**THE ANGLE LAMP**

is the ordinary oil lamp—the lamp that sits on the table, but is hung above and because of having no under-drawn throws its beautiful, brilliant light everywhere. It cannot explode, can be filled while lighted and is always out of the way. It burns "old fashioned" kerosene giving an intense, clear, soft light. Its soothing rays invigorate the skin and rest the eye. It is always ready, easy to operate, no smoking, no odor, no glassware to remove in lighting or extinguishing. A better light at one-eighth the cost of other illuminants. Instead of the trying light and dangers and trouble of Gasoline and Acetylene use the soft, cool light of The Angle Lamp to work or play by. 20 styles.

## RESULT OF INSPECTION OF MAPLE SYRUP AND SYRUP

In the Second Collection the  
New Brunswick Samples of  
Both Articles Were Fairly  
Good—Most of the Earlier  
Samples Were Adulterated  
—The Report in Detail.

The detailed report of the analysis of maple syrup and maple sugar made under Chief Analyst Thomas Macfarlane, has been received. Two collections of these products were made, the first in March and the second in May and June. Out of 45 samples of syrup and 26 of sugar in the first collection, 65 samples or 85 per cent. were found to be adulterated. In the second collection, of 171 samples of syrup and 13 of sugar, there were 57 syrups and 7 sugars adulterated, the percentage being 33.3 per cent. Of 15 syrup samples in Nova Scotia 9 were adulterated; of 6 samples from P. E. Island 4 were adulterated; and of 15 samples from New Brunswick 2 were adulterated while 1 was doubtful.

Of 6 sugar samples from Nova Scotia all were genuine; of 6 from P. E. Island 3 were adulterated and 1 was doubtful; and of 7 samples from New Brunswick 2 were adulterated. The detailed report follows. It contains the name of the vendor, the sample taken, the manufacturer's or agent's name, the label, and the result of the analysis.

## UNITED STATES MUST SOON TAKE A HAND Intervention in Cuba Cannot be Long Delayed.

More Warships are Ready for Service at  
Short Notice—British Opinion is  
Freely Expressed

NEW YORK, Sept. 14.—A London despatch to the Sun, says that the news of the landing of American marines at Havana confirms the opinion held at the British capital that American intervention in Cuba cannot be long delayed. The Standard editorially blames the United States for the present disorder. It says that President McKinley's intervention was carried out in the name of peace and civilization, but the net result is renewed turmoil, barbarism and savagery, either the Americans must tolerate anarchy in Cuba or exercise an effective protectorate. President Roosevelt would doubtless act promptly and vigorously if he did not have to think of the election campaign. Whatever the final issue it will be condemned by the Democrats who are standing aside ready to make political capital of the result.

The Morning Post says that Cuba is not strong enough to work out her own salvation. She cannot without American support maintain a government and secure the progress of the country. Much as the American Government may regret the necessity for taking a step which will be unpopular with a large section of the country she will not be able to refrain permanently from taking it. The destiny of the United States stands behind her and urges her imperatively on to the next step in her overseas expansion.

WASHINGTON, Sept. 14.—Another dispatch to the American press from Havana says it is reported that 200 insurgents attacked the rural guards on the morning of the 13th at Santa Clara (Santa Clara province), and that the government lost 18 men. The loss of the insurgents is not known. The government forces retreated to Sancti Spiritus.

Mr. Sleeper, (the charge), adds that a rumor is current of an uprising in Camagney. The postal service between Santiago and Havana is interrupted. Mr. Sleeper's report is based on a telegram received from the American consul at Santiago on the 13th.

OYSTER BAY, Sept. 14.—It was stated at the executive office here today that the secretary of the navy, Mr. Albert S. Hunt, is expected to reach Oyster Bay today to go over the Cuban situation thoroughly with the President. The gathering will assume more the nature of a regular Friday cabinet meeting than has taken place since the President's sojourn in Oyster Bay this summer. It was announced at the executive office this morning that the landing of marines in Havana yesterday was intended only as a guard to the American legislation in that city, and notes a step toward restoring peace in the island republic, or as guard to President Palma's palace. While it is said that the course of the American administration in Cuba is to be most conservative, this it is said, does not preclude a thorough preparedness on the part of the United States to take any action which may become imperative by reason of conditions on the island.

## BANQUET MUST WAIT; MR. HYMAN IS BUSY

Mayor Sears was seen by the Star this morning in reference to the banquet to be given to the Hon. C. S. Hyman. His worship said that he had consulted with George McAvity, who said that he had telegraphed to Mr. Hyman and the latter informed him that the banquet would be held in the Ontario elections, and does not expect to be in St. John until after October 6. His worship, however, will telegraph to Mr. Hyman today to find out the exact date of his arrival. In the meantime nothing can be done regarding the banquet.

## ANOTHER FATALITY IN NOVA SCOTIA.

Charles Farrell Was Killed on  
the Railway at Richmond.

