

A SUSPECT WAS HELD AT MIDWAY

HE WAS TAKEN FOR BANKER STENSLAND

Stranger Proved to Be Missing Man—Official Examiner's Report on Bank Irregularities

Spokane, Aug. 13.—A stranger, who was suspected of being Paul O. Stensland, the fugitive president of the failed Milwaukee Avenue State Bank of Chicago, and who was detained several hours at Midway, B. C., has been permitted to go his way.

The stranger, at Midway to-night stated that the man and young woman who accompanied him did not correspond to the description sent out by the Chicago police of Stensland, and the woman who is supposed to have accompanied him. The provincial officers concluded that a mistake had been made and decided to drop the matter.

The man under suspicion, who was accompanied by a young woman, arrived at Midway several days ago. E. P. Noe, manager of a bank at Midway, came to the conclusion that the man was Stensland and notified the provincial officers of his suspicions.

The stranger who gave the name of Montgomery says he was a mining man from Los Angeles. Following his experience with the officers Mr. Montgomery left Midway, going by stage into the mining regions.

Examiner's Report. Springfield, Ill., Aug. 13.—Bank Examiner Jones, in his report to the auditor of public accounts on the Milwaukee Avenue State Bank of Chicago, which was received by the auditor today, estimates that the total defalcations through the manipulation of the affairs of the bank by President Stensland to be \$1,000,000, and possibly more.

He says the closing of the bank was the consummation of a career the most remarkable in the history of banking. On his examination of November 1st, 1905, everything appeared to be prosperous and satisfactory, but it has since developed that in the figures were many questionable and forged notes, the exact amount of which nobody but the president can determine.

He is of the opinion that Mr. Atsberg, the chief clerk, Frank Kowalek, the assistant paying teller, who has since committed suicide; John Gillinski, the receiver, and Mr. Esdohr, the paying teller, and without doubt other employees of the bank, had guilty knowledge of many things that were not divulged by the directors to him.

Mr. Jones declares that Cashier Hering, in swearing to the statement of January 20th, 1906, perjured himself to the amount of \$184,839, and in the April statement to the amount of \$202,123. He declares that the executive committee of the bank never acted in any official capacity and that had they done so each member of the two committees would have found his forged note in the assets.

Cashier Hering, he says, denied forging the notes, and, failing to implicate President Stensland, gave him to understand that an Italian named Demario, employed in the bank, had forged the guilty party, and that Stensland had given him \$6,000. State Attorney Healy learns that Demario is now in Italy.

Mr. Jones finds that the Steel Ball obligations aggregate \$180,000, and that they will not pay 10 cents on the dollar. The P. O. Stensland paper aggregates \$145,000, according to United States examination, and the paper of the Milwaukee Avenue co-operative store and its ramifications \$76,000.

FORESTERS MEET.

District Convention of the A. O. F. Now Sitting in Nanaimo. Nanaimo, Aug. 20.—The thirty-third meeting of the District of Columbia A. O. F. opened in that city this morning. Delegates are present from every court in the province.

BURNED TO DEATH.

Children Set Fire to Hay Loft—One of Them Perishes in Conflagration. Weyburn, Saskatchewan, Aug. 20.—Two little sons of H. Loucks, a settler near here, while playing in the hay loft with matches a few days ago set fire to the building. The flames spread so rapidly that the escape of the younger was cut off and he was burned to death. Four horses were also consumed.

INCREASE IN THE FOREIGN TRADE

CANADA'S BUSINESS CONTINUES TO GROW

A Question of Freight Rates Fully Gone Into by the Railway Commissioners.

Ottawa, Aug. 20.—For the first month of the fiscal year 1906-7 Canada's foreign trade amounted to \$42,000,000, an increase of \$9,000,000 over the same month last year.

The imports for July were \$23,500,000, an increase of \$5,000,000. The exports amounted to \$18,250,000, an increase of \$4,000,000.

