Look for the trademark-

Two Monster Beetles.

The largest bug known to the old world entomologists is the gigantic Goliath beetle, which is found along the Kongo river in Africa. Goliath is upward of six inches in length from the tip of his nose to the nether end of his hard shelled body and has a pair of gauzy wings folded up under his arms, either of which is as large as a lady's face veil. But Goliath is a pygmy when compared with the elephant beetle of Venezuela, an entomological giant which weighs nearly a pound and which has a wing spread equal to that of a mallard duck. Both of these bugs are rare.

CATARRH CANNOT BE CURED With focal applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and arts directly on the blood and mycous

What It Is Expected Denatured Alcoho Would Do For the Dominion of Canada.

"What's all this talk we hear about denatured alcohol?" is a question that the members of the Dominion Parlia-ment are likely to hear most frequently from their constituents until they are able to make their escape to Ottawa again. If they value their reputation for prescience, they had better post themselves on the subject, and if they wish to retain their popularity it would be well for them to give favorable answer to the further demand, "What's the matter with us having cheap alcohol in Canada?" Already the farmers and manufacturers are eagerly discussing the matter, and the topic is shaping itself into a political issue. As yet, the first protest against removing the prohibitive tax on alco-hol that has been rendered unfit for drinking has to be heard. Benefits to the Farmers.

The country papers are printing let-ters from leading farmers, who point out the benefits they would expect if alcohol could be sold at about 20 cents agallon. One man makes the interesting statement that the cornstalks on a single acre, after the removal of the cobs, can be made to yield about 176 gallons of commercial alcohol. If this is a correct estimate, the day may be at hand when the products of the farm that are now practically useless will supply the owner with fuel, light and power, and leave him a balance of cash in hand. In Germany the process of making alcohol has become so simplifled that farmers are their own manufeaturers in many instance. There the cost is only about 15 cents a gallon.

The Importance of the Potato. There the

The importance of the Potato. In Germany, it may be noted, farmers and manufacturers work in the greatest harmony. One stimulates the other. In the matter of alcohol, for example, the potato is largely used to produce it; and to supply the market the German farmers have become farmers as poiato growers, getting a mous as potato growers, getting a greater and better yield per acre than greater and better yield per acre than
the farmers of any other country.
When it was found that after the alcohol had been extracted there was still
a considerable residuum of potato, the
Germans proceeded to utilize it in the
manufacture of starch. From Germany the potato starch industry has come to the potato starch industry has come to this continent, and in one county of Maine there are more than 60 factories engaged in the business. Now plants are being erected for the manufacture of alcohol, in connection with the po-jato starch works.

The Uses of Alcohol. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

Take Hall's Family Pills for constipation.

The Uses of Alcohol.

Under the heading "Tax Free Alcohol," Industrial Canada publishes an article by Prof Cohoe, of McMaster University. An interesting list of the different uses to which alcohol is now put is given. In the order of their importance they are as follows:—Making varnishes, painta, enamels, etc., soap manufacture, hat making, celluidd, ether and chloroform, smokeless powned; distinct manufacturing operations what produces such wonderful results in curing Catarrh. Send for testimonials free.

Take Hall's Family Pills for constipation. poses about 2,000,000 gallons of alco-hol were used in Great Britain during the year ending March 1, 1901. No ac-count is taken of the industries in which alcohol might be used if its price were reduced about 90 per cent.

How an Industry Was Lost. Prof. Cohoe divides the uses of de-natured alcohol into three parts—as a solvent, a re-agent, and as a source of solvent, a re-agent, and as a solves the theat, Hght and power. Its uses under the third head have been pretty thoroughly discussed already, and it is interesting to glance at the other purposes it serves. It appears that, as a solvent, alcohol is the very foundation. solvent, alcohol is the very foundation of the smokeless powder industry, and that it constitutes a very important element in the cost of the product. To a less extent, it is important in the manufacture of paints and varnishes, which might be made more cheaply it which might be made more cheaply if denatured alcohol were duty free. To the soal far group of industries cheap alcohol is essential, and it is said that these industries were captured from England by Germany because at the time the former country placed restrictions upon the use of alcohol.

