and to produce more cheaply. At present, the Irish farmer, like the English cotton spinner, is suffering bodily from the contraction of the world's markets, but, even apart from that, he has been suffering from inefficient methods of farming. The Government intends to encourage better farming by introducing better breeds of cattle and by grading bacon and eggs so that Irish agricultural exports shall go out to the world with a national guarantee of excellence, and that farmers will either have to achieve a high standard of excellence

or go out of farming. As regards cattle Ireland has to compete with Denmark, which depends on milk, and with Canada, which depends on beef, and the problem is how to breed cattle among which the cows will produce as much milk as the Danish cows, and the bullocks will produce as much beef as the Canadian bullocks.
