The annual loss of young chicks in the United States is staggering. More than one-half the yearly hatch die before reaching pullet age—die through leg weakness, gapes and indigestion. Talk about conservation—think of the millions of dollars that poultry raisers could save by saving most of these chicks. Yes, most of them can be saved-saved by starting them on

Dr. Hess Poultry PAN-A-CE-A

Not a Stimulant, but a Tonic

right from the very first feed. During my 25 years' experience as a doctor of medicine, a veterinary scientist and a successful poultry raiser, I discovered that, by using a certain nerve tonic and appetizer, leg weakness could be absolutely overcome: that the use of another certain chemical that is readily taken up by the blood would cure gapes, by causing the worms in the windpipe (the cause of gapes) to let go their hold and helping the chick throw them off. By combining these ingredients with bitter tonics and laxatives, I found that I could control and invigorate the chick's digestion.

digestion.

My Poultry Pan-a-ce-a helps put stamina into the chick, strengthens and cleanses its system and sends it along the road to maturity, hardy and robust. Most of the biggest poultry farms in the United States, where chicks are hatched out by the thousand every day during hatching season, feed my Pan-a-ce-a regularly.

Dr. Hess Poultry Pan-a-ce-a is the result of my successful poultry experience and scientific research in poultry culture—there is no guesswork about it. Ingredients printed on every package. Now listen to this:

So sure am I that Dr. Hess Poultry Pan-a-ce-a will make your poultry healthy, make your hens lay, and help your chicks grow that I have told my dealer in your town to supply you with enough for your flock, and if it doesn't do as I say, return the empty packages and get your money back.

Sold only by reliable dealers whom you know—never peddled. 1½ lbs., 35c; 5 lbs., 85c; 25-lb. pail, \$3.50 (duty paid). Send for my free book that tells all about Dr. Hess Poultry Pan-a-ce-a.

J. B. HOGATE'S PERCHERONS.

One fact thoroughly established resulting from the destructive European war is that the exportation of horses for breeding purposes from those countries engaged is a thing of the past for several years at least. This is more particularly true of France, for every Percheron at all fit for war purposes, and that will require the big ones for heavy artillery purposes as soon as spring opens, will be taken, and there will be a demand from that country for breeding Percherons as soon as things get settled away. This country and the United States is their only available source of supply, therefore, good judgment would seem to indicate to any man wanting a Percheron stallion or mare that this spring is the time to buy, for there will be no other opportunities so good for a long time. The stallions and mares offered for sale by J. B. Hogate, of Weston, Ont., are the kind that the country wants. They are grays and blacks, weighing from 1,900 to 2,100 pounds, full of true draft character, on the very best kind of underpinning. Several of them are Toronto and Guelph prizewinners, and now is the time to buy, as the prices are sure to advance before many months.

MAPLE SHADE SHORTHORNS.

Exceedingly high in quality, bred in the most aristocratic lines of the breed, the fifty-year-old Maple Shade herd of Scotch Shorthorns owned by W. A. Dryden. of Brooklin, Ont., holds a most enviable position as one of the world's greatest herds. Stronger than ever before in individual excellence, the eightyfive head that now constitute the herd are all in prime condition, and must present a fascinating sight to intending purchasers. Very many of the big, thick, breeding cows are imported, and represent on blood lines such fashionable and popular tribes as the Cruickshank Butterflys, Nonpareils, Marr Bessies, Roan Ladys, Missies, Floras, Jilts, Lancasters, Brawith Buds, Lady Fannys and Lady Edens. Very many of these cows will average 1,700 and 1,800 lbs. in weight, and many of them are exceptionally heavy milkers. At the head of this great herd is the wonderfully-fleshed bull, Archer's Hope 80017. He is white in color, five years old, and weighs 2,600 lbs. He is a show bull from the ground up, and is one of the best individual bulls and one of the best breeding bulls of the day in this country. He has been shown twice; last fall at Toronto and London, where he was first at both shows. Archer's Hope was sired by Nonpareil Archer (imp.), dam Rosa Hope 16th, by Royal Prince (imp.), grandam Rosa Hope 15th. He is registered in both the Canadian and American books, and was bred by Peter White, of Pembroke, who says his dam was the best breeder and the best milker he ever owned. A close second to him in individual excellence is a yearling son, Rare Sort, out of the Goldie-bred cow, Goldie of Byres 2nd, by Prince Favorite (imp.). Last fall he was third at Toronto and second at London as a junior yearling. Watch him top the two-year-old class next fall. The several young bulls ready for service are sons of the old bull. Two are Lancasters, one a Cruickshank Secret, one a Brawith Bud, one a Jilt, one a Lady Fanny, and every one of them is a high-class young bull, beautifully fleshed, true in his lines, and carrying abundance of masculine character. For parties wanting a younger one there are a rare lot from which to select. One that will make things interesting next fall is a roan Missie, six months old. Look out for him. In heifers, there are a grand lot of one- and two-year-olds, also got by the old bull, an aggregation of young things of both sexes of a quality and fleshing that stamp Archer's Hope as one of the greatest sires alive. For parties wanting a high-class herd-header, or some high-class cows or heifers, the Maple Shade herd contains a selection that for numbers and quality is seldom equalled.

"He is a self-made man, is he not?" "Yes, except for the alterations made by his wife and her mother."

YOU WOULDN'T PUT AXLE **GREASE ON YOUR WATCH**

AHAT would be ridiculous -yet no more so than to use ordinary farm oil on your cream separator. This delicate mechanism requires a lubricant made especially for it. You must use

Standard Hand Separator Oil

if you want the bowl to run smoothly and swiftly. It is made especially for separators — does not gum and is of just the right body to reach the finely adjusted bearings. Don't impair the efficiency of your separator by using any kind of lubri-Get Standard Hand Separator Oil made for the purpose.