The board of the railway commissioners has decided against the complaint that the transcontinental rates from Eastern Canada should not exceed those from the Eastern States. The board finds that for the distance hauled and the character of the service performed the domestic rates are in themselves reasonable; that the lowest rates of the United States companies are due to the powerful competition of the Panama and the Cape Horn routes, which competition does not exist from Eastern Canada; that by competing with the United States carriers for a portion of this traffic the Canadian company enables itself to fill out its trans-continental trains and give Canadian shippers better service, and that the complaint of the American with the Canadian shipper will continue to exist whether the Canadian company does or does not bid for a share of this foreign traffic for transportation through Canada. This portion of the claim has, therefore, been dismissed.

CYCLONE SWEEP ALONG BOUNDARY

THROUGH THE VALLEY OF THE RAINY RIVER

Farmers' Buildings on Both Sides of Line Destroyed—Heavy Damage to Crops.

Kenora, Ont., Aug. 20.—Passengers who reached Kenora by the steamer Kenora report a very disastrous cyclone in the Rainy River valley on Wednesday night. Great damage was done to the American side of the river, the storm passing north between Stratton and Emo. The damage will run into thousands of dollars, and anyone in the path of the storm lost more or less heavily, according to the value of their buildings.

One of the first houses to go before the storm was that of Wm. Dodd on the American side, southwest of Boucherville. It was completely demolished.

The Occupants Saved. The occupants saved themselves by going to the cellar. Several other settlers on the American side also suffered.

On the Canadian side at Boucherville great damage was done to a number of houses. Mr. Hennessy's new house near Boucherville was twisted into all kinds of shapes, while his barn was greatly damaged also. All the crops and the haystacks in the course of the storm are completely demolished, and the unfortunate farmers will practically have nothing left for their season's work.

The path of the storm was about half a mile wide, and seemed to follow the river crossing and recrossing at points. Parts of Dodd's house were carried completely across the river. In some instances it did not leave one log above another and if it were not for the cellars one would never know where some of the houses stood. So far as heavy there were no fatalities, though a number of people received bad cuts and bruises.

THE PULP INDUSTRY.

Canadian Pacific Sulphite Company Is Making Steady Progress. With Work. Messrs. Sawyer and Yule, of London, who are shareholders in the Canadian Pacific Sulphite Pulp Company, Limited, have visited the tract of land acquired by the company from the Oriental Paper & Pulp Company, which had a lease of it from the provincial government, says the News-Advertiser.

They also inspected the water power, which will be developed in connection with the mill that will be erected. Mr. Sawyer, C. E., who is the chairman of the company, since his return from Swanton Bay, has expressed himself as quite satisfied that the prospects of success for the company are good. An engineer sent by Mr. Hardy, the well-known paper mill designer and architect, will leave Vancouver for Swanton Bay to take the necessary levels for making the final plans. The clearing and other preliminary work is well under way already, and the whole work will be pushed to completion as rapidly as possible. The location is convenient for transportation purposes, the steamers of the Union and C. P. R. companies calling there regularly.

There seems to be no doubt that the industry is being quietly laid for an important industry. From what we can learn it is being started on business lines by business people, who are putting their own money into the enterprise, as a legitimate business proposition. They have already expended a considerable sum in preliminary operations and have the capital necessary to carry the scheme to completion.

This is a matter of importance as a plant of the kind contemplated involves the outlay of a large sum. The directorate is a strong one and includes among its members Albert Reed, a very successful paper maker in England and the owner of a pulp mill in Eastern Canada. The company seems to have gone carefully into all the details of the scheme and is satisfied with the prospects. No time will now be lost in getting the machinery ready and shipped and the mill completed so that operations may be commenced as soon as possible.

It need scarcely be pointed out how important the success of this enterprise will be to the province. Let it be once shown that pulp can be manufactured profitably in British Columbia, other mills will be built and a new important addition made to the list of provincial industries. The company's progress will, therefore, be followed with interest, since the success of the enterprise will mean much for the development of large sections of the province.

RECENT DECISION OF RAILWAY COMMISSION

Judgment Given Against C. P. R. for Levying Additional Tolls on Eastern American Goods.

