

## SUFFERED TERRIBLE PAINS OF INDIGESTION.

### MILBURN'S LAXA-LIVER PILLS CURED HER.

Mrs. Wm. H. MacEwen, Mount Tryon, P.E.I., writes:—"For more than a year I suffered with all the terrible pains of indigestion, and my life was one of the greatest misery. It did not seem to make any difference whether I ate or not, the pains were always there, accompanied by a severe bloating and belching of wind. I did not even get relief at night, and sometimes hardly got a bit of sleep. In my misery I tried many remedies said to cure indigestion, but they did me not one particle of good, and I fully expected I would always be afflicted in this way. At this time my brother came home on a visit and urged me to try Milburn's Laxa-Liver Pills, and got me a few vials. By the time I had taken one vial I began to improve, and could eat with some relish. I was greatly cheered, and continued taking the pills until all traces of the trouble had disappeared, and I could once more eat all kinds of food without the slightest inconvenience. I am so fully convinced of their virtue as a family medicine, I have no hesitation in recommending them."

Price, 25 cents per vial or 5 vials for \$1.00 at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

MENTION "FARMER'S ADVOCATE."

## QUESTIONS AND ANSWERS. Miscellaneous.

### FEEDING BUCKWHEAT.

What is the comparative feeding value of buckwheat and barley when fed to hogs? With barley at 90c. per bushel, and buckwheat at 60c., would it not pay to sell the barley and feed the buckwheat, rather than vice versa?

E. H. M.

Ans.—The feeding value of buckwheat grain per 100 lbs. is from 75 to 80 per cent. that of peas, and nearly equal to that of barley, being a little lower in digestible crude protein and carbohydrates, and higher in fat. It is not advisable to feed it alone. Better results follow when it is fed in a mixture with other grains, and when buckwheat does not constitute more than one-third of the grain ration. At the prices quoted, it would be profitable to sell part of the barley at least, and fill its place with buckwheat, but care should be taken that too large a proportion of buckwheat is not present in the ration.

### FEEDING PIGS.

I have eight thrifty pigs three months old. Please advise me as to the best proportions of grain to feed. I have plenty of turnips, wheat and oats. Should I boil the grain with the turnips or have the grain chopped and put on raw or boiled turnips? I intend to have them ready to market about spring.

2. Have eight pigs not thriving well; their skins are dark and scurvy. They don't seem to be very itchy, but are not growing very well. Would sulphur and Epsom salts be good for them? They are about three months old. I intend to sell them in June. What would you advise feeding them? What proportions of turnips, wheat and oats? Should I boil the feed?

W. S.

Ans.—1. We would not advise the cooking or boiling of this ration. Boiling would decrease the feeding value of the grain very materially, and while it might increase the palatability of the turnips, it is doubtful whether it would increase their actual feeding value. It would likely prove more satisfactory to feed the grain in a finely-chopped mixture of one part of wheat to two parts of oats. This could be fed mixed with the finely-pulped turnips, or could be soaked and fed separate from the roots. A very good plan would be to feed the finely-pulped roots once a day say, at noon, and feed the grain ration night and morning. If the chopped grain is soaked, it is advisable to soak it twelve hours before feeding. This makes feeding night and morning very handy. The barrel in which the chop is soaked should be kept sweet and clean. If the pigs will not eat the turnips, a little dry chop could be fed on the turnip pulp. As time progresses, the amount of turnips could be reduced and a little higher percentage of wheat fed. In soaking feed, make it the consistency of thick porridge. If fed too sloppy there is a danger in winter of compelling the pig to take too large a quantity of water. If the meal is fed dry, it should be mixed with the pulped roots, and allowed to stand from one feeding to another.

2. If possible, keep the pigs dry and well bedded. A thorough washing, using warm water and castile soap, would doubtless help. A few drops of carbolic acid in the water, and the liberal use of a brush during the operation, would serve to clean their skins. Swine which are confined in pens seem to have a craving for some unnatural substance. A little sulphur and salts would likely prove beneficial. Prof. G. E. Day, of the Ontario Agricultural College, in his book, "Swine," recommends the use of such substances as charcoal, ashes, mortar, soft coal, or rotten wood, one part of sulphur to about ten parts of ashes. This material, as well as salts, should be kept in small troughs before the pigs at all times. Feed them roots as indicated in the answer to question 1. They might be given a little larger proportion than in that case, as they are not to be marketed so soon, and it is not a good thing to think of roots as a good ration for stock. They could be given a little larger proportion before in-  
troducing them to wheat.

## Trusses Like These Are a Crime

Get Rid of Elastic Bands, Springs and Leg-Straps. Such Harness Has Forced Thousands to Undergo Dangerous Operations.

Trusses like those shown above—the belt and leg-strap, elastic and spring contraptions—sold by drugstores and many self-styled "Hernia Specialists"—make life miserable for everybody who wears them.

Moreover, they often do immense harm—they squeeze the rupture, often causing strangulation—dig into the pelvic bone in front—press against the sensitive spinal column at the back.

### The Plain Truth Is This.

Rupture—as explained in our free book—can't be relieved or cured—can't even be kept from growing worse—unless constantly held in place.

Just as a bandage or splint is the only way a broken bone can be held—the right kind of truss is the only thing in the world that can keep a rupture from coming out.

What a difference it will make when you get that kind of a truss.

And you can get exactly that kind of truss—without risking a cent of your money.

It's the famous Cluthe Truss or Cluthe Automatic Massager.

Far more than a truss—far more than merely a device for holding the rupture in place.

Self-regulating, self-adjusting.

