## BIG INDUSTRY FOR ST. JOHN

David Craig Company Apply to City for Lease of Property

Want Lancaster Site for a Term of Twenty Five Years—Make Concrete Block Houses.

The most recent proposal to establish an industry in about St. John was made last night at the meeting of the Board of Public Safety, when ex-Alderman H. L. McGowan, on behalf of the David Craig Company of Boston applied for the lease of the city lands in Lancaster known as the Armstrong property. The rental offered is \$500 a year. The term of years asked is twenty-five, with privilege of renewal at the end of that period. The company is capitalized at \$1,500,000, and its desire of establishing its Canadian branch in the Maritime Provinces. Most important among the various lines of industry carried on by the company is the manufacture of concrete block houses. The company also manufactures Portland cement and plumbers' supplies.

The application read to the Safety Board by Mr. McGowan was accompanied by a check to cover legal expenses connected with the drawing of the lease. The members of the board were favorably impressed by the letter of application, and appointed the following committee to look into the matter at once: Ald. Vanwart, Ald. Kelley, Ald. Sprout and Director Wisely.

The David Craig Company of Boston is incorporated under the laws of the State of Maine. Its president and managing director, David Craig, is a former resident of St. John, who went to Boston when a young man and met with phenomenal success in business. The vice-president and secretary treasurer is S. L. T. Burdett, another St. John boy, who has made good in the United States. The managing director is also an investor, and the company is engaged in the manufacture of many articles of his invention. A special system for the construction of houses from concrete blocks has been patented by Mr. Craig. The company also manufactures plumbers' supplies on a large scale, having recently absorbed a large New England firm engaged in that line of business.

In the vicinity of Boston the Craig Company now has a plant for the manufacture of concrete block houses. The material in sight is sufficient to make 40,000 houses. On the Armstrong property there is a natural subsoil in every way for the manufacture of concrete block houses, and should the material be used in this line it would start as soon as possible to manufacture houses out of fire-proof and rat proof, and as the blocks are fastened together with metal pins, houses can be taken down and transported from one part of the country to another.

Actual work would be established in connection with the plant, and ultimately a plant for the manufacture of concrete block houses would be erected. According to the statement made by Mr. McGowan, the company has been in existence for some time, and has been successful in its operations. Mr. Craig is a former citizen of St. John, and his company has been successful in its operations. Mr. Craig is a former citizen of St. John, and his company has been successful in its operations.

The property asked for by this company is, it is understood, also being sought after by a rival concern. It has been recognized for some time that the land contained the materials for the manufacture of Portland cement and for that reason it has been tried by long lease, although this policy has been criticized by some. This summer David Craig had the materials found on the property analyzed, with the result that they were found to be just what was needed to make a very fine cement and concrete.

**VERDICT FOR THE DEFENCE**

Five in Favor of Defendant While Two Dissent—Appeal is Likely.

A verdict in the case of Peter vs. Barbour was reached before Justice White in the Circuit Court yesterday afternoon. The jury after being out one hour and fifty minutes returned and notified the court that five were in favor of the defendant, while the other two dissented. The foreman, Benjamin Dowling, said they were aware that they ought to stay out two hours before five could bring in a verdict, but one of the jurors wanted to catch a train and they didn't see the necessity of staying the extra ten minutes.

His Honor said the statute required them to remain the full two hours and they would have to spend the extra time in the jury room before he could accept the verdict. They retired and after twenty minutes absence returned that they were still of the same mind.

On the verdict being announced, Mr. Teed, acting for the plaintiff, asked His Honor for a stay of proceedings, as it was probable the plaintiff would appeal the case. He felt the verdict was not justified in view of the evidence.

Addresses of counsel were quite short after which His Honor gave a resume of the case to the jury, summing up both sides very impartially. The jury retired at 3:40. Before they retired, Mr. Kendall, Hall, one of the jurymen, asked His Honor if they would consider the question of costs. His Honor replied that that was exclusively a matter for the court.

The court adjourned to meet Wednesday, October 6th.

## GAMBLER STAKES HIS LIFE ON STOD POKER FREEZE-OUT

One Game Ends In His Conviction of Murder, But the Second Wins for Him His Freedom at the Sheriff's Hands.

