

the eruption being confined to the limbs, and also from its occurring in a female. The only other case I ever saw of Lichen Scrofulosum in a female was under the care of Mr. Waren Tay at the Stamford Street Skin Hospital in London, and, strange to say, in this case also the eruption was principally on the backs of first phalanges and hands ; it was associated, if I remember correctly, with general psoriasis. Having seen the above mentioned case, greatly facilitated my diagnosis in this one.
