## Pumpmen and Engineers Return to Work.

Strike Settlement Negotiations Reopened...  
U. S. Senate Passes Tariff Bill... Fish  
Plant near Canso Destroyed by Fire.

### COAL STRIKERS RETURN TO WORK.

SYDNEY, N.S., Aug. 19.  
All pumpmen engineers and maintenance employees in the Cape Breton mines who stopped work midnight Monday, will return to work tonight and wage negotiations between the company and the strikers will be resumed Tuesday. These decisions were reached at a meeting of miners at Dominion No. 1 to-day and this evening.

### WAGE NEGOTIATIONS REOPENED.

SYDNEY, N.S., Aug. 20.  
All pumpmen, engineers and maintenance employees in the mines of South Cape Breton returned to work last night. It was in this district that the collieries had been falling victims to the inflowing water since the beginning of the Nova Scotia coal strike at midnight on Monday. Wage negotiations between the Dominion Coal Company and the strikers will be resumed Tuesday. These decisions were made at a meeting of the United Mine Workers at Dominion No. 1 on Saturday afternoon and evening. Two hundred delegates were present and there was only one vote against the decision. The pumpmen were sent back to work after Premier G. H. Murray and Hon. D. A. Cameron of the Nova Scotia government guaranteed wage negotiations with the company would be resumed on Tuesday, and after the understanding that the agreement would be binding only while negotiations continued. Premier Murray made the offer of the reopening of negotiations at a conference Friday night, and the miners then countered that they would put the pumpmen

back if the troops were withdrawn. Mayor D. D. Morrison, M.P.P. of Glouce Bay, himself a striker, appealed to Saturday's meeting not to "discover the stand he had taken at the last session of the Nova Scotia House of Assembly when he had opposed a Bill, which would make it a punishable offence for maintenance men to desert their posts in time of strike, using as his chief argument that it was the policy of the United Mine Workers to protect the mines after the actual coal producers had stopped work. The conference also decided to allow the freight handlers on the company owned Sydney and Louisburg railway to go back to work if the locality to which they belonged were willing. It was pointed out that the walking out of the freight handlers caused considerable expense to the people of the colliery towns.

### TARIFF BILL PASSES SENATE.

WASHINGTON, Aug. 20.  
The Administration Tariff Bill, officially known as "The Tariff Act of 1922" was passed yesterday by the Senate after four months' debate. It now goes to a conference. The vote was forty-seven to twenty-five.

### WILL NOW GO TO COMMITTEE.

WASHINGTON, Aug. 20.  
The House of Representatives will get the Tariff Bill back from the Senate tomorrow, just a year and a month after it first acted upon it. Republican leaders plan to send it to a conference under a special rule this week in an attempt to compose the two thousand and odd differences between the Senate and the House. The general expectation is the House will de-

cide on accepting the Senate's foreign valuation plan with the so-called flexible tariff provisions, under which the rates might be raised or lowered by the President to meet the changing economic conditions.

### A MISCREANT'S WORK.

CHICAGO, Aug. 20.  
Express train No. 39, New York to Chicago, was wrecked with a loss of two lives near Gaby, Indiana, early this morning, by the deliberate removal of twenty-seven spikes from one of the rails.

### FISH PLANT DESTROYED.

CANSO, N.S., Aug. 20.  
The fish plant of R. Pensbee & Co. at Half Island Cove, fourteen miles from here, was destroyed by fire when struck by lightning on Friday night. The loss is estimated at forty thousand dollars.

### The Magic Crystals.

WOMAN SCIENTIST AND THE BEETLE.

An astonishing claim, which appears to be supported by an amount of material proof, is made by Mrs. Maude Dickinson, a Brighton scientist. She states that she has discovered a certain minute "something," resembling in form the "self-created" scarab or beetle of ancient Egypt, whose properties are as marvellous as any that the Egyptians attributed to their chief amulet. It forms crystals outside and away from the bottle in which it is contained. If these crystals are placed in a sealed test tube and the tube is dipped in water, the water acquires inexplicable radio-active powers.

By means of its composite bodies are reduced to their elements. Flint becomes a fine powder. Pain is alleviated. Gold, it is even asserted, can be made.

