Government Co-operation in Tree Planting

NOTICE is hereby given that all those who wish to avail themselves of the co-operation of the Forestry Branch of the Department of the Interior, in setting out shelter belts or plantations on their farms in Manitoba and the Northwest Territories in the spring of 1904, must have their applications forwarded to the Superintendent of Forestry at Ottawa, before March 1st, 1903. All applications received after this date will be held over till the following year.

For circular and information as to the free distribution of trees, apply to the Superintendent of Forestry, Ottawa.
E. STEWART,
Superintendent of Forestry.
Ottawa, November 25th, 1902.

A Continuation of Springs Through its Entire Length

THE H. R. LAMB FENCE CO., LTD., LONDON, ONT.

To make sure
of getting a

Champion Spring-Tooth Cultivator

Send in your order NOW.

It is never too early to order—it is often too late.

The CHAMPION is the most popular implement of its kind.

The teeth are in four rows, and can be adjusted to any angle or position to work in corn, potatoes or any root crops.

Our catalogue will tell you all about the Champion Cultivator, and also about our No. 3 Binder, Mowers and Rakes. Send for it.

We make a full line for the farm.

Ogilvie Oats

DELICIOUS FLAVOR.
FREE FROM HULLS.
WARRANTED PURE.

Put up in all sized packages.

Ogilvie's Hungarian

AS NOW
MANUFACTURED

The great FAMILY FLOUR.

Insist on getting "OGILVIE'S," as they are Better than the Best. Have no equal.

Prof. Shaw's Opinion

Read what Professor Shaw, formerly of the Ontario Agricultural College, Guelph, Ont., and now Editor of the St. Paul Farmer, says of Carnefac Stock Food:

St. Paul, Minn., Dec. 10, 1902.

This is to Certify that the ingredients used by Mr. W. G. Douglas, Winnipeg, Man., in the manufacture of his Carnefac Stock Food have been submitted to me for my opinion regarding their value. I may say with reference to them that I am satisfied they are all healthful. If properly blended they should make a splendid tonic for live stock, more especially when the digestion is not in the best working order. They will act as an appetizer and will also tend to stimulate the digestion so that when fed to animals not in good condition of thrift the result should be to quickly improve their condition. I would suppose that this food would be especially helpful in feeding horses in preparing them for spring work, and in putting in tone the stomach of cattle, sheep and swine that have been pushed too hard in feeding. It should also render good service when fed to calves that are not prospering because of indigestion.

THOMAS SHAW.

If You Are Sick

Don't Wait Longer—Write
For My Book.

You see this offer everywhere—all the time, and every week thousands accept it. Don't you know that I must be curing those thousands, else the offer would ruin me.

Will you let me cure you, too?

I will mail you an order—good at any drug store—for six bottles Dr. Shoop's Restorative. You may take it a month on trial. If it succeeds, the cost is \$5.50. If it fails, I will pay the druggist myself—and your mere word shall decide it.

No matter about your doubts.

You at least must know that I have faith in my treatment, when I make an offer like that.

I know what the remedy will do, and you don't. For your own sake, let me convince you. Then if it fails, let me pay.

My success comes from strengthening the inside nerves, which alone operate the vital organs. I have spent my life in learning how to do it. A weak organ means weak nerve power. It is like a weak engine that needs more steam. To doctor the organ is useless—what it needs is power to act. My Restorative alone brings back that power, and in most of these diseases no other way can cure.

My book will tell you why.

Simply state which book you want, and address Dr. Shoop, Box 52, Racine, Wis.

Book No. 1 on Dyspepsia.
Book No. 2 on the Heart.
Book No. 3 on the Kidneys.
Book No. 4 for Women.
Book No. 5 for Men (sealed).
Book No. 6 on Rheumatism.

Mild cases, not chronic, are often cured by one or two bottles. At all druggists.

"Feeding Balanced Rations."

To the ordinary feeder, the subject of Balanced Rations is all theory. How many readers of the farm papers understand the meaning of the term, "Nutritive Ratio," or of "Carbohydrates and Fat." Now, to sum up the whole subject and to put it in language that the ordinary feeder can understand, let us say: The true way to balance a ration is to give something with the indigestible part of the food that will make it digestible. It matters not how great a proportion of flesh-forming quantities the food contains, if it cannot be assimilated by the animals' stomach it is lost.

Theories are good, no doubt, and they at least make good reading for those who can understand them, but results in practice are the usual object of the practical man.

We give below reports by practical men that fully illustrate the results of a truly balanced ration.

"I have used Herbageum for several years in fattening cattle for export and find it a great advantage, not only in laying on of flesh and keeping the animals always hearty and ready for their feed, but the meat is much superior. It is of a better color, is firm and of fine flavor, and the difference in quality is very noticeable. I do not feed oats, as I can get better results with dry feed and Herbageum. I feed a mixed chop of peas, corn, bran and shorts, with straw, and my cattle are doing well. Last year I fed the same chop mixture with hay, but this year I am not feeding hay. I buy in cattle weighing from 950 lbs. to 1,200 lbs., and have them in shipping condition in from 100 to 120 days. Last year the gain per head per day ranged from two and a quarter pounds to two and six-tenths pounds. In taking weights, I always weigh the animals before watering them." D. Hanley, Cainsville, Ont.

"My Jersey herd, which took first prize four consecutive years, was fed Herbageum. I use it regularly, and average not more than a tablespoonful a day for each animal. It keeps them in good health, which means the fullest return in milk and butter." Joseph H. Smith, Highfield, Ont.

Part of this column will in future be used for short articles on Stock Feeding, by the Beaver Mfg. Co.

It is Time

to order your ladder for winter and spring work, repairs, painting, hay-fork work, etc. None equals the celebrated Waggoner Extension Ladder for lightness, strength, handiness and safety. Highest awards at all exhibitions. Gold Medal at Western Fair, 1902.

Farmers, Painters, Tanners, Hardware men, Impt. men, everyone!

We make also fine folding Lawn Swings, handsome and comfortable; Ironing Boards, Clothes Horses, Paste Tables etc. etc. Write for Catalogue D showing all these things. We send it free.
