :—10 TO 12 A.M.

Examiner,.....PROFESSOR A. H. DAVID, M.D., Edin., L.R.C.S.E., D.C.L.

1. Describe the Physical Signs of Hydrothorax, and mention how it is distinguished from Empyema.
2. Give the forms of Phthisis Pulmonalis, and explain the causes of their physical signs.
3. Give the precise boundaries of cardiac dullness on the walls of the chest during health, and state in what conditions the dullness is increased or diminished.
4. Describe the Sequelæ of Scarlet Fever, their usual ulterior effects, and the manner of treating them.
5. Describe the symptoms of Acute Rheumatism.
6. Describe the varieties of Small-Pox.

SURGERY.

THURSDAY, APRIL, 4TH 1878 :—2 TO 4 P.M.

Examiner,.....PROF. RICHARD A. KENNEDY, M.D., C.M.

1. What is Suppuration? Give its causes, period at which it commences, symptoms, progress and treatment.
2. Describe the process by which Ulcers are formed and repaired. Give a classification of those found on the surface of the body (not including syphilitic or cancerous), the part upon which each variety is most generally found. Give the treatment you would adopt in Varicose Ulcers.
3. Define Erysipelas; name its different forms, the extent of tissue involved in each, and the treatment of each form.
4. Mention the diseases for which Tracheotomy may be required. What difficulties are met with during the operation? Give a description of the latter and the after-treatment.
5. True Aneurism; into how many forms is it divided? Describe the parts entering into the formation of its most common variety. Give the symptoms of an external Aneurism and the different modes of treatment generally adopted for its cure.
6. Give the classification of wounds arising from external violence, causing a solution of continuity of structure. Describe the local treatment of each, and under what circumstances dangerous symptoms are likely to occur.