DETROIT, Mich., Sept. 27.—"I never knew just how much I was an actor," said the young looking man in the club smoking room, as he looked at the man who had just been convicted of murder. "I was merely a disinterested looker on at an ingenious subterfuge by which two men contrived to cheat the law while doing substantial justice. What was done was certainly a gross violation of law, and it would have gone hard with me as well with one of the two if the trade had ever been known, but my conscience never troubled me in the matter, and as the offence was never discovered I suffered no penalty."

"I don't know that I'd care to tell that story again, and I don't expect to go back there again, and as the whole thing happened fully twenty years ago I don't do any harm, only for obvious reasons I can't use their real names."

The application read to the Safety Board by Mr. McGowan was accompanied by a check to cover legal expenses connected with the drawing of the lease. The members of the board were favorably impressed by the letter of application, and appointed the following committee to look into the matter at once: Ald. Vanwart, Ald. Kelley, Ald. Sprout and Director Wisely.

## WASHOUT ON C.P.R.; BRIDGE SWEEP AWAY

Record Storm Does Great Damage

Trains Held Up—Bridge on North Branch of Oromocto Goes Out With the Freshet.

A washout on the C. P. R. line which detained three trains for several hours, and the destruction of a bridge at Hartt's Mills, on the north branch of the Oromocto, are among the items of damage caused by the storm now prevailing.

At noon yesterday the wind was blowing at the rate of 40 miles per hour, but at nine o'clock it had been reduced to 24 miles. The rain fall which has amounted to a little more than three inches since Thursday night, constitutes a record for the year. Heavy weather has prevailed, practically since Thursday morning, the day having been foggy throughout.

At the local observatory last evening the forecast was still "stormy." At nine o'clock the temperature was 42 degrees, the rain continuing a warm one.

The Boston train, due to reach here at 1:15 last night, was reported three hours late on account of a washout of track at a point about half way between Yarmouth and McAdam. Three lengths of track were swept away, but the damage was repaired about midnight.

At McAdam the Boston train leaving here at 4:45 p. m. and the Montreal train leaving here at 5:30 p. m., were both held until the break should be repaired. The incoming Boston train was held at Yarmouth.

The temporary bridge at Hartt's Mills, north branch of the Oromocto, where the steel bridge is building, went out yesterday at noon with the freshet. The inconvenience to the travelling public will be considerable. The heavy rains of the past few days have caused great damage along the Oromocto and the freshet is now very high.

Material for the new steel bridge now in the hands of the contractors is not yet all on the ground, and it will be at least a month before the structure will be ready. In the meantime a temporary bridge is urgently needed.

Randall looked at his and came in without raising. Then the second cards were dealt and each man got a trey. Randall bet a chip and Torrey covered it and on the last round Randall caught a king and Torrey a seven.

"It was still Torrey's bet and he put up a hundred. Randall hesitated again, but finally called and lost, Torrey having tens up against his pair of kings."

**DOZEN SIMILAR HANDS**

"Then followed half a dozen hands equally uneventful, considered as a poker game, and the luck was so evenly divided that neither man was much ahead, when there came a tremendously exciting deal which if fact settled the game."

"Randall dealt, or I might have suspected trickery, for Torrey was skillful enough to stack the cards, though I never knew of his being caught at it. The hands, however, were simply amazing."

The first card that each man had showing was an ace. Then Torrey got a king and Randall a jack, and a hundred was bet and covered. On the third round Torrey got another king and Randall another jack. When Torrey bet \$500 on this Randall raised.

"On the last round each man made three of a kind showing, and Torrey showed up \$2,000, but Randall put his whole pile in, and Torrey, with an exultant smile, covered it and showed four kings, while Randall had only a jack full on aces."

"It did not seem possible to me for a man to turn as pale as Randall did when he saw he had lost, but he kept his composure and said only, 'You have won! I'll play you a freeze out for the eight thousand.'"

"No," I reckoned you hadn't," said Torrey with a smile, "but you've got a couple of revolvers in your belt that's worth at least four thousand apiece to me. I'll play my money against you, and I give you my word against me, I'll get out of here alive if I win. I'll get out of here alive if I win. I'll get out of here alive if I win."

