

In the Spring of  
and T. Kennard The  
foundation of the En  
With Professor Galbr  
the Society has had a  
of which may be se  
inaugural years. Be  
200. Meetings are  
academical year, at w  
importance are read  
with discussions of q  
opportunities to each  
the results of his c  
engineering interest.

While at the same  
of the undergraduate  
this end papers read  
and distributed.

The papers in th  
students, and have  
originality and perso  
this seems like putti  
during the session ha  
course and can ill aff  
than by compilation,  
is worth more to the  
be original and supp  
istic fixes the standar

Special attention  
Duff, B.A., graduates

The general com  
work, will add their c  
papers closely bearing  
source of interest b  
practical and the theo
