

Load up in a jiffy

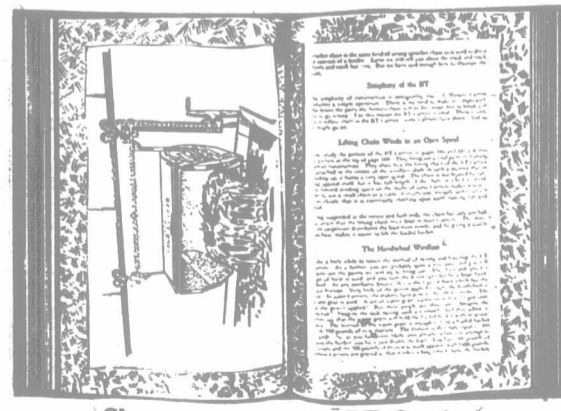

Run her out along overhead tracks

Dump in wagon or spreader

Track can be switched into any part of the barn

Clean out pens with BT Carrier

"Biz-z-z-z-z" said the Alarm Clock early one winter morning. But farmer John just reached from his bed and turned it off again. "I can sleep in an hour longer, ever since I got that BT Manure Carrier to help me do my chores," said he. "It's the greatest labor saver on the farm. What does it matter if labor is scarce? The BT Carrier is worth as much to me as a hired man, and costs nothing to board."

Manure **B**arrier **B**ook

Tells all about this, BT Carrier. Shows you how you can clean your barn in a fraction of the time it used to take. Run out 800 pounds of manure at a time—four big barrow loads. One trip to the pile and the stable is cleaned. Simple and easy. No heavy lifting. A snap, even for a boy.

Then, it's so clean. It is perfectly water-tight so no manure is dripped along the passage-ways. The ends are high to prevent manure slopping over them.

You have a clean hand-wheel to push on. Your hands never touch the dirty bucket.

Get your manure carrier now. It will save work and time enough to pay for itself before spring. You will get more work out of it than any other implement on your farm, for you will use it twice a day, and seven days a week, even on Sundays, as long as your cows are in the barn.

The first thing to do is to write for the book and read all about it, 48 pages, well printed and beautifully illustrated. Tear coupon out and mail.
