

PUT UP THE HEAVY, HOG-PROOF IDEAL WOVEN WIRE FENCE

You want a fence that is so heavy, stiff and strong that it will discourage any attempt at rooting. After an argument with the IDEAL your hogs will become thoroughly discouraged of trying to get under it. The IDEAL is undoubtedly the fence for you.

The IDEAL is the fence the railroads purchase because of its weight and quality. No. 9 hard steel wire throughout. Heaviest galvanizing on any fence. But the IDEAL lock is the BIG reason why you should buy the IDEAL fence. No lock equal to the IDEAL in gripping-tenacity has yet been discovered. Chances are there never will be. When stretched up, IDEAL is a very handsome fence. Every strand measures exactly true. Every lock is

correctly applied. You see, the IDEAL is manufactured by the most improved fence machinery, in a plant that is considered a model among fence factories. With such superior manufacturing facilities the natural result is a fence overshadowing others in quality—and that is IDEAL fence. For further reasons read our free booklet.

Agents Wanted to Sell This Superior Fence

IDEAL Agents make the best living, because IDEAL Fence has the weight, strength and quality that make it sell easiest. Let us send you our money-making proposition.

THE ELECTRIC BEAN CHEMICAL CO. Ltd.
OTTAWA.

Special Notice. BETTER THAN SPANKING.

Spanking does not cure children of bed wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box 821 Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

CHURCH BELLS CHIMES AND PEALS

MEMORIAL BELLS A SPECIALTY FULLY WARRANTED
MC SHANE BELL FOUNDRY CO.,
BALTIMORE, Mo., U. S. A.
Established 1866

In one of the public schools the other day, the teacher presented a problem for the scholars, which would require the use of fractions. She expected the answer, "I don't know." The problem was: "If I had eight potatoes, how could I divide them among nine boys?" One bright-looking youngster raised his hand. "Well?" said the teacher. "Mash them," promptly replied the young mathematician.

GOSSIP.

J. J. Wilson, Milton, Ont., in ordering a change in his advertisement of Berkshires, writes: I have had a very successful season, owing to my advertisement in "The Farmer's Advocate." A few of my recent sales are: One young sow and a young boar, to John Sheffer, Stayner; one boar to Fred. Klages, Neustadt; boar to H. A. Horne, Wolfe Island; boar to Johnston Jeffrey, Arnprior; boar to N. E. Parks, Napanee; boar to Gilbert Ostler, Plevna; young sow to C. E. Bouthillier, St. Therese de Blainville, Que.; boar to The J. B. Snowball Co., Chatham, N. B.; sow to E. Readhead, Lowville, Ont.; sow to D. Shultis, Rockwood; sow to W. D. Shields, Milton; sow to F. Switzer, Milton; two sows to J. A. Gartley, Strabane; boar to W. Gagen, Alliston; boar to Jacob Mogk, Tavistock; sow to W. J. Deans, Fergus; sow to Jas. Milloy, Hillsburg; sow to W. H. Waller, Eric; boar to A. F. Davidson, Gorrie; boar to R. Lee, Mansfield; boar to Oscar Shirley, Houlton, Maine.

SHEEP AND THEIR TEETH.

Prof. Gaumnitz, of the Division of Animal Husbandry, at University Farm, St. Paul, Minn., says that fine-wool sheep live longer than medium- or coarse-wool sheep. The former have been used successfully as breeders from one to eight years, and the latter from one to six years, and more rarely seven years. This indicates the extreme period of usefulness in the flock. The prime of life probably extends from one to five or six years.

The lamb has a short and small head as opposed to the head of the mature sheep. Its teeth are smaller in every way. They are usually smooth and white as opposed to a more corrugated, darkened surface in the old sheep. The age of sheep is told by the four pair of incisors which are found only on the lower front jaw. These are all present by the time the lamb is six weeks old.

In the yearling, the central pair of small incisor teeth are replaced with a large pair, when the lamb is ten to fourteen months old. They are almost twice as wide and much longer than those at either side.

At the age of two years, the animal gets a second pair of large teeth.

At three years, it gets a third pair of large teeth. It would then have three pairs of large teeth and one pair of small or lamb teeth.

The four years old has a full mouth of four pairs of large teeth. The outer ones are never as large as those in the center.

After the sheep is four years old, it is difficult to tell the exact age. With age the teeth usually grow longer and narrower. They begin at six years to resemble shoe pegs. Sheep that are living on short pasturage, and get sand with their grass, wear their teeth short, even in old age. This is unusual in Minnesota. When sheep get long, peg-like, or broken teeth, it is time to dispose of them.

MUSK RATS

Raw Furs