Germany Leads the Way.

There's a story of a farmer and

ether, a commodity that has become one of the very necessities of life. Vinegar in large quantities is almost mode from alcohol, and there are scores of other lustances of its use as raw material. It is interesting to commodity the life interesting to commodity the life interesting to commodity. lens. For 1903 Germany used 14,000,000 gallons for industrial purposes, about 1,000,000 gallons for upotor and other engines, and 34,000,000 gallons for light and heat. It is probable that its use for internal combustion engines will have doubled by this time, on account of the remarkable locrease in motor boats and automobiles. It would seem posts and automobiles. It would seem to be an essential to a country's pros-porty in many lines of manufacture that no artificial restrictions should be placed upon the use of alcohol.

In Prison For His Dog. In Prison For His Dog.

Eamonn McNulty, of Creeslough,
County Donegal, is enjoying a week's
sojoura in Derry jail because he refuses
to take out a license for his dog unless the document is issued to him in
Irish. The Dunfanaghy Magistrates
fined him 5s., or seven days' imprisonment, and Mr. McNulty selected the
latter alternative. Mr. McNulty's contention is that it is impossible to spell
his name save in Irish. In that language
his name is Mac-An-Ultaigh.

Capt. Bernier's Route. This trip Capt. Hard coal is to be found in large quantities or those talends. She will call at Disco. on these islands. She will call at Disco, on the west shore of Greenland, from ce she will reach Canada abou

BUILT UP HER HEALTH

SPEEDY CURE OF MISS ECCLISON She is Made Well by Lydia E. Pink-ham's Vegetable Compound, and

ham's Vegetable Compound, a Writes Gratefully to Mrs. Pinkha

the same way may be benefited as she

Dear Mrs. Pinkham:—
"I heartily recommend Lydia E. Pinkham's Vegetable Compound as a tonic and regulator for female troubles. I suffered for four years with displacement and no one but those who have experienced this dreadful agony can form any idea of the physical and mental suffering those endure who are thus affected. Your Vegetable Compound cured me. Within three months I was fully restored to health and strength and now my periods are regular and painless. What a blessing it is to obtain such relief when so many doctors fail to help you. Your medicine is better than any doctor or medicine I ever had.

No other medicine has such a record. Dear Mrs. Pinkham :-

No other medicine has such a record of cures of female troubles as has Lydia E. Pinkham's Vegetable Compound. Women who are troubled with painful or irregular periods, backache, bloating (or flatulence), displacement of organs, inflammation or ulceration can be restored to perfect health and strength by taking Lydia E. Piakham's Vegetable

Compound.

Mrs. Pinkham invites all sick women Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Her experience is very great, and she gives the benefit of it to all who stand in need of wise counsel. She is the daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge. Address, Lynn, Mass.

When you visit a family in Iceland you must kiss each member according to his age or rank, beginning with the highest and descending to the lowest, not even excepting the servants. On taking leave the order is reversed. You first kiss the servants, then the children and lastly the master and mistress. Both at meeting and parting out distinction of rank, age or sex is the only mode of salutation known in Iceland.

The people of the different countries have their various traditions concerning the wood of which the cross was made. In England the peasants say that it was of elderwood and that

Germany Leads the Way.

Alcohol is the principal constituent in their, a commodity that has become ther, a commodity that has become as of the very necessities of life. Vinetar in large quantities is almost mode from alcohol, and there are scores of their instances of its use as raw mater.

There's a story of a farmer and his son driving a load to market. Of the team they were driving one was a steady, reliable dd gray mare, the other a fractious, balky black horse sulked stalled and the black horse sulked about a fence at once." stalled and the black horse sulked and refused to pull. "What'll we do, father?" said the younger man. "Well," said the younger man. "Well," said the father, "I guess with the latter country, as noted, a year's women, "The gray mare's the better country as noted, a year's women, "The gray mare's the better country as noted, a year's women, "The gray mare's the better women for industrial purposes, about 1,000,000 gallons for motor and other 1,000,000 gallons for motor and other there's an extra strain to be borne it is laid on the woman's back. How often she breaks down at list under the added weight of some "last straw." Women who are dragging along wearily through life can gain real strength by the use of Dr. Pierce's Golden Medical Discovery. puts back in concentrated form the strength making material which working women use up more rapidly than it can be restored by Nature in the ordinary processes of nourishment and rest. Dr. Pearce's Pleaset Polites ant Pellets are universal fivorites with women because they are easy to take and thoroughly effective in curing the consequences of constipation.

