Wolfville High School

Results of First Quarterly Examinations in High School Grades

In the following lists the quarterly record for each student of Grades IX, X and XI is given. As will be noted, some of the marks are below the required pass mark. With a little more home study I believe that students can remedy this. Parents, of course, should see to it that the lessons receive more attention. What the teachers in all the grades need is the hearty co-operation of the parents. The three grade XI students who failed did not pass the Grade X provincials and have been given a trial in Grade XI. Several students, attained honors in certain subjects and have been marked thus (*). Lists of other grades will appear later.

B. C. SILVER, Principal.

Grade XI

Name	Latin	Chemistry	English	History	Mathematics	Algebra	Geometry	French	Aggregate	Average

HOW ABOUT THIS?

THE ACADIAN is departing from its customary rule in giving publicity to the following letter which has reached us without the writer's name. We do this because the letter contains a suggestion which if acted upon should receive attention at once, and which appears to us to be well worthy of attention. Read it for yourself and think it over.

To the Editor of THE ACADIAN:

Dear Sir:—In the eastern section of this town is a pond. A few winters ago, this pond was a fairly good skating place now, as far as skating is concerned, this pond is practically useless.

The reason can be easily stated in a few words, namely: the water in the pond does not remain at a constant level. This sentence means that: When a thaw of even a trifling amount of snow takes place, a fairly large quantity of water collects in the pond, and passes out almost immediately through the culvert placed there for that purpose. Ice forms in the remaining water. The water, however, is escaping through a sluice in the north eastern corner of the pond. The sluice was constructed some time ago for the purpose of completely draining the pond of water, in summer time. I think that it has never

been used for that purpose.

"The water in escaping leaves behind it a quantity of shell ice around the borders of the pond, and the water will continue to run out until only a few square feet of ice, that can be skated on, remain."

The remedy for this circumstance is obviously to close the sluice.

But, say some people, if the water be prevented from escaping through the sluice, the whole neighborhood will be inundated!

Not so. The water, when it has reached a certain height will rush out through the culvert. Thus will the water be kept at a constant level and a fairly large surface of ice will be the result of surely not more than fifteen minutes work in closing the sluice. Therefore I ask that the sluice be closed. If, however, the consequence of this act be contrary to what I expect, the sluice can be opened again.

To some people it may seem not quite sensible to do this, as there will be a rink on the school grounds, but I hasten to assure these people that there are more children who skate at school than the rink can hold with ease. Also many children who live near the pond would doubtless be just as pleased to skate on good ice near their homes as to skate on the school rink.

"INTERESTED"

Vote As You Pray

The following extracts from a paper read to the women of New Glasgow and Stellarton by Mrs. R. de Wolfe Archibald of this town, should be read by every one of our readers:

Never have I been so proud of the name Woman as since coming to your beautiful town, and mingling with the splendid females who bear that title.

It has been a great privilege to meet the intellectual workers, hear their words of enthusiastic explanation, concerning the burning topic of the day, namely: Politics.

May I be permitted to bring to you this message "Vote as you Pray!"

George Eliot said, in one of her books—"I want to make this world a cleaner place for my son to live in than it has been for me."

That has ever been the ideal of every true Mother of Sons. No great privilege comes to us, without great cost. Woman's Franchise is one of these privileges, and it has surely cost much.

We must now begin to value it, according to its cost, and use it for the cleansing and uplifting of the Political life of Canada.

No mother who has borne sons, and sent them out to lay down their lives for Canada's freedom can ever think lightly of so-called Politics, nor consider the privilege of a vote as a joke.

There is only one platform for the Women of Canada today, and that is, the platform which Jesus Christ came to establish over a thousand years ago; the same one which Paul upheld before his accusers and Judges, and to which all the great men, who have lived since, have ascribed their testimony and that is, the platform of Righteousness, Temperance and Justice.

When we pray "Thy Kingdom Come" do we want that Kingdom for Canada? If so, then we must "Vote as we Pray!" The British Nation has no slaves. It gives every man and woman freedom of thought and speech.

We must however be intelligently instructed, as to the highest, and best use of this great privilege, else there is grave danger of our losing this freedom, for which so great a price has been paid, and our becoming slaves to the greed and avarice of those seeking positions of power in our nation today, who do not uphold the one and only platform that is safe for Canada, the one already mentioned of Righteousness, Temperance and Justice.

Many changes must be brought about ere Politics is safely landed upon this platform.

It is, I believe, Woman's privilege to assist in these great changes, in the modelling of our Nation after the Great Ideal.

Your vote is a factor; therefore I again commend you to "Vote as you Pray!"

