## Oxy-Acetylene Welding and Cutting

### Defective Castings Reclaimed at Small Cost

Expensive tie-ups are averted by the Prest-O-Lite Process of Oxy-Acetylene welding. Frequently one repair will result in a saving of time and money far in excess of the cost of a Prest-O-Lite outfit.

But not only has this process proved itself a great money-saving factor in repair work. It has also been adopted as standard routine practice in many prominent metal working factories in all parts of Canada. The above illustration shows a Prest-O-Lite operator reclaiming defective castings which would ordinarily have found their way to the scrap pile.

## Prest-O-Lite PROCESS

employs both gases (acetylene and oxygen) in portable cylinders. Prest-O-Lite Dissolved Acetylene is backed by Prest-O-Lite Service, which insures prompt exchange of full cylinders for empty ones. Provides dry, purified gas, insuring better welds, quicker work and lower operating cost.

Apparatus consists of an equal pressure blow pipe, automatic regulators and gauges, and all necessary equipment. Adaptable for oxy-acetylene cutting by the addition of special cutting blow pipe.

Thorough instructions are furnished free to every user of Prest-O-Lite Dissolved Acetylene. Any average workman who understands metals can learn the welding process quickly and easily.

We will gladly send illustrated literature and interesting data showing actual instances of savings made by others. It may suggest valuable ideas to you. Write for it.

Address Department C -- 108

Prest-O-Lite Company  
of Canada, Limited  
Prest-O-Lite Building  
Cor. Elm St. and Centre Ave.  
Toronto

Plants at:—  
Toronto, Ont. Shawinigan Falls, Que.  
Merritton, Ont. St. Boniface, Man.
