Friday and Saturday 12c. packet

In the Realms of Sport.

TO-NIGHT'S NIGHT.

The most successful season of football that the League has ever known will come to a close this evening when the B.I.S. will play off with the Cadets. Neither team lost a game for the season and each had two draws. This is the third successive year, that the Irishmen have reached the top of the ladder, and apart from everything else it is certainly going to be hard luck if now that the cup which for nearly twenty years has been handed back and forth between the Clubs, is snatched from them at the last moment. However, real sport demands that their opponents shall do their best to wrest the honors from them, and it can be safely left to Capt. Galway and his team of Cadets to do their utmost. In order to assure the game being completed before darkness sets in the match will start at 8.15 sharp. The probable lineups will be—

B.I.S.—Goal, J. Phelan; backs, Doc. Power, J. G. Higgins; halves, F. Brian S. Constantine, Doc. Fox; forwards, R. Halley, G. Halley, E. Phelan, H. Phelan, F. Phelan.

C.C.C.—Goal, Clare; backs, E. Kavanaugh, A. Galway; halves, Morris, M. Madigan, T. Christopher; forwards, W. Cull, M. Flynn, R. Meany, J. Canning, R. O'Toole.

MR. TRAPNELL EXPLAINS.

Sporting Editor Telegram
Dear Sir—I would be grateful if you would publish in your column reasons for my being away from the sports on Wednesday, as people may possibly think I had cold feet. My little boy was taken to hospital that day suffering from Typhoid Fever, and naturally it was impossible for me to leave home. I would certainly love to have been there, as I see the jump was won by left. Sins, while my jump the previous week was 14 ft. Sins, so there may have been a chance at me carrying off the A.A.A. Title. Thanking you in anticipation, I am, Yours very truly,
K. S. TRAPNELL.

LAST NIGHT'S GAME.

A heroic fight was made last night by the Highlanders in their game against the Felidians, but it was all to no avail for the blue-and-blues hung up a score of 2 to 0 on them. The Kitties had several had several good chances but failed to avail of them. This was the final game of the regular League fixtures. The Felidians make third place in the standing of the Clubs. The B. I. S. head the scoring list by 21 goals and have had the least number scored against them, though the C.L.B. and C.E.I. both occupy the cellar, still they have good strong young material, which, when developed a little more, should produce a championship. Following is the table of what the various Clubs did this year:

Team	P.	W.	L.	D.	F.A.	Points
B.I.S.	8	0	0	2	21	34
Cadets	8	0	0	2	20	14
Felidians	8	0	2	0	20	12
Saints	8	5	2	1	13	11
Guards	8	5	2	0	16	7
Star	8	3	4	1	10	6
N. H.	8	3	2	0	5	16
C.L.B.	8	1	7	0	11	29
C.E.I.	8	1	7	0	8	29

CUBS CHAMPIONS.

Claude Hall and his Cubs have annexed the baseball championship for this year. It was originally decided to play three rounds, but due to the lateness of the season and the fact that no available playing dates are open, the League has decided to award it on the result of the first two rounds. They will therefore be presented with the new Allen Championship trophy. The Lions and B.I.S. are tied for second place with the Wanderers bringing up the rear.

SOME SPEED!

By the way, did you notice that in the Championship Meet on Wednesday, Phelan ran the 200 yards at the same speed as he did the 100, and further, that he was only 4 of a second short of Geo. Knight's record of 24 seconds for that distance.

NO REPRESENTATION THIS YEAR

Mr. W. J. Higgins, Chairman of the National Sports Committee, received a wire yesterday from the Wanderers Club asking if it was the intention this year of having Newfoundland represented at the Maritime Championships. Owing to the fact that the N.S.C. were in debt after last year's work, and also the fact that there is too little time to properly organize a track team, it was decided that our athletes should forego an outside visit this season. In the meantime the receipts from last week's meet will form the nucleus of a fund to be accumulated with the idea of possibly having Newfoundland represented in the World's Olympic Games in 1924. This is certainly a wise resolve and will be an incentive for athletes to keep in trim and thus receive a tangible reward for their efforts.

Sachem in Port.

