Clews' Report.

New York, June 13.—Recent developments have been of a generally favorable character. The week preceding a national convention, which expects to perform such important duties as nominating the next President and issuing a party platform, is not usually a period of much activity in the stock market. There has already been considerable unloading of long stocks by market leaders; but it may probably suit their purposes to carry prices still higher, and the results of the convention, if to their liking, could easily be used as a means of stimulating activity. The money market continues exceptionally easy, both at home and abroad; the diminishing activity in trade and speculation the world over being, of course, responsible for this condition. Gold exports have been checked and have fallen much below the aggregate at one time expected. The one feature of encouragement which now stands out more prominently than all others is the crop outlook. One satisfactory feature of the week was the reduction in the prices of iron and steel. The steel industry, however, is not the only one which appears to be in need of good judgment at this time. General business shows an improving tendency—Henry Clews.

To Clean Files.

Files clogged with tin or lead should be cleaned with strong nitric acid. For iron filings blue vitriol should be used first, then the file should be rinsed in water and dipped in nitric acid. Dip the file several times in nitric acid for copper or brass. Diluted sulphuric acid should be used to clean a file clogged with zinc. After cleansing, the files should be rinsed in water, thoroughly brushed and dried in sawdust or by burning alcohol on them.

Stocks and Bonds

New York, June 16.—Noon letter.—The early market developed considerable strength, with short covering. London buying and purchases by interest willing to discount chances on favorable Chicago nomination. Gossip from the convention city was reassuring in Republican plans. One bullish plank is that of favoring traffic agreements between railroads. It is estimated S. T. will earn 8.7 per cent. on common stock this fiscal year, as compared with 10.4 per cent. in 1907.

It is noted that Erie first preferred, despite recent adverse developments, still comes far above low prices reached early this year. The feeling is that in due course the company will be placed in a position favorable, backed as it is by Harriman and Morgan.

There is very little prospect for any material change in money. Money continues to flow here from the interior, partly because of security.—Ennis & Stoppani.

Gains outnumber losses in reports of commercial and industrial activity, business being remarkably well maintained considering the propinquity of political conventions, to which was contributed the dull security market. "Hay is unsalable," was the terse, if somewhat gloomy reply of a prominent local dealer in answer to a query as to the condition of the hay market.