The boards of trade of Vancouver and New Westminster, B. C., with the Canadian Manufacturers' Association, have secured judgment from the railway commission in their complaint against the C. P. R. They alleged that the commission discriminated against goods from the American States in points in competition for trade with the inland regions.

The board orders that the additional toll of 5 cents a hundredweight on all traffic which originates in the eastern states of the American Union, which is now added and charged on freight on Eastern Canada and destined to the same B. C. points shall cease.

It is also ordered that the carload weight be the minimum for the freight as prescribed in the Canadian freight classification; also that the same allowance shall be made for lumber used in safeguarding freight as in other parts of Canada.

SUCCESSFUL VANCOUVERITE.

Former Resident of Terminal City Strikes It Rich in Tanana With His Partner. Late arrivals from the Tanana bring word of the good luck that has recently come to two well-known Dawsonites, Charles Frey and Hans Stark. The latter is an old Dominion miner with years of experience in the north, while Frey is formerly well-known as a musician and electrical expert in Vancouver. Last winter Stark secured an option on one above on Cleary at a price he considered very cheap, and Frey put up the money to buy it.

The ground was worked during the winter for all it was worth, and their cleanup in the spring ran a trifle over \$150,000. Frey has gone outside on a vacation, leaving Ben Davis to care for his business interests in Fairbanks. Stark is handling the claim and proposes to turn it upside down this winter. Under the circumstances Nelson will be represented with a good team of experienced men for such a new district as Kootenay. The team has drawn hard luck in having to play immediately upon their arrival so powerful a team as the Portland men, with whose carmen Nelson has recently tried conclusions unsuccessfully. If Nelson is defeated in this match it will lose all chance of the Driard cup, as the games after all, are not to be played on M. C. C. rules, but rather after the manner of the Waterloo cup. Still, outside the league matches there are several others to be played, and Nelson is sure to render a good account of himself. "Manager Starkey is very keen and desires it to be thoroughly understood that his men are to be strictly in training. This will be somewhat difficult

TOURNAMENT WEEK FOR CRICKETERS

THE INTERNATIONAL MATCHES HAVE BEGUN

Two Games Will Be Kept Going Simultaneously Each Day Throughout the Meet.

(From Monday's Daily.) Victoria's cricketers are all agog with excitement to-day. They have accomplished an undertaking which has occupied their attention and, in fact, been one of their consuming ambitions for several years past. In word the principal clubs of the Pacific northwest are gathered in Victoria to battle for the coast championship.

The tournament, which opened this morning, is being quietly laid for an important industry. From what we can learn it is being started on business lines by business people, who are putting their own money into the enterprise, as a legitimate business proposition. They have already expended a considerable sum in preliminary operations and have the capital necessary to carry the scheme to completion.

This is a matter of importance as a plant of the kind contemplated involves the outlay of a large sum. The directorate is a strong one and includes among its members Albert Reed, a very successful paper maker in England and the owner of a pulp mill in Eastern Canada. SUCCESSFUL VANCOUVERITE.

Former Resident of Terminal City Strikes It Rich in Tanana With His Partner. Late arrivals from the Tanana bring word of the good luck that has recently come to two well-known Dawsonites, Charles Frey and Hans Stark. The latter is an old Dominion miner with years of experience in the north, while Frey is formerly well-known as a musician and electrical expert in Vancouver. Last winter Stark secured an option on one above on Cleary at a price he considered very cheap, and Frey put up the money to buy it.