"Well, Randall hesitated, and I knew that he was likely to happen then what was likely to happen. He refused at first in a half-hearted way, and Torrey pleaded and argued with him as I have never heard a man plead before or since."

**WOULD RANDALL PLAY?**

"Randall looked at me and I refused to say a word, but I think he knew me well enough to be sure I wouldn't betray him. Then after a little he consented and I watched the game. Torrey had a deck of cards in his pocket and they used coins for chips. Randall laying his pistol on the table in front of him, though not in a position in which Torrey could snatch them from him. Of course, Torrey was unarmed."

"They played stud poker, and of course the limit was \$5,000, a freeze out being agreed to. It wasn't a long game but I never saw one that interested me quite as much as that did. At the beginning the play would have been absolutely uninteresting if it had not been that the real stakes of the game were a human life, on the one side, and an honest man's reputation, dearer than life, on the other."

"They cut out for the deal and it fell to Torrey. Thereupon he put up a single chip and dealt the buried cards."

## H.P. SAUCE

is the new Sauce, imported from England.

Its delicious flavour is obtained by blending together the choicest Oriental fruits and spices.

It is used on the dining tables of both the British and Canadian Houses of Parliament and has rapidly become England's most popular Sauce.

Grocers over here are already selling it—buy a bottle right away

1,365,650 IN TWELVE YEARS

Detailed Statement of Immigration into Canada.

OTTAWA, Sept. 27.—The detailed statement of immigration into Canada for the last fiscal year has been issued in blue book form. The main figures were made public some months ago, but in the summary of the department's work for the year some interesting facts are brought out. Last year's total arrivals of 145,983 brought the total immigration for the past twelve years since 1896 up to 1,365,650. Of this number 549,621 came from the United Kingdom, 425,412 came from the United States and 406,611 from other countries.

The amended regulation restricting the immigration to Canada last year of persons assisted by charitable organizations and encouraging immigration of agriculturists have resulted in almost completely eliminating undesirable elements of previous years. Nearly one half of the total male immigration last year was composed of farmers and farm laborers.

The 60,000 Americans who came to Canada during the twelve months were for the most part experienced farmers, and according to the report of Inspector White they brought to Canada on an average \$100 per capita in stock, cash or effects. Every state in the American union was represented in the 19,522 homestead entries made during the year.

Vesuvius, the great volcano, is a small figure in the history of the world, but in the century of the Christian era, in 79 B.C. its crater served as a camp of refuge to a band of gladiators. In 62 A.D. the severity was broken by a violent grumbling that manifested itself in a severe earthquake that shook up the surrounding region. For sixteen years the subterranean rumblings continued at intervals, and in the year 79 A.D. came the great catastrophe in which Herculaneum and Pompeii were overwhelmed. In 1531 there was another terrible explosion, and since that time Vesuvius has seldom been at rest for many years together.—Exchanging.

Bentley's best Liniment for Sprains, Strains and Rheumatism.

have to, and I reckon Jack knows that I will if I must, so he won't be likely to make much trouble."

"I looked at Randall, but he said nothing and I went out. My ally was established, for Torrey waited nearly half an hour before he went out, leaving Randall a broken man."

"Torrey was never heard of again so far as I know, and Randall's story that he had fallen asleep was never openly questioned, but his prestige was gone, and he, too, left town soon after. What became of him I don't know."

ASEPTO makes clothes whiter, fresher, cleaner, than any soap can make them. Sterilizes everything it comes in contact with—is perfectly odorless. For washing clothes, bedding and various fabrics, dishes, pots and pans, use one tablespoonful of ASEPTO to a bucket of water. After the wash, pour the wash-water into the sink—and sink and drain pipes will be completely disinfected. Invaluable in cases of infectious diseases, as ASEPTO kills all disease germs present in the bedding and dishes used in the sick-room. ASEPTO costs but 5 cts. a package—but when compared with ordinary washing compounds ASEPTO would be sold cheap at double the price.

ASEPTO has been analyzed by eminent physicians and found to be all we claim for it.

The Assepto Mfg. Co., St. John, N.B.