His Head Completely Severed from His  
Body—He Had Been Worried Over  
the Deaths of Relatives

HALIFAX, N. S., Sept. 14.—Charles Farrell, a teamster, died on the railway track last night, his head being completely severed from his body by the wheels of a train of cars. There was no eye witness to the affair, and the first knowledge of his death was when a railway employe on his way to work about 5 o'clock, found the remains lying on one side of the rail, and the head completely severed at the neck.

The accident occurred just near the cattle pens at Richmond. Coroner Constance Spenser was notified and arrived at the scene about 5.30 and took charge of the remains. The lower part of the face was covered with blood and from the condition of the body, Mr. Spenser judged that death had occurred some hours previous, having been caused by a late train coming in last night. The deceased was about 35 years of age and was well known at north end and among teamsters and drivers. He had been driving for Maling and Co. up to Tuesday last, and on that day gave up his position. He resided with his only relative in the city, a brother on North Albert street, and left the house after tea last evening to take a walk. That was the last seen of him alive at the house. About a year ago Farrell's mother and sister died suddenly within a short time of each other and he was very much affected by the double fatality. In fact he showed some signs of aberration of mind and it was thought best to have him treated at the N. S. Hospital. He was quite rational, however, though he was constantly referred to the death of his mother and sister, and was discharged some weeks ago. He was reported to have made an attempt to cut his throat with a razor and was sufficiently injured to be sent to the hospital.

SCHMIDT, EDWIN R. HUNT  
IS STILL MISSING  
Three Weeks Overdue at Sydney—She is  
Owned at Bath

BOSTON, Sept. 13.—The four-masted schooner which is long overdue at St. Ann's Bay, C. B., from this port is the Edwin R. Hunt of Bath, Me. A despatch from Sydney last night stated that it was feared the schooner "Edwin R. Hunt" had been blown bottom with all hands. Inquiry here showed that there is no vessel of that name, and today it is reported that the missing schooner is the Edwin R. Hunt.

The Hunt left Boston four weeks ago today in ballast for Cape Breton to load gypsum for Chester, Pa. The trip from this port to Cape Breton usually is made by sailing vessels in a week. There is much anxiety here regarding the missing craft. The Hunt was commanded by Captain Sargent, who had a crew of a dozen or more. The vessel was built in Bath, her home port, in 1892. She registers 1,132 tons gross and 1,065 net.

ALBANY, Me., Sept. 12.—The four-masted schooner Edwin R. Hunt, which is three weeks overdue at St. Ann's Bay, C. B., from Boston, was owned by Gardner M. Deering of this city. Mr. Deering said tonight that he had received no tidings of the craft. There is a theory that the Hunt may have been blown out of her course, as she was high in the water and had no cargo. At one bank the forgers secured \$500. No trouble was expected and other banking firms were swindled in a similar manner.

## CHICAGO POLICE CAPTURE A GANG OF FORGERS

The Criminals Had Secured Thousands  
of Dollars from Different Banks

CHICAGO, Sept. 14.—The Chronicle today says: Five members of a gang of forgers were arrested last night by city detectives. The utmost secrecy was maintained by the police regarding the arrests. It is said that thousands of dollars were secured by the swindlers and that many prominent banks are losers. They would drive up to a bank in a large touring car and one of their number would enter. He would present a check to the teller and so pervert the signature that the money was quickly forthcoming. In several cases when the swindler was questioned, one of his companions would identify him. At one bank the forgers secured \$500. No trouble was expected and other banking firms were swindled in a similar manner.

Joseph Steeves the young man who was injured yesterday at the Mispic pulp mill, is reported to be very low. A telephone message from Mispic this afternoon said that Drs. Lewin and Baxter were there and that they had hopes for Steeves' recovery.

## LABOR MEN PASSED ANOTHER BUNCH OF RESOLUTIONS.

TREPOFF'S NEICE  
IS UNDER ARREST

Charged With the Murder of a  
Frenchman.

She Thought Her Victim Was Durnovo—  
Peasants and Soldiers at Vilna  
Fought and Eight Were Killed

ST. PETERSBURG, Sept. 14.—The identification as Tatjana Leontieff, of the woman who killed an aged Frenchman, named Mueller, at Interlaken, Switzerland, on September 1st, in mistake for M. Durnovo, former Russian minister of the interior, opens up the final chapter of an interesting romance, as Mlle. Leontieff is one of the nieces of General Trepoft, who was concerned in an unsuccessful attempt upon the life of her uncle in 1905. This caused an immense sensation at the time. Mlle. Leontieff was arrested upon her promise to leave Russia forever. This she did but she maintained her connection with the revolutionary group in Switzerland, and when M. Durnovo went abroad she volunteered to execute upon him the sentence of the "tying group" of which she is a member. Since the slaying of Mueller, M. Durnovo has returned to Russia and is living in close seclusion on his country estate.