All this sounds like a superstitious tale of long-past ages or the imagining of a medieval alchemist. Now comes the prosaic, common-place, matter-of-fact test.

The water is being used by the Brighton Corporation, with complete success to clear the hot-water pipes in their baths of an adamant-hard deposit.

### HOW THE DISCOVERY WAS MADE.

"I was experimenting with oils for the purpose of making perfume and scented soaps," said Mrs. Dickinson, "when I noticed on the paper at the top of the jar some small crystals, whose presence I could not understand. I took them to chemists in London, and on their suggestion I fused them, using an ordinary Bunsen burner.

"There was an alarming and unexpected explosion, which, happily, did no damage. When it was over I found this fine white crystal like a diamond, and also the particle of vegetable, which I have since found to be the scarab. It puzzled me altogether when I examined it under the microscope, because of the rays it was emitting, and I placed it in the bottle.

"When this bottle is laid in the sunlight the scarab throws off through the air and through the glass the minute crystals which I use. To-morrow, when we sweep, we shall find more where the bottle has been lying today."

Mrs. Dickinson places the crystals in small sealed test tubes, and it is from these that the radio active emanates.

### A GOOD THING. RUB IT IN

A tablespoonful of cup cake batter baked in a waffle iron makes an attractive little cake to serve with ice cream. Or put two together with chocolate icing and cover with the same.

After orange water ice has been frozen to a soft mush, add gradually two extra cupfuls of sugar and two stiffly beaten whites of eggs. Freeze solid and serve with a garnish of fresh mint.

Eat Mrs. Stewart's Home-Made Bread.—April 2nd.

## AFRAID TO LET WIFE BE ALONE

"My wife and I feel that we owe everlasting gratitude to Tanlac, for it has made her gain ten pounds and she now has better health than in years," said Clayton Zwicker, 2 Edwards St., Dartmouth, N.S., who works for the Maritime Telephone Co.

"My wife was in miserable health for seven years and although she tried many medicines she grew worse and I was afraid to leave her alone. She was so weak she could hardly walk across the room. Her appetite was very poor and no matter what she ventured to eat she nearly fainted from indigestion.

"Tanlac relieved her in a short time. She now has a splendid appetite and has regained her strength so she can do her housework again. We will praise Tanlac as long as we live. Tanlac is sold by all good druggists.

## The Week's Calendar.

- AUGUST—31st month—31 days.
- 21—MONDAY. Battle of Vimiera, 1808. Taking of Taku Forts, 1860. Battle of Bapaume, 1918.
  - 22—TUESDAY. Battle of the Standard, 1138. Battle of Bosworth, 1485. Warren Hastings died, 1818. Lord Salisbury died 1903. Battle of Chancellorsville, 1863.
  - 23—WEDNESDAY. Sir William Wallace executed, 1305. Treaty of Prague, 1866. Japan entered war, 1914. Le Cateau, 1914.
  - 24—THURSDAY. St. Bartholomew A. and M. Corner stone Masonic Temple laid, 1814. Battle of Mons, 1914. Wreck of dirigible R-38, 1931.
  - 25—FRIDAY. Mount Gabriel Orphanage formally opened, 1888. British reinforcements landed at Archangel, 1918.
  - 26—SATURDAY. Battle of Crecy, 1346. First Treaty with Japan, 1858. Sack of Louvain, 1914. Togoland captured by Allies, 1914.
  - 27—SUNDAY. 11th after Trinity. Capture of Algiers, 1816. General Botha died, 1919.

## Docking a Ship.

She was late, and the night was falling when the pilot-boat thrust down Southampton Water. Night, a driving rain and a force six wind—with the 52,000-ton Berengaria at sea, in a bare thousand feet of water, and to edge into the Cunard side of the Ocean Dock. A pretty prospect for the pilot.

We had glimpses of her through the squalls, swung down in the Solent, turning and twisting between the Brambles and Calshot Spit. Then, almost before we knew it, she was on us. We edged up to her, rubbing affectionately along her great side as a puppy rubs against your ankles. The pilot grasped the Jacob's ladder and jumped for it—and we were away again up the wharf, changing ahead of her to our place among the four other tugs that were to pull and push her into dock. They lay to on either side of the 600-foot channel, ranged like a guard of honor. She came up with them, and in a scurry of churned water they closed on her.