No belt, elastic band or springs around your waist, and no leg-straps—nothing to pinch, chafe, squeeze or bind.

### Try It Without Risking a Penny.

We have so much faith in the Cluthe Truss—we have seen it work wonders for so many others—that we want to make one especially for your case and let you wear it at our risk.

We'll give you plenty of time to test it—if it doesn't keep your rupture from coming out, when you are working and at all other times—if it doesn't put an end to the trouble you've heretofore had

with your rupture—if you don't get better right away—then the truss won't cost you a cent.

### How It Strengthens and Heals.

In addition to holding the rupture, the Cluthe Truss or Cluthe Automatic Massager is constantly giving a soothing, strengthening massage to the weak ruptured parts.

All automatically—the massage goes on day long, all without any attention whatever on your part.

### The World's Greatest on Rupture.

Don't go on letting your rupture get worse—don't spend a cent on account of your rupture until you get our free book of advice.

This remarkable book—cloth-bound, 82 pages, 21 separate articles, and 19 photographic pictures—took us over 40 years to write—took us that long to find out all the facts we've put in it.

It explains the dangers of operations and why they don't always cure to stay cured.

And tells—absolutely without misrepresentation—all about the Cluthe Truss—just how it holds—how it gives the curing massage—how it is waterproof—how it ends all expense—how you can get it on trial—and gives names and addresses of over 4,000 people who have tried it and want you to know about it.

Just use the coupon, or simply say in a letter or postal, "Send me your book." In writing us, please give our box number as below—

## LAKEVIEW HOLSTEINS

Young bull, calved Sept. 3rd, 1910, sired by Count Hengerveld Fayne De Kol, and out of an untested heifer, whose dam has a 21-lb. 7-day record and an 88-lb. 30-day record. This is a very smooth bull, mostly white, and is worth while seeing. Also several younger bulls, all of which are described in catalogue, which is sent on demand.

Telephone

E. F. OSLER, BRONTE, ONT.

## FAIRVIEW FARMS HERD STILL LEADS ALL OTHERS.

We own the world's champion cow, Pontiac Pet, 37.67 lbs. butter in 7 days. We have here her sire and over 50 of her sisters. We can offer you young bulls that are more closely related to her and to Pontiac Clothilde DeKol 2nd, 37.21 lbs., than you can get any place else in the world, and our prices are right. Nearly 200 head in herd. Come and look them over.

E. H. DOLLAR, (near Prescott) HEUVELTON, NEW YORK

### Holsteins and Yorkshires—Sir Admiral Ormsby 4171.

Our main stock bull, has only had 4 daughters tested so far, and they average 26 1/4 lbs. butter in 7 days as 4-year-olds, and one holds the world's record for yearly work as a 2-year-old. We offer for sale 20 heifers in calf to Sir Admiral Ormsby; also bull calves by him and from 27 1/4-lb., 26 1/4-lb. 4-year-old and 25 1/4-lb. 4-year-old cows. Come and see the herd. No trouble to show them. Our Yorkshire hogs will be at Toronto Exhibition, bigger and better than ever. It is our intention to double our breeding herd in order to supply the increasing demand for Summer Hill Yorkshires. See them at Toronto and London Exhibitions. D. C. FLATT & SON, Hamilton, Ont. R.F.D. No. 2. Phone 2471. Hamilton.

## RIVERSIDE HOLSTEINS

Herd headed by Prince De Kol Posch; dam was champion two years in succession at Guelph dairy test. King Johanna Pontiac Korndyke; the record of dam and two nearest dams on sire's side average 32.12. Young bulls and females for sale.

## J. W. Richardson, Caledonia, Ont.

### Evergreen Stock Farm Holsteins

Herd headed by Prince Abbecker Mercena, whose eight nearest dams average over 25 pounds butter in seven days, and whose dam produced \$150 worth of milk at Toronto—wholesale prices—in four months. We have taken a milk contract, and don't want to feed many calves, consequently we will sell young calves, heifers and bulls, at attractive prices. Our females, the dams of these calves, are equal to the best in the country. Bell phone in house. A. E. HULET, NORWICH, ONTARIO.

### Centre and Hillview Holsteins

We are offering young bulls from Sir Ladie Cornucopia Clothilde, the average of his dam sire dam and grand dams is 662.8 lbs. milk and 30.58 butter, 7 days, and 2,750.80 milk and 114.5 butter in 30 days; also Brookbank Butter Baron, who is a proven sire. He is sire of champion 3-year-old 30-day, 2-year-old 7-day and 2-year-old 30-day. Long-distance phone. P. D. EDE, Oxford Centre P.O. Woodstock Stn.

## MAPLE HILL HOLSTEIN-FRIESIANS

Bull calves, eight to eleven months, by great sires and from official record dams. A few first-class cows and heifers.

BELL TELEPHONE

G. W. CLEMONS, St. George, Ontario

### Woodbine Holsteins

Herd headed by King Segis Pontiac Lad, whose sire's dam is the champion cow of the world. Sire's sire is the only bull that has sired five four-year-olds that average 30 lbs. each. Dam's sire is the bull that has sired two 30-lb. three-year-olds. His two great grand-sires are the only bulls in the world that have sired two 37-lb. cows. Bulls and bull calves for sale.

A. KENNEDY, Ayr, Ontario.

## IMPERIAL HOLSTEINS

I can supply bulls ready for service and younger ones, also heifers out of R. O. M. cows, and sired by Tidy Abbecker Mercena, whose seven nearest female relatives have records averaging 27.19 pounds. W. H. Simmons, New Durham P.O., Oxford Co.
