The market has been a dull and uninteresting affair this morning, with price movements in the general list confined to small fractions. New Haven again exhibited weakness at the start, declining on farther liquidation to 913, while Southern Paofide broke into new low ground on this move, on the continued selling of the Union treasury stock.

On the other hand the Interboro issues showed pronounced strength on the wide ypravalent tip that the directors will put the preferred atock on a 5 per cent. dividend basis at their meeting on September Srd.
