JUNE.—If you have not had time to clean up about the farm and house since spring set in, perhaps you may have time about now. One often sees about the barn yard of some farmers, old waggons, wheels, lumber, wood scattered about, logs lying by the road side, and many other things which tend to make the place present a very disagreeable appearance. Why not be tidy and clean about the premises; set things to rights; make the place look better than ever before. Then inside the house perhaps the kitchen or some other room wants a little white wash. Perhaps the wife or daughter wants a room or two papered. Possibly the house or windows need a little paint outside or in. It pays better in the long run to do all such things at the right time. None know better than the Farmer that a stitch in time saves nine, yes, even ninety-nine, and often nine hundred and ninety-nine.
