SOLIGNUM.

A Remarkable Test! Locally made by
Messrs. W. & G. RENDELL.

To test Solignum as a preservative for Wood against the attacks of Worms, we tried a piece of 2 x 4 Spruce, about two feet in length, by painting one-third with Solignum, leaving the balance clear wood, this we suspended by a wire through the centre, in the water about one foot from the bottom, immediately over a pile of stones the remains of a sunken wharf (which is the place where our Wharf Shores are eaten off first) for Three Months. On taking it up at the end of that time we found some half-dozen small holes only a very short distance in the clear part of the wood, which shows the liquid had penetrated through the whole piece and the worms had hardly begun boring before coming in contact with it.

Last year as a test of some brands of Copper Paint we had a similar piece of wood treated at both ends, leaving the centre third clear; this was in exactly the same place as the piece for the Solignum test for Three Months and Three Days, when taken up the painted ends were perfect but the centre was riddled with worm holes.

Both these pieces of wood are to be seen at our Office by those interested in the preservation of Wood.

Solignum is For Sale in 1 & 2 gallon tins in Newfoundland by W. & G. Rendell, Water St.; Ayre & Sons, Water St.; Bowring Bros., Water St.; Bishop, Sons & Co., Water Street; A. H. Murray, Water St.; C. F. Bennett & Co., Water Street; Royal Stores, Ltd., Water St.; Goodridge & Sons, Water St.

Are Your Eyes Weak?

How you may know when Glasses should first be used and those in use abandoned:

- 1st—If you are obliged to move small objects further from the eye in order to see distinctly.
- 2nd—If you find it necessary to place the light between the eyes and the object.
- 3rd—If, when considering a near object, it appears to have a kind of mist before it.
- 4th—If the letters of a book run together, or seem blurred or double.
- 5th—If the eyes are fatigued by close exercise, and you are obliged to relieve them by rubbing or closing them.
- 6th—If black spots appear before the eyes or seem floating around them.

If you observe any of the above signs of distress, it indicates that the "accommodating muscles" of the eyes are no longer able to alter the shape of the lens so as to focus rays of light coming from different distances. A contest with failing sight is hopeless and properly fitted glasses will relieve you.

We make no Charge for Examining the Eyes and we Guarantee Satisfaction.
