

Biliousness

Is caused by torpid liver, which prevents digestion and permits food to ferment and putrify in the stomach. Then follow dizziness, headache,

Hood's Pills

insomnia, nervousness, and, if not relieved, bilious fever or blood poisoning. Hood's Pills stimulate the stomach, rouse the liver, cure headache, dizziness, constipation, etc. 25 cents. Sold by all druggists. The only Pills to take with Hood's Sarsaparilla.

An Open Letter From a Prominent Clergyman.

C. GATTS, SON & Co.,
Middleton, N. S.

DEAR SIR,—Please pardon my delay in answering yours of weeks ago. Yes I have no hesitation in recommending your

Invigorating Syrup.

During the fall and winter of '96 and '97 I was greatly distressed with indigestion. I tried several remedies, each of which gave me no relief. I was advised to try your Invigorating Syrup, which I readily did and have felt grateful ever since to the one who gave me such good advice. The very first dose helped me, and before half of the first bottle was used I was completely cured. I have not been troubled with the disease since. I have taken occasion to recommend your medicine publicly upon several occasions, and heartily do so now. You are at liberty to use this in any way you please.

Yours truly,
Pastor Baptist Church, Bridgetown, N. S.

Special Rates for Teachers

During the summer months a special course in Commercial subjects will be taught at Whiston & Frazee's College. Certificates of proficiency will be awarded at the close of the term. Write for full particulars to,

S. E. WHISTON, Principal
96 Barrington St., Halifax, N. S.

OUT OF SORTS?

If you are run down, losing flesh and generally out of sorts from overwork, worry or other cause, use

Puttner's Emulsion
Nothing else will so promptly restore you to vigor and health.

Always get PUTTNER'S,
it is the Original and Best.

A HEALTHY WOMAN.

Nine-tenths of all the suffering and disease in the world comes from the kidneys. Yet how few people there are who take any care of these delicate little organs. Backache, lame back, headaches, listlessness, all signs of kidney trouble, are almost universal.

Doan's Kidney Pills

Tone and regulate the kidneys and help them to throw off the poisons from the system.

Mrs. A. Brown, P. O. Box 500, Dresden, Ont., says: "For years I suffered from dropsical trouble which caused me much distress. I heard of Doan's Kidney Pills and got a box of them at Switzer's Drug Store. Before commencing to take them I was unable to button my shoes on account of my swollen condition, but by the time I had finished the first box I could do this without inconvenience. I have now taken a second box and have no hesitancy in recommending Doan's Kidney Pills for any Kidney or Dropsical trouble." Price 50c a box, 1 for \$1.00, all Druggists. The Doan Kidney Pill Co., Toronto, Ont.

The Home

Be Patient.

O heart of mine, be patient!
Some glad day,
With all life's puzzling problems
Solved for aye!
With all its storms and doubtings
Cleared away;
With all its little disappointments past—
It shall be thine to understand at last.

Be patient; some sweet day
The anxious care,
The fears and trials, and the
Hidden snare,
The grief that comes upon thee
Unaware—
Shall with the fleeting years be laid aside,
And thou shalt then be fully satisfied.

Be patient; keep thy life-work
Well in hand;
Be trustful where thou canst not
Understand;
Thy lot, whatever it be,
Wisely planned;
Whatever its mysteries, God holds the
key;
Thou wilt canst trust him, and bide
patiently.
—Presbyterian Messenger.

June Roses.

We are not apt to think of the rose from a gastronomic point. Yet in our grandmother's time the fruit of the rose was used for perfuming as well as that of its near kindred, the strawberry, the raspberry and the cherry, plum, pear, apple, peach and apricot are all probably developments of some far-away wild rose, or perhaps of a humble cinquefoil of this family which was inspired to grow tall and finally became a tree. At least this is among possibilities of modern theories of vegetable development. It is interesting to know that all the delightful fruits for the refreshment of man, as well as the greatest amount of beauty and fragrance ever found in flowers, belong to the family of roses.

We have the authority of science that the apple tree was a gift to the earliest man. The tree grows all over the temperate zone to the borders of the frigid cold. According to some recent theories, the apple must have come from some of the humble creeping roses like the blossom of the strawberry or the running bramble. All double roses are developments from the single rose. Such developments often occur in nature, and are not, as some people seem to imagine, quite often due to artificial treatment. Some of the numerous stamens of the single rose at first turned into petals, and the rose became double and more attractive to the honey-bee and other insects, who visited it and carried its pollen. Finally all the stamens were turned into petals, so that most of the double roses of to-day are useless except for the delight they give the senses in color, form and fragrance, for they are seedless. It is interesting to examine a rose that is partly double. A stamen is often to be found, like the stamens in the outer row of the white water lily, partly stamen and partly petal, demonstrating conclusively that all the essential parts of the flower are but metamorphoses from the leaf, the stamens then becoming petals, or, as some believe, the petal coming first, then the stamen.