Caught In the Act.

Extensive and persistent thefts fro an orchard at Penn, England, exercised the local police severely. All likely boys were shadowed without result, and at length a watch was set. The culprit was caught in the act. His name was given as Tommy, and he was described as a pony of respectable ap-

English Naval Centenarian. The only known survivor of the naval battle of Navarino, which took place in 1827, is John Stainer, of Ryde, who has entered upon his 100th birthday. He was a middy on board the Talbot.

Even the tattooed man objects to being called hard names

Irespassers

By C. B. LEWIS Copyright, 1906, by E. C. Parcells

When Captain Ben Golden retired from the sea and bought a place on the Connecticut shore he made only careless inquiries as to who were his neighbors. As a matter of fact, he did not care. As he explained it:

"I am a man as attends to my own business and expect other folks to attend to theirs. I shall have a housekeeper and a servant and live very quietly. My nephew, George Lee, may come down from the city now and then to stay over Sunday, but that's all the company I shall have."

Two weeks later, in buying and tak-Ing possession of the property adjoin-ing Captain Golden's on the west, the urchaser, who was a man of sixty and rather crusty, had said to those who sold to him:
"I don't care who lives around here.

All I want of them is to mind their own business and let me mind mine. If I catch any of them trespassing on my land they won't do it a second time. I shall live here quietly, with my niece

to manage the house." There were no fences dividing the property, but for the first few weeks Captain Golden and Mr. Bingham, who was the man with the niece, were too busy to walk abroad much. They saw each other from a distance, but made no effort to get acquainted. One day they were tramping through the shrubbery near the dividing line and came face to face. Both were there for the same object. Each one of them had been thinking of putting up a line fence to shut the other out. There was some embarrassment for a moment, and then Captain Golden, being the more jovial of the two, called out:

"Good day, neighbor; glad to meet "Good day, sir," replied the other as he drew himself up in an icy manner.

"Being we are neighbors"-"We are not neighbors sir You simply happen to live near me. That is no

"YOU ARE AT LEAST FOURTEEN INCHES ON MY LAND." excuse, however, for you to trespass

on my property."
"Who's a-trespassing?" "You are, sir. The line runs this

side of that beech, and you are at least fourteen inches on my land." "Then I'll get off your land, right longing to be forgiven. She maintain off!" exclaimed the captain, as he be-'Yes sir I'll get off-I am off-and if you are that s

on my property."
"I will be careful not to. I will see

"I shall also see about it at once." "I shall build the fence." "Sir," said Mr. Bingham, "I forbid you to put up a fence here!

"And I forbid you!" There was further emphatic and even violent language, and they finished up case of further trespass. When Mr. "last Bingham reached his house his face was so red and his manner so perturbed that his niece, Miss Jennie Gray, was forced to take notice of it and ask if he had been attacked by tramps. He thereupon explained what had occurred, favoring his side of the case as much as possible, and con-

cluded with the declaration: "I am not going to let that old brute easy him scare you off you are no niece of

> "I've taken a great liking to rambling through that shrubbery," replied the niece, "and now I've got to be very, very careful not to get even one toe over the line."
> "You go right ahead and ramble just

where you want to, line or no line, and if that old lump of salt says anything to you make faces at him. I told-him I'd build a fence, but I won't. He may build one and pay for it. It's us how the Lord lets some folks continue to live.

Miss Jennie Gray had lived with her uncle long enough to know how hot headed and irascible he was and that if there had been any trouble he had done his full share in provoking it. But she also felt it her duty to stand by him, right or wrong. More than that, she also felt it her duty to trespass up-

on Captain Golden's land because trescassers had been forbidden.

