Fortified Tires

## Fortified Tires

That Protect In 5 Ways Against Trouble

Fine rubber, staunch fabric and good workmanship are not enough to protect a tire from trouble. Many makes besides Goodyears have those things. But Goodyear Tires alone are fortified in five costly ways against the worst attacks that a tire encounters.

So they have proved out best in countless tests when run with rival tires on opposite wheels.

For your own sake please note these five exclusive defenses—

**Fortified Against Rim-Cutting** by our Cut feature, that best combats rim-cuts. Millions of tires have proved that.

**Fortified Against Blowouts** by our "On-Cut" feature, that saves so many blowouts due, in rival tires, to wrinkled fabric.

**Fortified Against Loose Treads** by our Rivets, formed in each tire. They reduce loose tread 60 per cent.

**Fortified Against Insecurity** by our 126 piano wires, vulcanized in each tire base. They make the tire secure.

**Fortified Against Punctures and Skidding** by our All-Weather Tread, tough and double-thick. It gives you maximum tread wear. It minimizes punctures. And its sharp-edged grips are resistless.

And besides these five defenses, Goodyear Fortified Tires give you perfectly balanced construction.

In any make one often gets a lucky tire. It avoids mishap and misuse and makes a rare record.

But why trust to luck? Why not *always* buy the tire that averages best because it is built in the best way known to resist attacks?

Legions of tire users have learned these things in the past four years. And so this year we doubled the capacity of our factory at Bowmanville, Ont.

## Prices Reduced

As our output multiplied, reducing factory cost, our prices came down with it.

We gave our latest reduction Feb. 15th—in the face of the war tax on all our raw material.

Today Goodyear Tires are saving the user 37 per cent of prices that prevailed two years ago. So ask your dealer for our low price on the size you use.
