

ECONOMIC GEOLOGY— <i>Con.</i>	Page.
Ore deposits— <i>Con.</i>	
Silver-lead veins	129
General statement	129
Detailed descriptions	130
Distribution	130
Formations in which the veins occur.....	131
Strikes and dips	131
Persistency and dimensions	131
Intersections	132
Spacing	133
Faulting	133
Gangue-minerals	133
Metallic minerals	133
Included and unreplaced areas of wall-rock.....	134
Assay values	135
Age of the veins	135
Oxidation	135
Leaching and enrichment	136
Genesis	137
Mining properties	139
The Union Mines	139
The Nevada Mines	139
Contact-metamorphic deposits	140
General statement	140
Detailed descriptions	140
Geological occurrence	140
Dimensions	141
Mineralogy	142
Assay values	142
Oxidation, leaching, and enrichment.....	142
Genesis and age	143
Mining properties	145
The Fleming claim	145
Coal	145
Discovery	145
Descriptions	146

ILLUSTRATIONS.

Photographs.

PLATE	I. Looking west from Mount Pugh toward the Coast Range of mountains	14
"	II. Showing the almost flat character of a typical portion of the upland-surface.....	16
"	III. Looking in a southeasterly direction down Wheaton River valley toward Big Bend	16
"	IV. Looking in an easterly direction across Corwin valley and Annie lake.....	16
"	V. Looking down Wheaton River valley from a short distance above Big Bend	18
"	VI. Looking in a westerly direction up Hodnett Lakes valley. ..	18
