**Seven Rules for Poultry Raisers.**

Here are seven safe rules for getting the most money from the summer flock:

1. Produce infertile eggs by removing the roosters from the flock in the summer time.
2. Provide clean nests and keep eggs clean.
3. Do not wash eggs.
4. Gather eggs twice daily during the summer to prevent them from being heated by the hen.
5. Keep them in a cool, dry place, away from the flies.
6. Market them at least twice each week.
7. Insist that they be bought on a quality graded basis.

**Breaking Up Broody Hens.**

Neglect in breaking up broody hens means a serious reduction in the number of eggs produced by Indiana farm flocks.

Confinement of broody hens in a slat bottom coop has proved satisfactory. This coop should be covered on top with slat or wire sides and may be placed outside, preferably under a tree to insure shade. A slat bottom coop prevents fowls from becoming comfortable and these soon lose their broody traits.

Common practice is to place hens in the coop for three days, releasing them in the evening. If they return to the nest they are returned to "jail" for three more days. This usually breaks up the most stubborn sitters.

Removing the broody hens from the nest the first evening she sits is a very important factor in breaking up broodiness. If hens are allowed to be undisturbed a few days it requires more time to break up broodiness and this results in a longer period of non-production.

Nasturtiums do not require rich soil, in fact, if put on rich soil they will produce more vine than flowers.

The reproduction of fruit and vegetables at home relieves transportation difficulties and solves the marketing problem.

Extra good growth of musk melons may be had by putting a bushel or so of well rotted manure in the bottom of each hill. Plenty of water during warm dry weather also helps.

Aunt Ada's Axioms: Someone has said that a farm is a business with a home attached; but the best farms are homes with a business attached.

Elm, maple, or even nut trees and fruit trees are good to plant along highways. The objection to fruit and nut trees is that they may be broken down by over-zealous collectors of fruit. This is not apt to happen if they are common on the highway.
