Several of the aldermen have expressed themselves as favoring such amendments as will give the council greater power and are practically certain that recommendations of this character would readily obtain a majority of the board.

To Entertain Footballers. An application from the Edmonton Football association for a grant towards the expense of entertaining the Cornishians, the famous English team that will visit Edmonton in the course of the next few weeks, occasioned some discussion.

Acting on the opinion of the city solicitor that it is questionable whether the council has power to make a grant of this character, Ald. Gowan urged refusal of the request.

Ald. Grindley, who was supported by Mayor Armstrong, declaring that it had been the practice here and in other cities to make such grants, contended that he could not see how the application should be made for it from the legislature, as the city could not afford to withhold inducements to visitors which were offered by all other cities.

Finally a compromise was effected by the appointment of a committee composed of Mayor Armstrong and Ald. Grindley with power to co-operate with the board of trade in the entertainment of the visitors.

Not to Limit Height of Buildings. The proposal to limit the height of buildings was the subject of a brief discussion. Alderman Grindley declared that the proposal was childish and worthy only of some backwoods community. There was no difficulty, he urged, in providing adequate fire protection in high buildings, as the provision of an auxiliary pumping plant to boost the water supply would meet this.

Some of the fellows thought it would be all milk and honey, and I guess are now, he joined, but the most of us like the life very well. We will go into serious training when we get back to London.

This spoke a young Albertan, a cadet in H. M. C. S. Rainbow to the Bulletin yesterday. Henry Houle Rainbow is proud of his naval appointment and is anxious to rejoin the Rainbow at Esquimaut. He was accompanied by another cadet, Bernard Brown, of Edmonton. These two lads are the representatives of Central Alberta in the Canadian navy.

Cadet Houle showed much interest in the European disturbance over Germany's intrusion in Morocco, and wanted to know just how Germany and France were now disposed towards each other. "Germany would be foolish to go to war with France just now for she has not nearly as strong a navy," remarked the embryonic admiral.

Cadets Hine and Brown are strong well-built lads who have passed with flying colors the examinations and tests required of applicants for cadet ships. On their return to Esquimaut they wore their cadet uniform, their naval caps and the "H. M. C. S. Rainbow" on their caps attracted considerable attention on the streets of Edmonton and Strathcona, but the lads, like hardy old salts, appeared quite unconcerned.

TO SEEK AMENDMENTS TO THE CITY CHARTER

Committee Appointed by Council to Deal With Question of Securing Amendments Desired by Strathcona Section of Amalgamation Committee.

(From Thursday's Daily.) At the adjourned meeting of the city council held yesterday a committee was appointed to consider the desirability of making amendments to the city charter. When viewed in relation to the declaration by Mayor Armstrong at the recent municipal meeting that the charter should be so amended as to give council greater control over the commissioners, the motion is significant of the possibility of far-reaching changes in the system of government established when Edmonton was incorporated as a city in 1904.

The appointment of a committee was suggested by the Strathcona section of the amalgamation committee. Without specifying desired amendments they declare the amendments are necessary before the charter can be adopted as that of the Greater Edmonton and ask that the matter receive careful consideration.

Mayor Armstrong stated that trouble had arisen in the course of the negotiations for amalgamation and that objection had been taken by the Strathcona delegation to certain provisions in the Edmonton charter.

"I don't blame them," said Ald. Grindley, "so you see he added, addressing himself to the mayor. "No," said Mayor Armstrong. "I think a committee should be appointed to look into the matter at once."

The committee was appointed accordingly and will be composed of those members of the council who are also members of the amalgamation committee, namely, Mayor Armstrong, Ald. Hyndman, Melnis, Lundy and City Solicitor Brown. Ald. Hyndman and Melnis are out of the city at present and it is therefore probable that the work will be done by Mayor Armstrong and Ald. Lundy.

NEW HANDBOOK IS OUT ON POULTRY KEEPING

Department of Agriculture Issues Valuable Information to Poultry Raisers of Alberta in Bulletin Prepared by A. W. Foley, Poultry Superintendent.

(From Monday's Daily.) Following its educational policy, the Alberta Department of Agriculture has issued a new handbook on "Practical Poultry Keeping." The book has been prepared by A. W. Foley, Poultry Superintendent, and is designated by the department, Poultry Bulletin No. 2, supplementing Poultry Bulletin No. 1, which was entitled "Advanced Methods of Poultry Farming." It is a book of 74 pages, profusely illustrated, and should prove an invaluable handbook to poultry raisers of the province.

In the preparation of the book, much of the information that appeared in "Advanced Methods of Poultry Farming" has been used. New features of the industry have been taken up and the information presented should be of service to the poultry raiser of the province whether undertaking poultry raising commercially, for exhibition purposes, or as a pastime.

The subjects treated in the book are as follows: Poultry Industry, Poultry Houses and Fences, Commercial Poultry Plants, Establishing and Developing a Flock, Strain Building for Egg Production, Hatching, Rearing and Rearing, Fattening, Killing and Marketing, Winter Egg Production, Poultry for Exhibition, Diseases and Parasites.

In showing the big opportunities presented to the poultry raiser in Alberta, the handbook notes the interesting fact that in 1909 the importation of poultry products to Alberta amounted to \$447,800, which was an increase in 1910 by more than half a million dollars. It is estimated that the Canadian has laid 125,000,000 dozen eggs in 1910. In the production of this amount the Alberta hen plays an insignificant part, and the same applies to the supply of dressed poultry.

Profits of Poultry Raising. On investigation at many points throughout the province, it was found that in some districts the farmers themselves are the largest purchasers of local poultry, and that the interest of the local stock raiser has increased in 1910 by more than half a million dollars.