The Furness liner Sachem, Captain S. Furness, 7 1/2 days from Liverpool, arrived here at 2 o'clock this morning. The ship experienced strong westerly gales during the greater part of the passage, otherwise a record trip would have been made. The Sachem brought a part freight and the following passengers: Miss A. B. Atkinson, Miss A. Astbury, Hon. R. K. Bishop, Mrs. A. O. Cherrington, Mrs. E. Colley, L. C. Colley, Mrs. B. Crocker, R. C. Dal-las, J. E. Dempster, Rev. Bro. P. M. Eagan, Miss L. M. Elwin-Nash, Miss N. Forward, C. George, E. M. Green, George H. Hall, S. T. Harrington, Miss F. B. Harvey, Rev. P. Hettisach, Mrs. Hettisach, J. C. Hogg, Mrs. Hogg, Eng. Comdr. R. A. Howley, R.N., Mrs. Howley, Miss P. M. Howley, Master J. D. Howley, Master R. D. Howley, Infant, Miss M. E. Joyce, F. J. King, J. S. Lethbridge, D. Martin, J. M. Martin, Mrs. M. McIntosh, Miss J. McIntosh, Master A. McIntosh, H. R. Nowworthy, Mrs. Nowworthy, Miss M. Nowworthy, Master H. Nowworthy, Miss P. Nowworthy, Rev. Bro. W. K. O'Connell, J. W. Penney, M. J. Penney, Miss R. Roll, Hon. J. D. and Mrs. Ryan, Miss M. Ryan, Miss M. Seymour, Rev. R. C. White, J. O. Williams, A. J. R. Withers.

A Tie That Has Lived.

"H.P." as you know, stands for "horse-power," and it, therefore, your motor cycle is a 4 1/2 h.p. one, you know that what is meant is that the engine has a power which is equivalent to that of four and a half horses. Not so! You would be incorrect to the extent of no less than 49,500 lbs! The h.p. unit of power is a fraud, and the late Mr. James Watt, of engine fame is responsible. He was a very careful engineer, in theory and practice, and he discovered, by many experiments, that the raising of 22,000 lbs. one foot per minute was a good average horse-power. But "horse-power," to-day, is reckoned at 33,000 lbs. per foot per minute—11,000 lbs. in excess! That is due to the fact that Watt, in his anxiety to encourage business, offered to sell engines which would develop 35,000 lbs. per foot as a horse-power—a third more than the actual!

It would seem that he meant ultimately, to be honest, but he died before that happened, and so bequeathed to the world, which has accepted it, a false unit measurement of horse power. Engineers, of course, know of the error, and make due allowance for it; but the average individual does not. Your 10 h.p. car is, therefore, in fact, but a 6 2/3 one, and its power is equal to raising 222,000 lbs. a foot in a minute, and not 333,000.

Queer Fish.

THEY CAN CLIMB TREES AND BLOW THEMSELVES UP.

The angler, or fishing-frog, with its mouth almost as wide as its body is long, is one of the very queerest of fishes. On its back it has a number of thread-like appendages which other fish think are the small organisms which form their own food.

Before they have discovered their mistake they have fallen a prey to the frog, which does not miss much, with such a capacious mouth. Its appetite, too, is enormous; for in the stomach of one as many as 75 herrings were found.

The sea-horse of Australia lives among seaweeds, being camouflaged by a floating fringe resembling the weeds, which enables it to lure its prey close enough to be captured.

Fish that Travel Overland.

Another instance of camouflage on the side of obtaining food is that of a prawn and a small fish which lives inside the mouth of a gigantic anemone. They are both white, with red lines, and these colors act as a snare to numerous small creatures which the anemone kills, and all three have a share in the spoils.

There is a curious family of fish to which the climbing perch belongs. They are constantly in and out of the water, and often travel overland. In the rainy season they pass from stream, and from pool to pool. When the hot weather comes they bury themselves in the mud, from which they emit a gurgling sound. If put in an aquarium they will escape if they are not covered in.

Five Days out of Water.

The callichthys, found in the rivers of tropical America and the estuaries, cannot live for more than a quarter of an hour under water, and have to rise to the surface to breathe. It has been known to live for five days entirely out of water.

The perichthys, common on the shores of Indian and Australian shores, frequent rocks of mangrove trees. When at rest it lies with its body out of the water, the tail only being immersed, and it goes ashore in search of food.

The many quite commonly leaves the water, apparently liking plenty of air to breathe.

Pilchard's Wonderful Smell. In South African waters swims a fish something like a eel, and rejoicing the name of billy-blow-up. This is derived from its practice of putting itself out when caught. Another of its peculiarities is that of being poisonous.

Pilchard's—come back to our own fish—have a wonderful sense of smell and can detect a favourite food, consisting of the spores of olive seaweed, fully twenty or thirty miles away, especially after spawning when they are thin and ravenous.

It is a curious fact that, if food is abundant, the fish appear in shoals, but when it is not particularly plentiful, they do not arrive in such great numbers, as if some instinct told them just how far supplies would go round.

Kyle's Passengers.

The following passengers arrived at Port aux Basques on S.S. Kyle due here to-morrow afternoon: Mrs. M. McCaskell, Miss M. Lucas, Miss L. Snelgrove, T. J. Doyle, S. M. Lagasse, H. J. Newby, D. Sullivan, F. Carville, Miss M. Payne, P. and Mrs. Mulcahy, J. Sanson, Miss S. Simms, Mrs. S. Vatcher, W. Ray, J. F. Leitch, Rev. Fr. O'Reilly, R. and Mrs. Cobb.
