Culture of Currants And Gooseberries

Currants and gooseberries re-
quire large amounts of plantfood
and as the feeding roots are shal-
low and do not extend far, it must
be readily available and close at
hand. Thorough cultivation and
manuring are important. Stable
manure is the best fertilizer and
it is difficult to apply too much in
growing these fruits.

Young plantations need not be
fertilized heavily, but after the
plants begin to bear fruit heavy
annual dressings of well rooted
manure should be applied, pre-
ferably in the fall or winter, to
keep them in good productive
condition.

Commercial fertilizers may be
used to supplement stable ma-
nures. Muriate or sulphate of pot-
ash applied at the rate of 100 to
200 pounds per acre sometimes in-
creases the production and quality
of the fruit. If necessary to de-
pend upon commercial fertilizers
as a source of plantfood, one con-
taining 3 per cent. available nitro-
gen, 10 per cent available phos-
phoric acid and 4 per cent. avail-
able potash applied at the rate of
500 to 1,000 pounds per acre, is
recommended. However, in using
commercial fertilizers it should be
remembered that they add only
the mineral elements to the soil,
and it is therefore necessary to
employ the use of stable manure,
or cover crops, each year to main-
tain a good supply of humus which
is highly important in growing
these fruits.

Feeding The Crop

The increase in the yield of
wheat from the use of phosphorus
phosphoric acid alone ranges
from 4.85 bus. per acre to 8 bus.,
the largest increase being at Woos-
ter. The addition of potassium
(potash) to an equal amount of
phosphorus increases the yield of
wheat in every instance over that
secured by phosphorus alone, the
largest increase being found at Car-
penter. The addition of nitrogen
(ammonia) to phosphorus and po-
tassium (complete fertilizer), in-
creases the yield still further, the
largest increase being found at
Wooster.

Grocers And The Price Of Sugar

Toronto, Aug. 27.—With refer-
ence to an Ottawa despatch of
August 23, stating that the whole-
sale grocers, in their convention at
Ottawa, had predicted that sugar
would rise to twenty cents a pound
before the present shortage would
be relieved, Hugh Blain president
of the Wholesale Grocers Associa-
tion of Canada, said to-day.

"There must be some mistake
about this, as no discussion took
place at the convention as to what
the price of sugar was likely to be.
It was, however, stated to the con-
vention that speculators in the
United States had bought fil-
lers of granulated sugar held in
Halifax at the regular price, but
had been resold to other speculators
in the United States and was
now offered at \$13.90 at Halifax
to the Dominion Government, and
I believe a few cars were bought
at this price. The convention felt
that to buy sugar at such a price
might have the effect of creating
an advance on all sugars, which
would be most unfortunate.

It was also felt that selling this
sugar would have the appearance
of profiteering even if sold again
at cost, because sugar is sold to-
day in Montreal to the wholesale
trade at \$10.40 and \$10.50, with
the usual discount off, and is re-
sold to the retail trade at these
figures, with the freight added.
The shortage in sugar has been
caused entirely through the lack
of shipping facilities owing to the
marine strike, which prevented re-
finers from getting raws, and if
shipping facilities can be restored
to normal conditions without fur-
ther delay we should get supplies
of refined to meet our require-
ments within the next thirty or
sixty days.

"I would like to warn the pub-
lic against buying sugar beyond
their pressing requirements, be-
cause hoarding sugar is certainly
going to increase the price to
the consumers."

Should Have The Right To Propose

A Girl from the War" writes in the Con-
tinental Edition of the London Mail:

Among the last rights of women to be
fought is the right to propose.

It is the inevitable consequence of the
vote and of the war. The position of wom-
an with regard to marriage has entirely
changed, and the sooner it is recognized
the better. Up till now nice women have
properly not proposed, because it meant
virtually: "Will you keep me?"

Now that a woman can be as independ-
ent as a man she need have no scruples on
that score.

In every other direction the position of
men and women, with regard to marriage,
is equal. It is quite ridiculous that it
should be an honorable thing in a man to
love a woman who does not return his af-
fection, and yet be a disgrace to a woman
to love unasked. A proposal from the
man clears the air, and it would be the
same with one from the woman.

In the present condition of things a
woman often wastes the best years of her
life on a hope. It would be much better if
she could say in the beginning: "I like
you, and if you like me as much as I like
you, let us spend our lives together." It
would be quite simple for the man to reply,
if he were of a different mood: "I am sorry
of course I like you, but I do not feel like
going into partnership."

The woman would then put him out of
her mind and go about her business.
Broken hearts heal in time, and it is pos-
sible that hearts would never get beyond
the wounded stage if this plan were a
lopped.

There is a serious reason why it should
be adopted. Some badly wounded men
are feeling much as if they had changed
places with the women. They do not have
to say, "Will you keep me?" when they
propose, but what to them is almost as
bad, "Will you keep yourself?"

It would be a great relief to many a
crippled man in love if proposals were tak-
en out of men's hands.

In the present circumstances no nice
girl could bring herself to propose, how-
ever willing she is to keep herself, however
much she loves the man.

There is no need to fear that the new
right would give added license to the other
kind of girl. She proposes now, although
not in so many words.