The great air lamps gleamed red-dish-purple against theinky sky above the dock as we edged and edged her into it.

We were in the lee of her, so that nothing but the wrack of brown smoke torn from her high funnel tops by the swooping wind told of the pressure that was keeping her away from the quay-side. Two tugs could not overcome it. A steady tug slipped, up astern, bumped her broad, rope-fendered bow against the towering flank, and pushed.

A fourth, the tow rope slipped, panted down the dock, turned on her heel, butted into place—and pushed. There was 5,200 horse-power behind that combined push. The big ship moved inward. Not by inches, but by sixteenths of inches we pushed her in. The outraged wind howled in her rigging and ore great clouds of evil-smelling smoke from her funnels. The water in the dock was churned to sandy cream as our propellers thrashed and thrust. Thirty-five minutes later long we pushed. Then out of the darkness above came a megaphone voice, "All secure."

The tugs curtseyed away from her side. A humorist skipper cheeped a curt "Pip, pip," with his stent. The Berengaria was home.—Er.

## "Father of the Navy."

(From an Exchange.)

Some years ago, towards the end of Lord Fisher's term of office as first sea lord, a new class of destroyer was designed, the "M" class, many of which were named after the lesser-known of our naval worthies. Alongside the name of Myrnes, commemorating valiant Sir Christopher, was that of Moresby—and it was a name which few outside the navy had ever heard. It was a tribute paid by Lord Fisher to a life-long friend, a man after his own heart, John Moresby, "Father of the Navy."

Admiral Moresby was born in 1830, the son of the late Sir Fairfax Moresby. His naval record included service in the Baltic Fleet under Sir Charles Napier in the Russian war of 1854-5, for which he was awarded the medal; in China, 1861, including the attack on the Pelho forts; and in Japan, 1864. He was senior-officer at Bermuda in 1879-81, and retired in 1888, becoming admiral in 1893.

Moresby, however, was more in the line of James Cook, Franklin, Nares and Goodenough, than of the great fighting seamen, and it is as an explorer that his name will endure. His explorations were carried out in Australasian waters and he added to the known world no fewer than twenty-five large inhabited islands and more than 100 smaller ones. In all, he explored over 600 miles of previously unknown coastline in New Guinea and the neighborhood, and discovered the largest harbor in that island, which now bears his name—Port Moresby. These and other matters are recorded in his books, "Discoveries and Surveys in New Guinea," "A Cruise in Polynesia and Visits to the Pearl-Shelling Stations in the Torres Straits" and "Two Admirals."

## New Mown Hay!

You love the country atmosphere when the glorious perfume of the newly mown hay is wafted over the air—there does not seem to be anything so refreshing, so natural.

Have you tried Hudnut's Three Flowers Perfume?

That too, is delightful and fragrant, giving out a natural flower garden fragrance. If you like good perfume, you will love the charming three flowers odor.

In face Power, vanishing creams, Perfume, toilet waters and talcum powder you can obtain the delightful three flowers odor. Ask to see Hudnut's toilet goods at Drug Stores and Toilet counters.

An excellent stuffing for green peppers is made as follows: Mix together 3 cups of boiled rice, 1 cup of chopped walnut meats, a little finely chopped pepper and celery and 2 tablespoons of catsup.

A delicious frosting for chocolate cake is made by melting together two squares chocolate, butter size of a walnut, and adding a little hot milk and confectioners' sugar until of right consistency to spread. Add vanilla to taste.

An excellent cement for mending tinware is made by mixing litharge and glycerin to consistency of putty. The mented article must not be used until cement has had time to dry, which may be more than a week. The litharge may be purchased at drug stores.

## Cameras, Roll films & Equipment.

Everything either Amateurs or advanced Photographers can possibly require may be immediately purchased at the Kodak Store. Cameras of all grades, Roll Films of all sizes and all the equipment for perfect "snapshot" work are always in stock. Don't let summer pass without some Camera records of the happy days as they go by, and get your requirements from us.
