Wedding Bells.

WYATT-SLANEY.
Last night at the Nuns' Chapel Presentation Convent, the wedding of Mr. Walter Wyatt (engineer s.s. Portia), to Miss Jennie Slaney, youngest daughter of Mr. Peter and Mrs. Slaney, St. Lawrence, was solemnized by Rev. Fr. Kennedy. The bride looked pretty in a dress of white satin, with hat to match and a bouquet of white carnations; she was attended by Miss M. McNamara, who wore a beautiful periwinkle blue canon crepe dress, with hat to match, and bouquet of carnations. The duties of best man were performed by Mr. Jno. Bell, our famous athlete. After the ceremony the party moved to the residence of the bride's sister, Mrs. M. P. Murphy's, Pennywell Road, where supper was served and the usual felicitation observed.

Selling Our Neighbours Our Forests.

(Saturday Night.)
A well known United States trade publication expresses itself as being greatly worried over the prospect of having the Canadian Government place an embargo on the export of pulp wood to that country; while in the same publication, on another page, there is a call for the people of the United States to preserve what is left of their depleted forests.

"When we think," says one of the articles, "that at one time white pine forests covered the country in an almost continuous belt from Maine to Minnesota, and now it is possible to go into the lumber markets of our large cities and buy mahogany from Madagascar cheaper than we can buy first-class white pine lumber, we realize that we are facing some very definite forest problems."

"Pulpwood for the manufacture of pulp and paper, which a few years ago cost from \$4 to \$6 per cord is today costing from \$14 to \$20 per cord."

In still another article in the same publication we are informed that "for many years the pulp and paper mills of northern New York, New England and the Lake States have purchased from 25 to 100 per cent. of their annual pulp wood requirements from the freehold lands of Canada. Many of our mills have become so dependent on Canadian pulpwood that an embargo would not only cause extreme hardship, but might even cause them to cease manufacture."

Of course we will all feel sorry for these United States manufacturers; but there is a way out, they can move to Canada; and continue to enjoy the prospect of living off of our forests. On the other hand are we to leave the bars down until our forest areas are in the same plight as those of the United States?

It is a nice question as to whether or not Canadians should feel obliged to sacrifice their heritage in order to supply United States paper mills with their raw product. Many of our public men have been giving thought as to how we may best increase our population. For instance how can a greater number of people be profitably employed? Are we wasteful of this opportunity when we send over our borders raw materials in place of the finished article? It would appear so. In all fairness it would seem that we should at least reap the full benefit of our own devastation by employing our own labor in the work. The mills producing paper in Canada are a real asset to the country, but a paper mill located here will say at Glens Falls, New York, and utilizing Canadian spruce in its mills one might consider rather as a liability from our point of view.

The threat has been made in the United States that if we cut out the export of raw timber for paper making purposes that country might retaliate by cutting off our anthracite coal and our sulphur. Well, it is quite possible to obtain sulphur in all desired quantities in Europe, and as for an anthracite coal embargo, it would unquestionably be a blessing in disguise. We will be obliged sooner or later to find a substitute, or substitutes for this expensive fuel. If this is going to be necessary in a few years, why not start now? The time seems opportune.

The Five Mile Bicycle Race at Guards Sports to-morrow will be keenly contested and in itself will be well worth the admission.—aug21.1

A vegetarian had an amusing experience the other morning at breakfast. His family were out of town, and he went to a restaurant, and took a seat next to a stranger. The vegetarian took occasion to advertise his creed by telling the stranger that all meat was injurious, and that the human diet should be strictly vegetarian.

"But," replied the stranger, "I seldom eat meat."

"You just ordered eggs," said the vegetarian. "An egg is practically meat, because it eventually becomes a bird."

"The kind of eggs I eat never become birds," answered the stranger quietly.

"Good gracious," cried the vegetarian, "what kind of eggs do you eat?"

"Principally boiled eggs, sir."

KNOWLING'S GREAT MID-SUMMER SALE

WOMEN'S BOOTS and SHOES

Prices Slashed Regardless of Cost.

Ranging in Price from

98 cts. to 3.95

Values from 5.00 to 12.00