The ground was worked during the winter for all it was worth, and their cleanup in the spring ran a trifle over \$150,000. Frey has gone outside on a vacation, leaving Ben Davis to care for his business interests in Fairbanks. Stark is handling the claim and proposes to turn it upside down this winter. Under the circumstances Nelson will be represented with a good team of experienced men for such a new district as Kootenay. The team has drawn hard luck in having to play immediately upon their arrival so powerful a team as the Portland men, with whose carmen Nelson has recently tried conclusions unsuccessfully. If Nelson is defeated in this match it will lose all chance of the Driard cup, as the games after all, are not to be played on M. C. C. rules, but rather after the manner of the Waterloo cup. Still, outside the league matches there are several others to be played, and Nelson is sure to render a good account of himself. "Manager Starkey is very keen and desires it to be thoroughly understood that his men are to be strictly in training. This will be somewhat difficult

as their entertainers at Victoria have arranged for a fannal dance, and for sundry other banquets and festivities generally during the week. However, Fred Starkey may be relied upon to keep up the end of the Kootenays while at the coast, and will not fail to disseminate the latest and most up to date information as to the latest possibilities of the Kootenays, and especially its capital, Nelson.

It has been impossible to obtain the Seattle or New Westminster teams. The latter, as already stated, have not yet arrived, it being unnecessary for them to come over until to-day, their first match being scheduled to take place to-morrow. The names of the eleven will be published as soon as possible.

Following is the complete series: Monday, August 20th—At Jubilee hospital grounds, match "A," Washington Burrards, At Oak Bay park, match "B," Portland vs. Kootenays. Tuesday, August 21st—At Jubilee hospital grounds, match "C," New Westminster Victoria, At Oak Bay Park, Losers match "A" vs. Losers match "B." Wednesday, August 22nd—At Jubilee hospital grounds, match "D," Victoria vs. Losers match "A" vs. Losers match "B." Thursday, August 23rd—At Jubilee hospital grounds, final for the cup. Winners of match "D" vs. Winners of match "A." Saturday, August 25th—At Jubilee hospital grounds, winners of the Championship vs. a representative team from the remainder of the players present.

These games, it might be stated for the benefit of any who may wish to act as spectators, commence at 10.30 o'clock in the morning and finish at about 6.30 in the evening. The program, as outlined previously in these columns it is the intention of the management of the Victoria club to give the visitors a pleasant time while in the city. They have prepared a general program of entertainment, which includes three important functions, namely, an Arjion club concert at the Gorge to-night, a smoking concert in the parlors of the Driard hotel on Thursday, and a fannal dance on Friday evening at the A. O. U. W. hall. Those who have heard the Arjion club sing in the open air need not be told that they are well worth hearing. For this reason it is expected that, not only will the visitors be among the appreciative listeners, but that all music-loving Victorians will be in attendance. Special arrangements will be made by the E. C. Electric Railway Company to handle the crowds expected. That the smoking concert and the dance will prove enjoyable seems assured. For the former an appropriate program has been prepared, in which the best local and outside talent. The floor of the A. O. U. W. hall is in excellent condition, and one of the best local orchestras has been engaged to provide music for the occasion.

But these three entertainments are not the only steps that have been taken to entertain the cricketers. They will be given opportunities to see the city's scenic and other attractions by trolley and cartage excursions to different points are being arranged. Not everything possible is being done to give them a delightful time. Providing the meteorological conditions are favorable, the visitors should leave here with an exceedingly favorable impression of the hospitality of local cricketers, to say nothing of their ability as exponents of the pastime.

During the present week Victoria will be the centre of attraction for all interested in the grand old English pastime on the coast, whether he be a resident of a district north or south of the 49th parallel. While the international aspect of the contest adds considerably to its interest it makes little difference to the cricketers who are engaged on either side. The Canadian and American gathered together this morning and went through the formality of making each other's acquaintance, and the cordiality of all the greetings and cartage excursions to different points are being arranged. Not everything possible is being done to give them a delightful time. Providing the meteorological conditions are favorable, the visitors should leave here with an exceedingly favorable impression of the hospitality of local cricketers, to say nothing of their ability as exponents of the pastime.

SWIMMING RACES TO BE HELD AT GORGE

The Interesting Programme That Will Be Provided at Park on Saturday Next.

