

WOOL

Farmers who ship their wool direct to us get better prices than farmers who sell to the general store.

ASK ANY FARMER! who has sold his wool both ways, and note what he says—or, better still, write us for our prices; they will show you how much you lose by selling to the General Store.

We pay the highest prices of any firm in the country and are the largest wool dealers in Canada. Payment is remitted the same day wool is received. Ship us your wool to-day—you will be more than pleased if you do, and are assured of a square deal from us.

Questions and Answers.

Miscellaneous.

Vinegar.

I have a barrel of sweet syrup water which has been outside for a considerable time. What should I add to hasten its turning into vinegar? **J. W. F.**

Ans.—A substance known as "Mother" which is the active agent in the changing of sweet cider or syrup into vinegar, is possibly what is required in your barrel. This may be secured from some vinegar barrel. It is of a more or less slimy nature.

Drying a Cow.

1. At time of freshening one of my cows gave milk from five teats. Her udder was very much inflamed, which induced me to draw milk from this extra teat. Would it be safe to stop milking this teat at the present time? The cow freshened in April and gives about 30 lbs. of milk per day. Would I lose much milk by doing so?

2. Is it natural for a cow to show oestrus every three weeks? **W. T. W.**

Ans.—1. You should have little difficulty in drying up this extra teat, and we do not think you would lose much milk by doing so. It is not natural for a cow to give milk from any more than four quarters.

2. Yes.

Municipal Travelling Expenses.

Has a municipal council a legal right to use the people's money to pay the expenses of a delegation to Ottawa, said delegation consisting of the council and enough of their friends to make up a party of ten or twelve, and nearly everyone of said party having money lying in the bank? If they haven't, what steps should be taken to have the money put back where it was?

Ontario.

SUBSCRIBER.

Ans.—They have a limited right to do so. The substituted section provided by The Municipal Amendment Act, 1914, for sec. 427 of The Municipal Act permits the council of a city, town, village, county or township to pay for or towards the reception and entertainment of persons of distinction, or the celebration of events of national interest or importance, or for or towards travelling or other expenses incurred in respect to matters pertaining to or affecting the interests of the corporation, a sum not exceeding in any year in the case of (a) a city having a population of not less than 100,000, \$20,000; (b) a city or town having a population of not less than 20,000, \$2,500; (c) a city or town having a population of not less than 10,000, \$1,000; (d) a county, \$1,500; (e) other municipalities, \$500.

Removing Warts—Fistula.

1. I have a three-year-old horse with a running sore on the top of his head. This started from any injury received two or three months ago. I have been washing it out every day with a solution of creolin and putting healing liniment into it. What will stop the discharge and heal the sore?

2. I have a horse with several warts on his head and body. I was advised by a veterinarian to tie a strong string tightly around them, or else to apply castor oil. I removed several by means of tying the thread around them, but they have grown again. The castor oil does not seem to do much good. What treatment would you advise for the removal of warts? **G. D.**

Ans.—1. The trouble is known as fistula, which frequently occurs on the withers and sometimes on the head, due to an injury. As the material which you have used has failed to effect a remedy, it is advisable to have a veterinarian examine the wound, as it may be possible that there is a portion of diseased bone which will have to be removed before the discharge is stopped. This trouble is very difficult to treat.

2. The warts may be dissected off and a little disinfectant dropped on the wound, or the raw surfaces may be treated with butter of antimony applied with a feather for three or four days, after which they should be dressed twice daily with one part carbolic acid to twenty parts sweet oil until healed. Small, flat warts can usually be removed by an application of butter of antimony.

Waste Nothing

This is no time for "cream slacker" separators or wasteful methods of skimming milk.

With butter-fat at present prices and the Food Administration begging every one to stop waste, "cream slacker" methods of skimming milk must go.

Whether you are trying to get along without any cream separator or using an inferior or partly worn-out machine, you are wasting butter-fat and losing money.

Get a De Laval and save ALL your cream

Viewed from every standpoint—clean skimming, ample capacity, ease of operation, freedom from repairs, durability—there is no other cream separator that can compare with the De Laval.

Order your De Laval now and let it begin saving cream for you right away. Remember that a De Laval may be bought for cash or on such liberal terms as to save its own cost. See the local De Laval agent, or, if you don't know him, write to the nearest De Laval office as below.