From the earliest records of history the rose seems to have been recognized as the "queen of flowers." Roses were extensively used at Roman banquets. We hear of showers of roses at banquets and beds of rose leaves or rose petals. The term "sub rosa" has descended from those days, when the Roman wreathed the doors of his banquet-room with roses and considered that all who went under them were bound by a sacred compact to reveal nothing they heard within. The rose is disseminated all over America, Asia, Europe and Africa. —N. Y. Tribune.

A Dining-room.

Why do so many people look upon dining as a solemn duty which they owe to society and the world? Breakfast has no formality associated with it. It is eaten by the average man with enjoyment without considering the outside world. Luncheon is an apology for a meal, quite

often the more enjoyable because it is a picked-up meal composed of the left-over of the day before, put together in an appetizing, enticing manner.

Dinner is a more elaborate meal, but for that reason it need not be a solemn one. We are frequently reminded that at a convivial board literally a lively company is necessary to a good appetite. A dining-room should not be a gloomy room. The furniture should be cheerful, not stately and gloomy, after the pattern of so many. In the greater number of families the dining room is used for all three meals. It should not be elaborately furnished, but the colors used should be such as light up well for the evening meal and are cheerful under the light of morning and noon. An eastern or southern exposure is a pleasant one. A rather dark rich carpet, but one which will not show dusty footprints, is very desirable for a dining-room. Medium dark shades of green, especially the pretty bluish mistletoe greens, are desirable. Next to this rich tint of terra-cotta or grayish Delft blues are desirable. A round-cornered table of medium height is more desirable than the high square-cornered dining-table of olden times. It is more graceful, and more persons can be seated around it than around a square-cornered table. Extremely fastidious women are now ordering their linen tablecloths made with rounded corners to fit round-cornered tables. This is by no means necessary, though such a cloth is very much more effective where the pattern of the cloth shows a border that is intended to lie around the edge of the table. If the tablecloth is square the pattern must be broken at the corners of a rounded table. High-backed chairs of comfortable height, with the seat sloped a little toward the back, are now preferred for use at the dinner table. There should not be any furniture about a dining-room that cannot be kept compactly against the wall. The sideboard should not project far into the dining-room unless the room is very large. Care must be taken to leave plenty of space in this room to get around the table; therefore it is better to remove any furniture that interferes with this. Shallow closets with glass doors are desirable for the display of choice china. There is a great display now of quaint old-fashioned china on sideboards and in closets. Tantalus cups, double-handled "long cups" in Doulton and other old English ware, old-fashioned blue and gray steins, tall chased pitchers of English pewter are some of the quaint pieces displayed on the sideboards of persons of taste. —N. Y. Tribune.

A Grandmother's Birthday.

A lady who was spending a year among the peasants of Tyrol says:

"The morning after our arrival we were awakened by the sound of a violin and flutes under the window, and hurrying down, found the little house adorned as for a feast—garlands over the doors, and wreathing a high chair which was set in state.

"The table was already covered with gifts brought by the young people whose music we had heard. The whole neighborhood were kinsfolk, and these gifts came from uncles and cousins in every far-off degree. They were very simple, for the donors are poor—knitted gloves, a shawl, baskets of flowers, jars of fruit—but upon each one some little message of love was pinned.

"Is there a bride in this house?" I asked of my landlord.

"Ach, nein!" he said. "We do not make such a pother about our young people. It is the grandmother's birthday."

"The grandmother, in her spectacles, white apron, and high velvet cap, was a heroine all day, sitting in state to receive visits, and dealing out slices from a sweet loaf to each one who came. I could not but remember certain grandmothers at home, just as much loved as she probably, but whose dull, sad lives were never brightened by any such pleasure as this; and I thought we could learn much from these poor mountaineers." —Ex.

MOTHER AND BABY DELIGHTED WITH THE "LITTLE BEAUTY" HAMMOCK COT.

PATENTED

Here is one of many testimonials:
78 East Avenue, Hamilton, Ont.,
April 13, 1898.

Geo. B. Meadows, Esq., Toronto:
DEAR SIR,—It affords me a great deal of pleasure in stating that the "Little Beauty Hammock Cot" purchased from you has been very satisfactory, and I consider it one of the greatest conveniences we have, as it is so popular with the children, who seem to take to it at once. It takes up very little room and can be easily moved from place to place as required. I would not be without it under any circumstances, and can recommend it as a very useful and convenient article.

Yours Respectfully,

MRS. W. F. MONTAGUE.
