

In theatres, churches, lodge rooms, stores, hotels—in fact all public buildings where a permanent, artistic and harmonious effect is eminently desirable—Galt "Classik" Ceilings will naturally be required.

They are the exact replicas in sheet metal of the beautiful and artistic stucco ceilings of the Louis XIV. period.

Ceilings, walls and trimmings perfectly harmonize—the joints fit accurately together and are invisible.

Fire-proof, strictly sanitary, with a lifetime's service assured, they are the most economical kind of ceilings to buy. Their small cost will surprise you.

FROST & WOOD
No. 8
MOWER

HAY-MAKERS THEY WORK WELL TOGETHER

An ideal combination for getting in your crop of grass. Our No. 8 Mower with its strong, substantial build, its accurate, clean-cutting power and ease of operation, is a real money-saver and profit-bringer for thousands of farmers at every point in the Dominion. It is strong, durable, needs few repairs, it works day in and day out, proving the stalwart, honest and mechanical excellence put into every gear and wheel, knife and shaft, cutter-bar and pulman.

But there's the other tool—can't get along without that—the Tiger

Hay-Rake.

It's all steel, except tooth-rail and shafts, which makes it proof against hard work, rain and exposure. A Tiger Rake is exceptionally durable. It does such clean work, too. The spring teeth have just enough elasticity, and are curved so as to pick up grass evenly and evenly. It's an easy rake to handle for horse and driver. It can be dumped by foot or hand. The fall of the teeth after dumping is caused by a strong spring that prevents much of that disagreeable jar so evident in cheap rakes. We can't tell you here the scores of good points about these hay-makers. Send for our catalog "H" and "Farmer's Ready Reference." Both books are free, and answer your questions. Ask our local agent to show you our farm implements. He'll gladly do it.

One Half

THE BINDER TWINE SOLD IN CANADA IN 1907 WAS
DEERING McCORMICK AND INTERNATIONAL BRANDS

FIFTY per cent of the binder twine used in Canada for the 1907 harvest was Deering, McCormick and International twine. Why? Because these brands give such universal satisfaction that farmers depend upon them. Farmers who use short length and imperfect twine during one season will profit by their mistake and see to it that they get a brand which has full length, full strength, and evenness of strand to recommend it.

Are you one of the farmers who used short length twine last year? If you are you did not buy Deering, McCormick or International twine, for these twines are always full length, full strength, and comply with the requirements of the government inspectors.

This is the reason for the grow-

ing increase in the use of Deering, McCormick and International twine. These brands are guaranteed to stand a breaking test of 50 to 85 pounds, and to have average lengths as follows:

Sisal,	500 feet per pound
Standard,	500 " " "
Manila,	600 " " "
Pure Manila,	650 " " "

These brands of twine are also remarkably free from swells and bunches of tow; a comparison with other brands will convince you of this.

It will pay you to call on the local dealer and inspect these brands of twine before making a purchase. Or write to the nearest branch house for further information.