(From Monday's Daily.) On Saturday next there will be an interesting programme of swimming contests at the Gorge, which will go into history as one of the most pretentious exhibitions of the kind ever held in the city. The program is being planned by the Victoria District Football Association in conjunction with the well-known physical instructor of the city schools, has arranged for the event, and will personally superintend it; a guarantee which will generally be accepted that the races will be all that can be desired. The races will take place off the Gorge park, an arrangement that will provide for convenient transportation, and the programme will begin at 2 o'clock. F. W. Thomas, president of the association, will act as referee of all senior events. Mr. O'Sullivan, master; P. Austin, time keeper, and Messrs. J. C. Bridgman and H. Austin, judges. All are J. R. A. A. men, and capable beyond question of the duties devolving on them. George Jay will act as referee for the junior events, and the judges for these races will be A. R. Langley and H. J. Dunn. The latter gentlemen have acted as judges for several years, and will be able to bring a successful experience as well as a thorough proficiency in the art of swimming to their assistance.

In the preparation of the programme Mr. St. Clair has received valuable assistance, and he has every reason to expect that every contest will be well worth seeing. The programme is as follows: 1. Exhibition of swimming by girls, under 16 years. 2. Diving by boys from springboard, under 16 years. 3. Rescue practice by girls from platform, under 16 years. 4. Rescue practice by boys at 50 feet, under 16 years. 5. Emergency swimming by boys, 150 feet, under 16 years. 6. Emergency swimming by girls, 150 feet, under 16 years. 7. Emergency swimming by boys under 12 years. 8. Emergency swimming by girls under 12 years. 9. Royal Humane Society contest, under 17 years. 10. Diving. 11. Premier's medal, contest in life savers. 12. 100 yards swimming. 13. Greasy pole. 14. Final. Water polo.

With the exception of the Danube, all European rivers more than one thousand miles long are in Russia. It cannot yet speak of the prospects of soccer for the coming season. Men are not thinking about it as yet, but it is to be hoped that some club will step in and fill the breach caused by the garrison's absence, and it should welcome an efficient third club from either the 5th Regiment or James Bay. If Victoria West would join hands with Esquimalt, and the present team there might be an excellent team as a result—one which would make Victoria "hustle."

DISCUSSION OF LOCAL ATHLETICS

BY AN ENTHUSIASTIC VICTORIA SPORTSMAN

Lacrosse and Football in the Capital Subject of Article From W. W. Bolton's Pen.

(From Monday's Daily.) In response to an invitation from the Times to give a summary of the past lacrosse season and the future outlook, and to touch upon the prospects of the forthcoming winter, from the standpoint of Association football, W. W. Bolton, one of the most energetic and enthusiastic of local athletic organizers, has submitted the appended exceedingly interesting article: "I am glad that what I have affirmed constantly always be converted into a fact, as otherwise I might well be put down as an enthusiast without proper foundation. Employers have been heard of on this subject, but in our last game against Vancouver we got our real team out, despite the fact that neither Crocker nor Morris were able to play owing to ill-health. We met men of our own calibre, with the result that they simply were not in with us at any point in the game. Every one of our players was of home production. Victoria's boys played and Victoria's boys won. If only such a program could be maintained in the field I am convinced that the championship would come back to us in a couple of years.

DISCUSSION OF LOCAL ATHLETICS

BY AN ENTHUSIASTIC VICTORIA SPORTSMAN

Lacrosse and Football in the Capital Subject of Article From W. W. Bolton's Pen.

"I am glad that what I have affirmed constantly always be converted into a fact, as otherwise I might well be put down as an enthusiast without proper foundation. Employers have been heard of on this subject, but in our last game against Vancouver we got our real team out, despite the fact that neither Crocker nor Morris were able to play owing to ill-health. We met men of our own calibre, with the result that they simply were not in with us at any point in the game. Every one of our players was of home production. Victoria's boys played and Victoria's boys won. If only such a program could be maintained in the field I am convinced that the championship would come back to us in a couple of years.

