

The CAPITAL Is the Cream Separator that will "Buy Itself" For You.

As soon as you have read this advertisement, sit down and write a post card for The Capital book—the book that not only tells the story of the easy-running, cream-saving separator, but that tells how you can put The Capital in your own dairy practically without costing you a cent.

The book also tells all about the wonderful Capital gears, about their perfect meshing and non-wearing qualities—how they run in oil—how an automatic clutch stops them running the minute you let go of the handle—and about how they give the light, three-and-a-half-pound bowl 7,000 revolutions a minute.

It tells how and why The Capital skims closer—why The Capital wastes less than one-fifth the cream that other separators waste—and then explains how the machine can be made sweet and clean in two minutes after you are through using it.

This book is full of hard-and-fast facts—separator facts—which every dairyman owes it to himself to know; facts which will prove a revelation to the dairyman who is not familiar with The Capital.

Write for the book to-day—NOW.

THE NATIONAL MFG. CO., LIMITED.
Head Office: Ottawa.

Factories: Ottawa and Brockville.

Branch Offices:—Regina, Sask.; Edmonton, Alta.; Moncton, N.B.

The destruction of the house fly is a public duty. Almost every American State Board of Health is carrying on a crusade against him.

His filthy origin and habits, and the fact that his body is generally laden with disease-producing germs, makes him one of the greatest enemies of the human race.

If the housekeepers of Canada will use

WILSON'S Fly Pads

persistently, this peril would be tremendously reduced.

When Writing Mention This Paper.

Have you received a copy of our illustrated Bulletin No. 600, describing

Waterous Steel Silos

Some people have the idea that a steel silo is unusually expensive, that it is difficult to erect, hard to keep from rusting, will attract lightning and will not preserve ensilage better than an ordinary silo of wood or cement.

This bulletin has been written, not so much to advertise this silo as to convince you that these impressions are dead wrong.

We have printed in it a few letters from some of our last years customers that will be sure to interest you.

If you are contemplating the erection of a silo, or if you would "just like to know," send a post card for bulletin No. 600.

BRANTFORD CANADA

The Full Percentage of Cream

Getting the full percentage of cream from milk depends as much upon the oil used to lubricate the separator as upon the separator itself. Gummy oil will cut the fine bearings of your machine, spoil its balance and waste good cream in the skim-milk pail.

STANDARD Hand Separator Oil

never gums, never rusts, never corrodes. It feeds freely into the closest bearings and insures the perfect lubrication that is essential to the free spinning of the bowl and the complete separation of cream from milk. It lessens the driving effort and lengthens the life of your separator.

One gallon cans. All dealers. Or write to

The Imperial Oil Company, Limited
Ontario Agents: The Queen City Oil Co., Ltd.

Money in Ditching

Every farmer and thresherman knows the value of a time-saving machine such as a harvester. We want YOU to know the money-making qualities of the BUCKEYE TRACTION DITCHER. It cuts 100 to 150 rods per day, and saves 25 per cent. to 50 per cent. of the cost of handwork. Are YOU interested anxious to earn more money? Write TO-DAY for catalogue "T." Remember, the first man in your vicinity to use a BUCKEYE will make the biggest profits. Address:

Sales Department,
THE BUCKEYE TRACTION DITCHER CO.,

Findlay, Ohio, U. S. A.
