Wants Extension of Time-Toronto Makes Objection- Mr. Graham Leaves Matter to Committee-Will Get No Special Rights.

Ottawa, March 10 .- (Special) - The Niagara, St. Catharines & Toronto Railway bill was up again to-day before the way bill was up again to-day before the Railway Committee. It was talked out at the last meeting. What the company wants is an extension of time. The company was incorporated in 1899. The opposition to the bill came from the city of Toronto. The Council of Toronto wanted a clause inserted in the bill compelling the company, if it entered the city of Toronto, to build overhead bridges or go under the streets.

Mr. Macdonnell, Toronto, wanted the opinion of the Minister of Railways on the subject.

Mr. Macdonnell, Toronto, wanted the opinion of the Minister of Railways on the subject.

Mr. Royce, Toronto, was heard in behalf of the bill. He said that his company was willing to be bound by whatever agreement was reached with the Grand Trunk or Canadian Pacific in regard to crossings in Toronto.

Mr. Graham said that the road was being built for the accommodation of the people. The people wanted the road or it would not be built. There ought now to be some way of compelling the road which terminated at the city border to connect in the interests of the people. The only question was whether the committee should put the clause in the bill or leave it for the Railway Commission, which had power to deal with the matter. There was not the remotest chance of the commission granting any rights to this road which the other roads did not have.