The old sailor was also in an angry

mood when he reached his house but he did not explain matters to his house keeper. He waited until his nephew came down, a week later, and then he cold the story and added:

"George, I don't want no trouble with anybody, but if that old fossil drives me to the wall I shall drive him under ground. I said I'd build a fence, but I won't do it. He can build and pay for it if he wants to. I've warned him to keep off my land, and if he don't do it"-

George Lee, civil engineer, had a warm heart for his bluff old uncle, and it was only natural that he should espouse his cause. He arrived at the house on Saturday evening, and soon after breakfast Sunday morning he set out for the shrubbery with a clgar in his mouth and a cane in his hand to look the ground over. He found a belt of shrubs and trees about forty rods wide and extending from the highway back to the shore. He could walk there and almost imagine himself in a forest. The ground was clear of any tangle, and the whole thing was a happy thought carried out between neighbors.

Young Mr. Lee had left the house feeling somewhat belligerent, but he lost it all soon after entering the grateful shade. A rabbit ran away, squirrels chattered at him, and he caught sight of birds' nests among the branches. was a place of good will and peace, and he was feeling so when he heard a suspicious noise on the other side of a heap of brush lately cut and stacked. He thought he heard the movements of a man. If it was a man he was a trespasser. If he was a trespasser he must be sent about his business.

"Hey, you, beyond the brush, what are you doing there?" called the young man.

There was no answer, but he heard a movement. He advanced and gave the heap a whack with his cane and

"Come out and show yourself, you skulker!" The skulker made no response. The silence aggravated Mr. Lee, and, draw-

ing his cane up to his face like a gun, he continued: "If you don't come out of that before

count ten I'll fire a charge of buckshot into the brush." "You'd better not!" replied a voice that jumped him a foot high, and he circled around the heap to find a young lady standing there with a freshly gathered bouquet in her hand. He looked at her with open eyes and mouth. She looked at him with her

chin stuck out and a glint of defiance in her eves "Good Lord, but you really must excuse me!" gasped Mr. Lee after a long

"You can go ahead and shoot now," replied the girl.
"But I—I didn't think to find a wom-

an—a girl—here."
"No. Neither did I think to find a young man ready to do murder. Do know that you are a trespasser, sir? You are on my uncle's land, and as his representative I warn you off. The dividing line is two feet behind

Mr. Lee slowly moved over the line, and his face betrayed such astonishment and perplexity that the girl could not prevent a smile.

"Can-can I say anything to explain this unfortunate occurrence?" he beg-

"Nothing except that you wanted to

shoot me."
"But you know I didn't. You know that I hadn't the slightest idea of your presence. I came out here to-to' "To shoot my uncle. I infer that you re stopping with the sailor and, hear-

ing of the little dispute of a few days ago, you volunteered your services as assassin. Very kind of you, I'm sure." Mr. Lee looked at the girl in a help-less way. He didn't believe there were words enough in the English language to set him right, and yet he felt a great

"I see my uncle coming in search of of a man I warn you not to set foot me, and if you don't slay him you may

explain things to his satisfaction."

A track man would have made it 100 to 1 shot against, but he would It took a year and m do it, and there was Captain Golden to placate as side issue, but the "assassin" has become a devoted husband and the "skulker" a loving wife, and the two old men walk arm in arm through the shrubbery and find no excuse for quarreling.

A Hopeless Case While Admiral Philip was in com mand of the New York navy yard an old sailor who had done valiant service under Philip, and of whom the admiral was very fond, called to see him in regard to his getting a nice, easy tob for him in his old age. old salt had a list as long as his arm of the "snug berths" afforded by the government, any one of which he was perfectly satisfied to receive. The list began with "page in the senate" and ran the gantlet down to "doorkeeper at the White House." No other thought entered the old tar's mind than that the admiral could simply jot down a couple of words on a piece of paper and the job would belong to him. But a light twinkled in Admiral Philip's eye as he said to the sailor with mock

"My lad, you are too modest. Your record entitles you to something bet-ter. I would prefer to secure for you a Democratic nomination for congress from a Tammany district or a generalship in the diplomatic service or an appointment as master of the buckhounds to her majesty Queen Victoria. Any of these would be easier for me to secure than the jobs you have asked for, for I have absolutely no political influence whatever."
