Hoard's Dairyman: The past winter corn exported from the United States to Denmark has cost the farmers of that country 80 cents a bushel. In addition they import cotton seed meal. linseed meal and sunflower seed in liberal quantities. Coal for the creameries is imported from England. Every buttermaker employed in their creameries must be a graduate from some one of their dairy schools. The creameries all have handsome, substantial buildings and are equipped with the best of modern apparatus. Pasteurizing is closely followed all over the country, some creameries treating the cream after it comes from the separator room and prevented what might have while others pasteurize the milk just as it comes from the farms. # Why Glasses are Worn.

For a long time glasses were used only to assist in reading or near work, but with increased knowledge of the eye, we are able to adjust glasses to improve the sight, thereby curing chronic headaches, neuralgia and many nervous afflictions caused by eyestrain. The thousands who wear properly adjusted glasses are the living testimonies to the truth of it.