"The public have also been hard on us this season. So much so that we have been compelled to practice in a close the season now or else to run heavily into debt, a course the board of managers is bitterly opposed to. We already have our own field, and we can carry it and clear off, and have no right to expect that one man should pay for the game to be played amongst us. "Lionel Yorke has more than made good. He has been of the greatest assistance to both managers, and has won the lasting esteem and gratitude of both. I am sure that had my advice been followed a year ago, and Mr. Yorke secured in place of outside players, we should have had the inter-city cup this year. What we have now to do is to make a strenuous effort to find a position for Mr. Yorke, which will make him a permanent resident amongst us, and enable him to assist in the management of the inter-city cup this year. What we have now to do is to make a strenuous effort to find a position for Mr. Yorke, which will make him a permanent resident amongst us, and enable him to assist in the management of the inter-city cup this year. What we have now to do is to make a strenuous effort to find a position for Mr. Yorke, which will make him a permanent resident amongst us, and enable him to assist in the management of the inter-city cup this year.

"Our policy is now a fact before the public for their approval or their censure. One item only has not so far materialized as to give it publicity, but there is time yet before September closes in which we can announce and carry it through, and we shall then feel as if a board we have lived up to all we promised the citizens, and that our talk at the commencement of the season was not "brag," but "fact."

"I am bound to make reference to the players themselves, that they have acted splendidly as regards expense. Only the actual necessities have been asked for, and each man has done his best to maintain the team as light as possible. In fact when the accounts are made up and published it will be found that never in the history of the club has there been any loss. This is to be compared with this season's accounts, which show a deficit of over \$100. I have been in intimate touch with the club's finances for four years, and so ought to know. "Then as to football. I am in hopes that a suggestion I have made last season may yet materialize. Now that the Vancouver Island Football Association is in good running order, it seems absurd to have the Victoria District Football Association as a distinct organization. It means that immediately after the city teams in the three grades of seniors, intermediates and juniors have played their city schedule through, the same teams have at once to go to compete with one another to qualify to meet the winners of the Nanaimo circle. It appears to me much more sensible to have the two run concurrently to absorb the Victoria District Football Association in the Victoria circle of the Vancouver Island Football Association, the winners of each grade to hold the challenge cups of the city till the following season. It would also do away with the present numerous officers, whom it is always a difficult matter to secure, and generally ends in a handful of doing double duty. I trust that soccer players will give the matter their careful consideration, and be prepared to vote on it at the schedule meeting which falls in September.

"A further suggestion has been made to me which has its good points, it is more or less planned for the system long in vogue in Glasgow. At present there is a wide hiatus between Rugby and soccer men in this city, and there are also many old players of both games who are interested in the welfare of their old game, but are not attracted by merely subscribing to the city club, but want something more. It is felt that an association might be formed in connection with the city grounds to which body every present and old player should subscribe, which would enable the payee to entrance to all football games played at the park, and the use of the dressing rooms for such men who, whilst unable any longer to play strenuously, would like to keep their adipose tissue down by a little exercise. The union in one body of both Rugby and soccer men would tend to bring the adherents of each game together and result in better attendance at both games.

"This is only a rough outline, but there is a good deal of usefulness in the suggestion. "I cannot yet speak of the prospects of soccer for the coming season. Men are not thinking about it as yet, but it is to be hoped that some club will step in and fill the breach caused by the garrison's absence, and it should welcome an efficient third club from either the 5th Regiment or James Bay. If Victoria West would join hands with Esquimalt, and the present team there might be an excellent team as a result—one which would make Victoria "hustle."

DISCLOSED SECRETS.

Ex-Minister of Colombia Is Declared a Traitor and Will Be Tried.

Bogota, Aug. 13.—President Reyes today issued a decree, declaring Diego Mendoza, ex-minister of Colombia to the United States, to be a traitor for having published a letter addressed to political friends in which he is alleged to have disclosed diplomatic records. The decree orders Mendoza to present himself at Bogota within two months in order that he may stand trial before the high court of justice, failing which his extradition will be asked for.

DR. SAUNDERS IS HERE FROM OTTAWA

HE CAME WEST ON TOUR OF INSPECTION

Tells of Interesting Experiments Being Made in Agriculture and Horticultural Line.

