# Men's Winter Overcoats Queer Facts Little Known-Animal Relics Worshipped By Fashion Leaders. \$10, \$12, \$15.

Every clothier sells overcoats at these prices. Why not? But every dealer also sells different sorts -quite natural. 'Twouldn't do for all to offer the same qualities. And so you find "the good", "the better" and "the best". Here the superlative degree is reached in 20th Century Overcoats. Don't take our "say so" for it. Take the opinion of clothiers in various cities who are dropping other good makes of clothing in favor of 20th Century. That is an argument hard to controvert.

\$10, \$12, \$15,

servative Prospects are

(Special to the Star).

The subject of gems, the trade in precious stones, the change of fashions, etc., are replete with curiosities of a character unknown to the outside world. This does not include the hack-Been Dissolved.

Here is a little heap of blue stones labelled "Bone turquoise, Southern | Elections on December 7th—Conlabelled

In appearance these bone turquoises seem in no way to differ from the gen-uine turquoises of New Mexico and Persia. They are of the same sky blue or peacock green color as the rest, and those who gaze in the cases wonder at Careful inspection, however, will re-veal the fact that the former have not Dec. 7, nomination one week earlier.

the same waxy lustre as the real turquoise, the surface of bone turquoise, the surface of bone turquoise having a greasy appearance, altogether different from that of the real gemands ago, during the Miocene period, what is now the department of Gers, in Southern France, was a big, harshy pasture on which herds of mastodons and dinotheriums, to say nothing of other gigantic and extinct pachyderms and bovines, grazed at their own sweet will. Man had not made his appearance will. Man had not made his appearance on earth, and when a mastodon or dinon earth, and when a mastedon or dinotherium grew tired of life he simply lay down and died in comparative peace and quiet, with nothing to pester him except the big hyenas and vultures.

There were no ivory hunters in those days and after the bush of the state department the American government replied that whatever in the state department the American government replied that whatever in the state department to navigation in Havana harbor. The Cuban government asked the United States if it still maintained any claim upon the wreck of the Maine. Through the state department the American government replied that whatever in the state department to navigation in Havana harbor. The Cuban government asked the United States if it still maintained any claim upon the wreck of the Maine. Through the state department the state department to navigation in Havana harbor. The Cuban government asked the United States if it still maintained any claim upon the wreck of the Maine. Through the state department the state department the state department to navigation in Havana harbor. The Cuban government asked the United States if it still maintained any claim upon the wreck of the Maine. Through the state department the state department the state department to navigation in Havana harbor. The Cuban government asked the United States is it still maintained any claim upon the wreck of the Maine. days, and after the hyenas and vultures finished with the carcase, the big tusks and teeth of the dead monster sank in-

pasture was elevated high above the sea level by seismic action, and in course of time was covered over by the accumulations of succeeding ages.

The earth in which the bones, teeth, and tusks of these prehistoric pachyderms sank in their final rest became the properties of the contract.

The population in France in 1901 was 38,191,995, but in 1903 was 39,119,095, but in 1903 was 39,119,095, but in 1903 was 1903 w

their original white color to sky blue the excess of births over deaths in and reacock green by the action of the 1901-1902 was 21 per 10,000 inhabitants, phosphate of iron and copper salts in the ratio for the same period in Ger-Last of all came the age of man. Towards the close of the middle ages the dwellers of the district began digging into the "blue earth," under the top ADMITTEL layers of later ages, finding the blue and green fragments of mastodon teeth and tusks and bones. These they have mined and sought after ever since, and bar yesterday to practice before Magistoday these mastodon fragments are cut, polished and worn as gems.

But they are not the true turquoise.

The latter is a mineral composition, which to the man of science is described to the man of science is described.

Frances Koplinski, of No. 75 North Seventh street, who was charged with

by a combination of a control of the control of the

one turquoise. By gas or electricity, Kate on the head. comes at once apparent, the bone turquoise appearing grey and greasy, while the mineral gem retains its sky-blue color in all lights.

Subjected to intense heat or certain chemicals, the bone turquoise emits a disagreeable animal odour, while the true turquoise remains odourless. Such is the bone turquoise, the mining of officer Smith have to tell in regard to opinion among the was the answer.

That POLICE STORY.

The stories that Geo. McMasters and opinion among the was the answer.

which is lazalite. Lazalite is of almost further exposure might have been fatal the same mineral composition as the to Mr. McCann turquoise, but unlike the latter, has a vitreous, glassy sheen when polished, rather than the waxy lustre of the true there, one Masters and the other, as It is found near Salzburg, Germany, it afterwards turned out, McCann. McCann was sick and the officer heard

This however, is one of the imitations him say that it was "wind on his This however, is one of the imitations in which the customer has a decided advantage. Lazalite is really a finer stone than turquoise, the color being of a much deeper sky blue than that of the latter. The Brazilian stones, which are particularly fine, frequently occur in large and massive fragments.

Every one is more or less familiar with the subject of famous diamonds, but when it comes to other stones very so have the said he was after to two. He said he was after to two have the said he friend was after to home he said his friend was after with the subject of famous diamonds, but when it comes to other stones very little is known of the finer specimens. Rubies rank next after diamonds, following which are the sapphires, emeralds, aquamarines, beryls, garnets, turquoise and amethysts. Mr. Streeter, the London jeweller, it is said, owns a ruby weighing 32 5-16 carats, valued at £10,000, while Messrs. Tiffany and Co., of New York, have possessed a stone weighing 95-16 carats of unusually fine color, which they valued at £7,000. The finest ruby in existence is probably the

finest ruby in existence is probably the tabular stone of fine color and weighing 162 2-3 carats in the possession of The Duke of Devonshire owns a sapphire of 100 carats weight, and also the finest emerald in the world. The lat-

ter, which is of a fine green color, and flawless, weighs 1,350 carats, and is from the Muzo mine, the famous emter, which is of a fine green color, and from the Muzo mine, the famous emerald producer, in Bolivia. The stone is circle in connection with the church About twenty members were present The emerald in the possesison of the Czar of Russia ranks second in point of value, having been found in the Ur-