APPLE STORAGE TROUBLES

Trouble with apples spoiling in common storage many times is traced to faulty construction of the storage house that can be overcome by slight changes or better management, the United States Department of Agriculture has found. The first consideration, it is said, is the condition of the fruit when it is stored. Apples that are bruised or diseased, too green or over-ripe, or that are of a variety known to keep but a short time cannot be stored satisfactorily.

But, even with the apples carefully selected, the fruit may not keep because of certain conditions in the storage house, particularly those relating to temperature. The storage house must be like a thermos bottle, keeping the heat out during the warm days and holding it during the very cold ones. This result can be obtained only if the building is properly ventilated and insulated. Insulation is effected by filling the hollow walls with ground cork, mineral wool, shavings, or other material that will keep the heat from passing through. So that there will be no leak, the doors are insulated the same as the walls, and there should be as few windows as possible.

Ventilation is provided by means of opening near the ground under the floor, for cool air to enter and air shafts leading upwards from the ceiling to carry off the warm air. These are kept open during the night or the cooler part of the day—in the fall—and are closed during the hot hours. The arrangement of the boxes in the storage house has much to do with proper ventilation. The best arrangement is one that permits the air to circulate around each separate box. This can be managed by leaving a space around each pile of boxes and by placing cleats between the boxes in the pile.—Canadian Horticulturist.

Two large British schooners arrived in port over the week end. The schooner "Cape Blomidon", 468 tons registry, Capt. E. F. Barkhouse, had 653 tons of fertilizer for R. E. Harris & Sons. The schooner "Peaceland", 261 tons registry, Capt. W. E. Wasson, had 394 tons of hard coal for A. M. Wheaton.

Two Judges Appointed

Kings Co. Boy Appointed Lunenburg Judge

It was announced in Halifax Wednesday and confirmed from Ottawa, that T. Sherman Rogers, K. C., had been appointed Justice of the Supreme Court of Nova Scotia, a vacancy caused by the resignation of Justice Arthur Drysdale, who resigned several weeks ago owing to ill health.

It was also announced that J. Willis Margeson had been appointed as Judge for District No. 2, Lunenburg.

T. Sherman Rogers, K. C., is connected with the law firm of Henry, Rogers, Harris and Stewart. He is a director of the Eastern Trust Company and other companies. Mr. Rogers was appointed chairman of the Halifax Relief Commission in 1918, following the disaster. He was born in Amherst in 1864. He was educated at Acadia College, where he got his B. A., and Dalhousie University. He read law with Sir Charles Townshend, was called to the Nova Scotia Bar in 1887 and created K. C. in 1904. For a number of years he was a lecturer in the Dalhousie Law School.

J. Willis Margeson, who is chairman of the Pension Board, is a native of Berwick, this county. He also was a student at Acadia University, and represented Lunenburg county in the Nova Scotia Legislature, enlisting for service early in the War.

CANNING NOTES

The community was shocked on Tuesday morning, 29th inst., to learn that Arthur M. Lockwood had passed away. Mr. Lockwood had complained for a few days only but on Monday his physician decided he could not live and his brother Dr. T. C. Lockwood, of Lockport, was sent for, arriving at the old home Wednesday noon.

Funeral will be held with Masonic honors in Methodist Church, Friday, at two o'clock, P. M.

A. M. Lockwood was the second son of the late C. E. Lockwood and was sixty-one years of age, unmarried, having his residence with his step-mother at the family home. He represented the Jas. Goldie Company for many years in this Province, retiring from the road some ten years ago and opening a flour mill in his native town, which was destroyed by fire last year, and beside entering into the civil life of the Town, serving on the Board of Water Commissioners and being interested in the ship building industry here.

His business and genial personality will be sadly missed.

On account of the severe northeast storm which was raging in Boston was the S. S. North Land did not sail for Yarmouth on Monday. It was however expected that she would make her regular trip yesterday.

What is thought to be the longest of all flagstaves is that which not long ago was sent from British Columbia to Great Britain as a gift from the Provincial Government. It has been set up in the famous Kew Botanical Gardens, a few miles from London. The tree from which this flagstaff was made was a perfect specimen of fir pine, and the staff itself, which is 216 feet in length, is without a flaw.

Doings At Acadia

A Science society of limited membership has recently been formed at Acadia. Two meetings have been held. Topics of interest are considered, before attending the subject before the meeting and a free discussion following. Frank Anthony is President.

At a recent meeting of the men of the college it was decided to organize an officer's training corps. Dr. Cutten it is understood has signified his approval of the project. A committee consisting of a member from each class was appointed to take the matter in hand, their first move being to get into communication with Col. Anderson of Halifax. From him they will get information as to the method of procedure in organization. The committee is as follows: Chairman, Harry Atkinson, of the Senior class; W. H. Peters; A. Clark; H. Mullins; and L. T. Pentz, the latter being the representative of the Engineers.