(From Monday's Daily.) Dr. William Saunders, superintendent of the Dominion experimental farms, has arrived from Ottawa on his annual tour of inspection. He has been spending some time at Agassiz, arranging the work there for the coming year. He has also been visiting the western farms en route. At Lethbridge some 400 acres were taken over, and the land will be converted into an experimental farm, 100 acres for the irrigation purposes and 300 acres for dry farming. In this way it will be possible to ascertain what can be done by irrigation—as both crops grown side by side will indicate at once what the value of water is to the agricultural interests of the country. Lethbridge is situated in a dry belt, and as a great deal has lately been learned about conserving moisture, the Dominion government intended making a test along the line mentioned in this particular district. The irrigation will be supplied from a ditch running from the St. Mary river, about 100 miles, and through a former settlement, now a desolate waste. There is an experimental farm at Indian Head where some very interesting experiments have been tried in the way of fruit culture. What is known as the "Columbia" apple has been successfully introduced there, says Dr. Saunders. It is a cross between the standard apple and the wild crab of Siberia, and appears to thrive well in the rigorous climate of the Northwest. "It has been grown during the last three or four years by the farmers, who take an interest in horticulture, and they have had success. But the government has not rested content with this experiment. They are making other tests along the same lines with apples and plums, and early next year will see the second "crossover" bearing. It is slow work, however, said Dr. Saunders this morning, as it takes three or four years for a tree to yield.

"At Agassiz Dr. Saunders reports that commercial orchards are now being established in connection with the experimental farm at that place. "We have been working for some time trying to find out what fruits are specially adapted for British Columbia, and have succeeded in introducing a number of varieties heretofore not known to British Columbia. We intend to cross breed to get the practical value of our work. We are putting in a dozen trees at a time so as to test the value of the fruits we introduced. We put in an apple orchard two years ago, and this year we have orchards of pears and plums. The land, too, is being tested for the growing of the best varieties of grain such as wheat, barley, etc., and we are devoting special attention to the experiments with alfalfa. This is the product which grows in some places as many as these crops a year being obtained, and we purpose giving it a trial in all provinces.

"Dr. Saunders says that so far as he knows nothing has yet been done towards the establishment of an experimental farm on Vancouver Island. The doctor will be returning East to-morrow, and on his way will visit northern Alberta. "PHYSICIANS ARRIVE. To Attend the Annual Convention of the British Medical Society in Toronto. Boston, Aug. 20.—Among the passengers on the White Star liner Assembly, which arrived yesterday from Liverpool, was a large party of English surgeons, physicians and physiologists who were their way to Toronto, where the annual convention of the British Medical Society is about to open. It is headed by Sir James Barrie, of Liverpool. Immediately after leaving the steamer they took a train for Toronto. "THE SULTAN'S CONDITION. He Mounted the Steps of the Mosque Without Difficulty. Constantinople, Aug. 20.—The Sultan, who is confined to his bed by an illness, was able to mount the steps of the mosque at the foot of the hill he mounted the steps of the Mosque without difficulty. His Majesty drove himself back to the palace. He postponed, however, his customary reception to the ambassadors.

TREADING ON CORNS

Isn't just the most pleasant thing in the world—especially if the corns are your own. Corns try your temper and curtail your usefulness. Foot Elin's Corns alleviates all distressing corns, renders the feet soft, healthy and vigorous. Its use is always grateful to the feet.

On Saturna Island, near Esquimalt, a small quantity take evidence of the fact that the earthquakes constructed from this area as 1870. Of its worth qualities no better given; but referred to the fact that San gave the peculiar quack of the creding mentioned earlier conflagration. This was built of stone and brick, and was of huge masonry, all their massiveness, it trace to the Call from this province. While the recently deposits on Nootka yet been extensive small quantity take evidence of the fact that the earthquakes constructed from this area as 1870. Of its worth qualities no better given; but referred to the fact that San gave the peculiar quack of the creding mentioned earlier conflagration.