The Russian invalid has published a law increasing the penalty for refusal to perform military service to six years at hard labor and the loss of civil rights. This measure is directed against those men who might follow the advice contained in the Vlasov proclamation of the outlawed parliament and refuse to serve in the army. The fall recruiting season has begun, and reports already have been received from several attempted attacks upon local military bureaus for the purpose of destroying the recruiting lists.

VILNA, Russia, Sept. 14.—An attempt made by the rural police to arrest seven peasants of the village of Lukontsis, who had been organizing disorders among the peasants has resulted in a collision between the mob and the soldiers. The latter fired a volley, killing eight persons and wounding sixty.

## MAKING ALCOHOL FROM CORN COBS AND STALKS

United States Government After Experi-  
menting Will Assist This Industry

WASHINGTON, Sept. 14.—In the manufacture of alcohol from corn cobs and stalks at small cost the department of agriculture is developing a new industry that the department says is likely to be of large commercial value. Investigations which the department is making at Hopkinton, Ill., have proved that the large quantities of corn cobs which every year heretofore have gone to waste can be converted into alcohol in sufficient quantities to justify the erection of a distilling plant in connection with a corn cannery.

The department of agriculture sent two chemists to Hopkinton to make experiments at a large cannery there. They have succeeded by simple methods of fermentation in getting a yield of eleven gallons of alcohol from a ton of green cobs and six gallons of alcohol from a ton of green corn stalks.

Considerable excitement was caused this morning when the ambulance was summoned to the North Wharf to take five sick sailors to the hospital. It was learned that these sailors were being brought off the British steamship Genia by the tug Neptune, and when the tug was seen coming up the harbor a large crowd gathered on the wharf and many conjectures were made as to what was the matter. It was first reported that she was bringing ashore a shipwrecked crew which had been picked up by the Genia. When the tug arrived at the wharf the five haggard looking men were helped into the ambulance.

They Want a Bounty on Ship-  
building, Compulsory In-  
spection of Hides, United  
Support of Labor Candidates,  
a Larger Dry Dock at  
Quebec, and Other Things.

At this morning's session of the  
Trades and Labor Congress a number  
of resolutions were passed, the  
most important of which was the one  
recommending a larger dry dock to be  
built in place of the one now at Que-  
bec. Expressions were also heard  
urging all the delegates to support a  
labor candidate wherever such a candidate is in the field.

The following are the resolutions passed:  
Resolved, that the Canadian government be requested to consider carefully the regulations regarding the uses and cost of dematured alcohol in foreign countries, and to so adjust Canadian regulations that Canadian industries shall not be placed at any disadvantage.  
Whereas, this congress considers it not only desirable but essential that Canada should have well equipped shipbuilding yards, so that she should not be dependent upon foreign or even British builders for the maintenance of her mercantile marine; therefore resolved, that we hereby urge the Dominion government to take up this important question during the approaching session of parliament and grant such adequate bounty on tonnage launched in Canada during a term of years as would place our builders on an equality with their chief competitors elsewhere.

The next resolution adopted was that it is necessary for the city of Quebec to have a larger dry dock. The executive is requested to take all possible means to have the government of Canada build a larger dry dock than the one now in operation, the present one being inadequate for the requirement of our shipping and transportation.  
Resolved by the National Trades and Labor Congress in regular session assembled, that all affiliated national unions through their respective national executive boards call general conventions of their respective unions at the earliest possible moment, and that convention they shall be required by this resolution to invite all national and international and independent local unions not at this time affiliated with this National Trades and Labor Congress of Canada; and be it further resolved, that they shall notify our national president of such action when taken, and that the national president shall upon request attach his signature and official seal to the convention called.

The next resolution was in effect that the executive of the congress shall be instructed to have an interview with the government to renew the demand already moved by the congress at the last sitting in Ottawa to obtain the compulsory inspection of raw hides.  
Another resolution was that a labor commission be appointed by government of Canada, to be called the "Commission of Labor," to secure all statistics relating to working classes and to study new legislative measures and to see that the labor laws are executed, and to see to the development of our institutions of propaganda and mutual organization and improvement of workers' dwellings.

Resolved, that the congress do recommend all delegates to recommend the union label on all goods manufactured under the control of our members and that all our trades and labor councils be authorized to grant that label.

## DR. HARRISON IS IN A CRITICAL CONDITION

Consultation of Physicians Held—His  
Death May Come at Any Moment

FREDERICTON, N. B., Sept. 14.—Dr. Murray McLaren came up from St. John last evening and with Dr. Crockett held a lengthy consultation on Dr. Harrison's illness. The physicians pronounce the doctor's condition as being most serious and critical. The two sons, J. Darby, and Arthur G., who reside at Edmundston, have been sent for and are expected to arrive tomorrow but the doctors have grave fears of the patient surviving their arrival. Dr. Harrison knows those about him but he is unable to take any interest in anything.

An effort is being made by the parishioners of St. Philip's A. M. E. church to secure a parsonage for the pastor. On Thursday, October 11th, a public meeting will be held in the church, Queen street. A number of prominent men have consented to address the meeting. All are invited to attend.