The Junior-Senior Ladies' debate was one of the best debates heard here. The question was, Resolved,—That the development of the St. Lawrence route for ocean going vessels from the "Great Lakes to the Atlantic Ocean would be to the advantage of Canada and the United States. The Seniors had the negative and won the debate. The teams for the classes were as follows: Seniors, Misses E. Warren, M. Brown, E. Colpitts; and for the Juniors, Misses Fitzpatrick, K. Bowlby, E. Davison. Judges were Drs. DeWolfe and Hill and Professor Ross.

At the monthly meeting of the faculty Ladies Club Tuesday evening at the home of Mrs. Thompson, Mrs. Thompson and Dr. Kellogg favored those present with a violin duet. Mrs. Kellogg accompanied. On Saturday evening last at the Pierian Society of the Acadia Ladies' Seminary, Miss Archibald's English students held a debate, the subject being "The Advantages of adopting Phonetic Spelling". The Seniors had the affirmative and the Juniors the Negative. Dr. DeWolfe and Dr. MacDonald, the judges, decided that the delivery of both teams was equally good, but the Juniors were awarded the honors in argumentation. Many of the arguments were very amusing and showed much originality. Miss Moir gave a most enjoyable violin solo.

RURAL DEANERY OF AVON MET AT WOLFVILLE

The rural deanery of Avon met in Wolfville Wednesday. Rev. F. M. Webster, of Brooklyn, delivered a very appropriate address, after which the chapter met at the rectory, the rural dean, Rev. Patterson Smith, presiding, and Rev. T. Cribb acting Secretary. The usual routine business being over dinner was served at the rectory, the clergy present being besides those already mentioned, Reverends R. F. Dixon, Rector of Horton; Clark, of Maitland; Brown, of Cornwallis, and Bent, of Kentville. Also Rev. W. H. Bullock, ex-army chaplain, and the oldest clergyman now in active service in the Diocese, being eighty-one years of age, and officiating at Hantsport. His participation in the proceedings was highly appreciated.

Our readers will be interested to know that the Nova Scotia apples exhibited at the Daily Mail Fruit Show, London, England, sold higher than those from any other province, by six shillings a box.

Canada's Crisis

What the Great English Labor Leader Thinks About It

To the Editor of THE ACADIAN:

Dear Sir:—As a reader of your valuable paper for over thirty years with no arrears against him may I ask that you will be good enough to copy the following letter from a man who holds a high position in the world of labor and whose opinion should be of good value, especially to working-men, at this time.

CANADIAN

The letter written from the steamer Empress of Britain while Mr. Wright was returning to England, follows:—

Empress of Britain, Oct. 4, 1921. Right Hon. Arthur Meighen.

My Dear Prime Minister.

"I went to Montreal for the purpose of attending your meeting, but failed to obtain admission in the Hall. I was greatly disappointed, but I was delighted after perusing your speech and desire to congratulate you on your firm and definite stand at this particular period when the World is passing through a stage of transition.

"The old political shibboleth must be scrapped and only by hard thinking and honest dealing are we capable to survive the terrible financial aftermath of this World War. I am convinced in my own mind that the policy for which you stand is the only practical solution at the moment to tide Canada through this crisis. Otherwise Canada will become a mere adjunct for the purpose of tumping the surplus commodities of the U. S. A. which means poverty and starvation for the industrial classes and a bitter experience for which you in Canada will have to pay an awful price.

"At this moment in Canada it is absolutely imperative to combine the forces of common sense and honesty and rally as a united force against the warring elements that will lead to chaos "politically" and land you on a lee shore among the wreckage of democratic fallacies that will not bear the test of time.

If the democracy is to survive and stand the test of time it must be based on science as well as sentiment. Anyhow it is all in the lap of the Gods at the moment, and I pray that your health will stand the terrible ordeal of this situation, and I feel persuaded that your honesty and the sense of sportsmanship you have displayed so far will be recognized by the Canadian people and eventually place you in the position of a great leader to make Canada take her place among the great nations of the world and our empire and become eventually the happiest place on your great continent.

"This is my wish and the sincere desire of one who loves Canada. I wish you God speed in your noble efforts for a United Canada.

"So Good-Bye.

"Yours Sincerely,

PETER WRIGHT."

To accommodate the voters in the western part of Ward 8, there will be a polling booth at Temperance Hall, Greenwich, on Election Day. All persons living west of the road from Wolfville to Gaspereau will poll their vote here, and all living east of this road will vote at Grand Pre.

His Excellency Lord Byng of Vimy, Governor-General of Canada, placing a wreath on Montreal's Cenotaph to the Unknown Soldier, Armistice Day, 1921. General Charles Armstrong, G.O.C. of Military District No. 4, in foreground.
