21,000 Acres of Oil Lands.

1,200 acres in Ohio, comprising 18 farms and containing 107 producing oil wells. Ten acres in the heart of the Kern River district, California, owned in fee simple, three wells now producing at the rate of 25,000 barrels a month, five more wells drilling. Every rod of this is proven oil land. This little plot of ten acres alone can produce over 100,000 barrels of oil monthly. Over 19,000 acres in Santa Barbara upon which development work is begun. Superintendent Howe wires that he is certain to strike oil there soon.

109 Producing Oil Wells.

One year ago the Eastern Consolidated Oil Co. had 18 producing oil wells. Today it has 110 wells and an enormous production of oil, which is sold regularly, with a monthly cash settlement. 107 wells are located on 18 farms in Ohio. Three big producers are on the Kern River tract in California. TWO MORE WELLS WILL "COME IN" ALMOST ANY DAY NOW IN KERN RIVER.

Enormous Oil Production.

The three new wells in Kern River are producing at the rate of over 25,000 barrels of oil a month. The promise of the management for an increase of 50,000 barrels of oil a month will be more than fulfilled.

Mr. George F. Wright of the Midland Pacific Railway Company says Kern River can produce more oil than any section in the United States.

Two pipe lines, one by the Standard Oil Company, and one by the Associated Oil Companies, are being constructed from Kern River to San Francisco, at a cost of \$6,000,000.

Those who invest this week will share in December dividends.
