

Ornamental Fencing
affords protection to your lawns, flowers and children, in addition to adding a finishing touch of beauty that is most pleasing to the eye and satisfying to the owner.

Peerless Ornamental Fencing is unequalled for beauty of design, artistic finish and strength of construction.

We have spent years in the manufacture of fencing and consequently we know what is best to give real fence service and how to make such a fence at a price you are willing to pay. Don't be misled by the inferior and cheap article offered by catalog houses, because such fencing is dear at any price.

Our Agent will supply you, but if there is none near write us direct, mentioning the name of your dealer, and we will see that your requirements receive prompt attention.

Write for our printed matter. It is mailed free on request.

Write, or come and see my young bulls and heifers. They are going at farmers' prices.

ROBT. McEWEN, Byron, Ont.
"Do you speak several languages, father?"
"No, my son," replied Mr. Henpeck, gazing sadly at his wife; "but I do know the mother tongue."—Judge.

THE POOR DYSPEPTIC Suffers Untold Agony After Every Meal.

Nearly everything that enters a weak, dyspeptic stomach acts as an irritant; hence the difficulty of effecting a cure. Burdock Blood Bitters will relieve all the distressing symptoms of dyspepsia and in a short time effect a cure.

Mrs. F. C. Gross, Berlin, Ont., writes: "I have been troubled with my stomach for the last seven years and tried all kinds of medicine for it, but none of them ever cured me, for as soon as I would quit using any of them, the same old trouble would come back. Last fall I was advised to try Burdock Blood Bitters, which I did, and used four bottles, and now feel so strong I can do all my house work nicely and can eat almost anything without it affecting me in any way."

"Our boy is also using it; he always complained of pain in his stomach and all over, like rheumatism, and at the age of ten had to stay home from school. He hasn't quite used two bottles yet and is feeling good, can attend school regularly and eats heartily."

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

BEE SWARMING.

Is it better to let bees swarm once then cut away queen cells, or would it be as well for bees, and get better returns, to not let them swarm at all, by keeping queen cells cut away? How can bees be wintered in a colony house like hens?

A. H. B.

Ans.—It is better to prevent all swarming by some artificial method, which includes more than simply keeping queen cells cut away.

I have described a good method several times in "The Farmer's Advocate," and we give printed instructions to anyone that writes to me, making application for an experiment in the prevention of natural swarming. MORLEY PETTIT.

BABCOCK VS. OIL TEST.

We have two creameries here that are both anxious to get our cream. One uses the oil test and the other the Babcock, and each man says I'll make more by giving him my cream. The one that got the cream for April sent in the inclosed report. Is it figured out properly, and do you think the Babcock is superior to the oil test?

J. P. B.

Ans.—Your statement is correctly calculated, except that by omitting the fractions your creameryman underestimated the amount of butter-fat by a fifth of a pound, worth about seven cents. Probably he gives you the benefit of the fraction when it exceeds the half pound. We certainly consider the Babcock test decidedly preferable to the oil test. It is more accurate. Nearly all up-to-date creameries have discarded the oil test and substituted the Babcock.

TREE-PLANTING AND HORSE QUERIES.

1. I am going to plant a number of pine balsam, and also a row of maple trees in my yard. When should they be planted, and how treated after planting? What time of year would you advise to transplant an oak about 3 inches in diameter, or can same be done successfully?

2. Yearling colt has a small wart on top of nose. What would remove same?

3. How much wheat would you recommend per day for Clydesdale mares previous to foaling? Would sulphur or salt-petre be injurious to them? If not, what quantity would you advise?

4. Driving mare four years old had distemper last fall; got better, but has kept thin and dry in the hair since. Have been feeding her a cup of wheat in a gallon of oats three times a day all winter, along with hay, but has not cleaned off much yet. What would be the trouble?

5. When is the right time to sow flax, and how much should be sown per acre? Does it require strong land?

FARMER.

Ans.—1. Plant the trees as early in spring as possible. The oak should be handled like the rest, only be careful in moving to leave as much soil as possible adhering to the roots. There is more danger of loss in transplanting large trees. Mulch the newly-set trees with a little straw manure.

2. If the wart has a constricted neck, it may be removed by clipping off or by tying a thread tightly around it. If flat, apply butter of antimony. Some claim constant application of castor oil to be valuable in removing warts.

3. The less medicine an in-foal mare gets the better. A little wheat in the oats will do no harm. Would not advise more than one-quarter wheat, and unless they are used to getting it, would not advise changing the diet.

4. Turn her on grass. The grass will likely improve her condition. Do not leave out in rain. If she does not improve, give her a tablespoonful of the following three times daily, viz: Equal parts of sulphate of iron, gentian, ginger and cayenne. Her teeth may also be trouble.

5. In the spring, about the same time as the cereals. It is usually sown here immediately following the grain sowing. Sown from 20 lbs. to three pecks per acre. It does well on strong land.

LIVINGSTON'S OIL CAKE MEAL

Is the most wholly nutritious stock food you can buy. Made of the purest Linseed—by the celebrated Old Patent Process (which makes it keep three or four years, if necessary)—proved by feeding tests, both practical and scientific, to be 95% digestible.

Even if LIVINGSTON'S OIL CAKE MEAL costs twice as much as the other foods which do not keep and cannot be half digested, it would pay every farmer and dairyman to get LIVINGSTON'S OIL CAKE MEAL. The cost is only a trifle higher.

LIVINGSTON'S OIL CAKE MEAL is really cheapest in the end—quickly increasing and improving the milk and healthily fattening CATTLE.
