The McCormick Binder

YOU want to get right on the binder question. Don't neglect so important a matter. The time to get right is before you buy—not afterwards.

Just a little time spent investigating will save you a world of worry when you get into the field.

The McCormick binder is the machine to buy.

It does good work in any field where the condition of the grain will permit any binder to be operated.

The knottor is simple and accurate—only two moving parts.

Its binding attachment is correctly designed and very simple. It hardly ever gets out of order.

It is made in either right or left hand cut.

There is a wide range of adjustment everywhere—in reel, binding attachment and tilt.

Its divider folds up so you can drive without trouble through narrow lanes or gates and store away in small space when not in use.

These are but hints on McCormick essentials. You want to know it all.

In addition to grain and corn harvesting machines the McCormick line embraces Mowers, various styles and sizes of Hay Rakes, Hay Stackers and Binder Twines.

Call on the McCormick Agent for information or write nearest branch house for catalog. CANADIAN BRANCHES: Calgary, London, Montreal, Ottawa, Regina, St. John, Toronto, Winnipeg. INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U. S. A. (INCORPORATED.)

Burnside Ayrshires

Apply to **B. LAWSON, CRUMLIN, ONT.**

QUESTIONS AND ANSWERS.

Miscellaneous.

OYSTER-SHELL BARK-LOUSE.

I am sending you apple-tree twigs, infected with some disease or vermin. I have quite a fine young orchard, and nearly every tree is infected. What is the trouble, and the best remedy?
J. H. B.

Ans.—This is oyster-shell bark louse. See answer to S. K., page 536, March 29th issue.

PUBLIC HOLIDAYS.

I noticed it stated in one of your late issues that there are eight recognized public holidays in a year to which hired help is entitled. Does this refer to those hired by the year or month only, or is anyone hired by the week entitled to the same privilege?

SUBSCRIBER'S DAUGHTER.

Ontario.
Ans.—There are ordinarily eight, besides Sundays, and all such employees as you mention are legally entitled to them in the absence of agreement to the contrary.

SURETY FOR NOTE.

1. First, is it lawful for a person to hold a note for three or four years without notifying the bank, supposing the interest is paid?

2. A borrowed money from a society, and B backed the note with his name on the face of it with A, and A kept the interest paid up for about four years, B never getting any notice. About a year and a half after B asked one of the directors about it, and he told him it was paid. Now, it has turned out that it was another note that was paid instead of B's. Can the society collect it of B?

Ontario.
Ans.—1. Judging from your second question, you mean by the word "backer," a surety, rather than an endorser, and our answer must be, Yes.
2. Yes.

Veterinary.

ABORTING COW.

1. I have a cow that aborted about six weeks before due to calve. Is it probable she will abort next year? Would you advise me to keep her on chance, or beef her? She never aborted before. Are there any precautions that could be taken against her aborting next year?

2. Please recommend me a book on the keeping of bees, and management of.

Ans.—1. If other cows in the herd do not follow suit, showing that there is contagious abortion, she will probably carry her calf full time. She should not be bred again for two or three months. The carbolic-acid treatment, described by Geo. Rice, in the March 15th issue, page 400, is the best we know of.
2. "The Honey Bee," by Langstroth, \$1.50; "The ABC of Bee Culture," by Root, \$1.00. Order through this office.

SPEEDY STROKE.

Three-year-old carriage colt is a high-stepper. When going slowly, he goes clear, but when driven fast, he strikes his knee with the opposite foot. S. S.

Ans.—This is called speedy stroke, and is due to an undesirable conformation, viz., the toes turning outwards more or less when the animal is standing. When going slowly, your colt does not get his foot high enough to strike the knee, and it escapes the cannon; but when driven fast, the foot comes higher, and the knee, projecting inwards, is struck. If he is shod with light shoes, he will probably not go high enough to strike, but in many cases it is not possible to shoe so as to prevent the accident. Some claim that a shoe heavy on the inner side, and higher, but of the same depth, but narrower on the outer side, will turn the foot outwards; but in the majority of cases this fails. Allow your shoeing-smith to experiment with shoes of different weights, and in the meantime, wear a boot to protect the knee, and it is possible the fault may be corrected.
V.

Lump Jaw

The first remedy to cure Lump Jaw was
Fleming's Lump Jaw Cure
and it remains today the standard treatment with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with medicines or imitations. Use it, no matter how old or fed the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in Fleming's Vest-Pocket Veterinary Adviser. Most complete veterinary book ever printed to be given away. Durable bound, indexed and illustrated. Write us for a free copy.
FLEMING BROS., Chemists, 45 Church Street, Toronto, Ontario.
