55-61 KING STREET EAST, TORONTO.

## MCCURDY TO FLY HERE

Other Noted Aviators Also to Participate in Meet.

If everything pans out according to the expectations of the promoters and a suitable field, within easy reach, can be obtained, Toronto will have an aviation meet in the middle of August, that will equal all attempts in the flying line in Canada, at least. A representative of the McCurdy-Willard Aeroplane Co. of New York is in the city looking up a suitable flying ground, which he said he will find with easy reach of a five-cent car line.

It is the intention of the promoters to bring eight aviators of note here, and six have already been signed up. The two best known of the group are flying men are J. A. D. McCurdy, the Canadian, who flew from Key West to Havana, and also was the first to send out and back wireless messages in flight, and Charles P. Willard, the oldest aviator in America, who flew his machine in public while the Wrights were still keeping their invention in the dark.

McCurdy will bring with him a new machine, called a baby racer, a biplane including the improvements of all types, with a 40-horse motor, and in competition with the other aviators, some records will surely fall away. Night flying with searchlights will also be tried out.

The meet will be made popular by leading the prices down to the 50-cent level.

## HIS ANCESTRY DOESN'T HELP

George Everett, Descendant of Military Hero, in Dire Need.

George A. Everett of St. Catharines has fallen upon evil days. He is a grandson of General Stephenson who was beside General Brock when that great soldier was shot on the banks of Niagara. His great-grandfather, Admiral Stephenson, who served the mother country with distinction, but last night, homeless and penniless, was taken in at the Court-street police station where he applied for a night's lodging.

He is 76 years of age, and says that he came to the city on Wednesday to find Mr. Wallace Nesbitt, to start an action to recover his little property in St. Catharines, which he says he has lost. He says he gave to his nephew on the understanding that he should be kept for the few remaining years of his life, but that as soon as the nephew was made, he was turned into the street, the nephew even refusing to buy him clothing. Mr. Nesbitt is out of the city and the old man is waiting for his return before going to Hamilton, where he has a daughter.

## WAREHOUSE

To let or for sale. Suitable for any wholesale business in centre of city. Excellent office, electric elevator, steam heating, two fireproof vaults, weighing scales. A bargain. 15 HUGHSON ST. HAMILTON. ED-7

## Dr. Luxmoore Coming.

Dr. C. M. Luxmoore, D.Sc., of London, Eng., is on his way to Toronto to deliver a series of lectures in Broadway and Salem Halls. On Wednesday, July 19, he will speak in Broadway Hall on "The Story of the English Bible." On Thursday, he will speak in the same auditorium on "The Veracity of the Holy Scriptures," and on Friday, he will deliver his subject, "The Testimony of the Holy Scriptures to the Resurrection of Jesus Christ." On Monday evening Dr. Luxmoore will deliver his closing address in Broadway Hall on "The Modern Theology and its Doom."

## Harper, Customs Broker, McKinnon Building, 10 Jordan St., Toronto. ED

## Sleeper Was Real Peevish.

Sam Patterson paid \$20 and costs in police court yesterday morning to avoid a jail term when he was charged with sleeping on the Den flats, because he had thrown a brick or a piece of one thru a window of St. James' Cathedral, when awakened while sleeping on a bench in the yard of that edifice Saturday.

## Use Gibbons' Toothache Gum.

Price 10 Cents. 246

# THE WEATHER

# PUBLIC AMUSEMENTS

## At the Princess

### "Camille."

There is a perennial appeal in "Camille," as there is in the story of every woman who loves and who is faithful unto death.

The performance of Dumas' masterpiece at the Princess last night was marked with such fine artistic instinct and such genuine dramatic feeling that the large audience were moved as but rarely even in this emotional medium.

Miss Adelaide Kelm naturally occupied the greater share of attention, but Arthur Byron was no whit behind in the earnestness and intensity of portrayal of Armand Duvall.

At the close of the second act, his outburst—"My life, your honor depends upon your answer brought down the curtain with a storm of applause and four recalls followed.

The third act with a piece of stagey writing, which might well have been omitted, but which was so well handled by the artist, that it was a splendid scene.

Miss Kelm, indeed, had the opportunity of giving a speech, "My dear friends," she said, "I thank you all from my heart and soul for your appreciation of my play."

She then said, "I am going away from you. But I hope some day to come back and be with you again."

Her public sense came to the city, and she demonstrated her ability to depict the most powerful characters.

Readings with a depth and naturalness in a young actress augurs a brilliant future. Miss Kelm's "Camille" is not the tiger-like creature that Bernhardt made so familiar with 50 years ago.

A clever, but a loving and gentle woman, she is a study in the art of the actress. There was exquisite pathos in the passionate appeal to Armand when she spoke of the mother.

It was a study of the heart through the scenes with Armand's father, which was a study in the art of the actress. It was a study of the heart through the scenes with Armand's father, which was a study in the art of the actress.

# OLD FRIEND HUMIDITY

## IS POKING UP RIP

Continued From Page 1.

rainfall, however, was not quite so heavy as in Toronto, although the ob- servatory officials have not yet been able to judge accurately as to the extent and severity of the showers in different localities.

The mercury stood at a high figure in many cities yesterday, 86 degrees being reached at London and 92 at Ottawa.

Ontario is unfortunately situated just at present as regards air currents, and that is why this poor old province has been put thru such a gruelling display of torrid temperatures.

The cause of the Heat. Hanging over the South Atlantic coast for some weeks there has been a warm belt of high-pressure air, which has been seeking a means of escape to the westward.

There happens to be a vast area of low pressure atmosphere in the Hud- son Bay district and towards the hap- py place the hot winds of the high- pressure zone forced themselves auto- matically.

Toronto, unluckily, was in the path of the oncoming breeze, and on account of it. Southwest winds all over the province for the past few days have been blowing from the west.

They are coming directly from the heated area of the Atlantic coast. It takes a long time for this sort of high pressure to move westward, and un- fortunately, it will take some consid- erable time before we again get rid of its menialities.

Evidence of the terribly hot weather are many and varied. Yesterday the mail-carriers were allowed to go their rounds without coats, and this is some- what of a new phenomenon. Men again have been seen with their shirts open to the chest, and the farmers have been seen to much of the strawberry and other fruit crops.

Farmers in the different districts around Toronto report that their crops are suffering greatly from the hot weather and the scarcity of rain. All the grain and root crops that were planted late will hardly be able to mature, and the farmers ex- pect their harvests to be all in the barn this month, which means that the grain has been sown, ripened and harvested in less than a year.

Leaves Were Withered. Even the evidences of the severity of the sun's rays being shown in rather peculiar fashion. One instance was noticed yesterday on the Royal Alexandra last night, one that summer season so long a legend has been foredoomed to failure. De- spite the continued rain, the leaves of the trees have withered and the fact that it was summer instead of fall.

The hot weather has been unpleasant, yes, very much so, but still it has given opportunities for the observance of many interesting phenomena.
