the farming implements, such as fanning-mill, plough, &c., and also many other things, which of course cost money or labour when they are required. We have all enjoyed good health, for this place is healthy, and there is not a doubt but an emigrant will (allowing him to be industrious) succeed here as a farmer, and particularly so if he has been previously accustomed to farming, or indeed to any labour, whether mechanical or agricultural.

Hoping the above particulars will be satisfactory, and I might have added to them, if time permitted,

I remain, SIR,

Your most obedient servant,

(Signed)

JAMES HASTINGS.
