London, Aug. 22.-The past week has been the quietest of the year, politically, socially, and in every way. The main features of interest have been the silver question in the west, and the Cretan insurrection in the east. The weather in Europe generally has been cool, but in Southern Russia and the Crimea the heat has been abnormal for weeks past, and there have been many sunstrokes daily.

AN AUTOCRATIC PRESIDENT. The French newspapers are making things very unpleasant for President Faure, whom they accuse of Caesarsm. They say the people are seriously discussing a consulate or a direc-tory. During his recent tour of France he assumed the airs of a sovereign, insisting upon triumphal arches, salutes, and that the garrisons be turned out to receive him. Now, for the Czar's reception, the President has decided to adopt a Napoleonic costume of the portrait of Greuze—a black velvet coat, embroidered with gold thread, waistcoat with wide lapels, high boots, a belt carrying a gold-hilted sword, and a hat with large tri-color feather, in addition to the broad, red scarf of the Legion of

The most notable result of the excavation is that the history of the Babylonian people, as recorded in cuneiform writing on tablets, is carried back at least 2,250 further than yet known. There is now abundant written evidence that the Babylonian existed and were civilized enough to be able to write at least 7,000 B.C. The other important question there was the exclusion of Chinese. A duty of \$500 per head would satisfy the people at present, if total exclusion could not be arrived at. In business matters the chief interest is gold mining. Parts of the country where it was not thought gold would ever be found now swarm with prospectors, and the people in some quarters are growing quite excited over the chances of lighting on a fortune.

A NEW CRUISER. A new cruiser has been added to the Dominion fisheries protection fleet. It is called the Osprey, and makes the ninth of the fleet under the command of Commodore Spain. The craft is one of the very best in the fleet, and will go into commission at once

NOTES Mr. John Charlton is much improved in health. Though he still requires to use crutches, his friends are glad to note that he is a well man, and that the serious accident which he experienced early this year has not arected his vigorous constitution.

It is the Hon. C. A. Geoffrion now, the eminent Quebec counsel having been sworn in yesterday as a member of her Majesty's Privy Council for Canada, and a member of the Cabinet without portfolio.

Sir Charles and Sir Hibbert Tupper are canvassing members of the Senate for the purpose of organizing them in Opposition under Mr. Ferguson, the Senator from Prince Edward Island, although ostensibly Sir Charles is ask-ing Sir Mackenzie Bowell to lead. It will be a great mistake if Sir Charles Tupper organizes a factious Opposition in the Senate, and a game dangerous

for the Senate to play. The trade returns for July, the first month of the fiscal year, show the total exports to have been \$12,842,000, compared with \$12,427,000 in 1895. The imexports to have been \$12,842,000, compared with \$12,427,000 in 1895. The imports amounted to \$8,996,634, against \$8,319,205 in 1895, exclusive of coin and bullion. A Spokane Man's Opinion of British Columbia Mines.

Very Optimistic-Mr. O'Farrell a Min ing Authority Here.

Mr. R. A. O'Farrell, of Spokane, Wash., was in the city yesterday. Mr. O'Farrell is heavily interested in British Columbia gold mines, and is recognized as one of the best authorities on the mining industry of that country. To a reporter he said:

"You people of Ontario have no possible conception of the fabulous wealth of the mines of British Columbia. The mountains are honey-combed with the most valuable mineral ores found in any part of the globe. In East Kooteenay the veins of galena ore are richer in silver and lead than those of Mexico or Peru, and in West Koot-Rates \$2 and \$2 50 per day. C. W. Davis, enay the gold is sound. Iron and copper sulphide ore are found in greater profusion than ever yet discovered. Ten years ago South Africa produced less gold than Trail Creek produced in 1895; but in 1895 South Africa produced over \$40,000,000 in gold. And in ten years from now, British Columbia be producing over \$50,000,000 a year in gold alone. As a gold country it outrivals all previous discoveries. When I went to Trail, not two years ago, there were a couple of hundred prospectors, and a few log cabins in the whole district. Today, Rossland has a population of 5,000; Trail, a population of 2,000, and the whole district is growing with leaps and bounds. Railroads and smelters are not only being built, but in operation, and many of the mines have caused lots of the lucky miners to rise from poverty to wealth in a few

months' "Which are the best mines?" "That is rather a difficult question. So far, every genuine prospect worked in Trail Creek has increased in value with development. Properties that sold for a few thousands a few years ago are now worth millions. The same is true of those now in process of de-
