THE COLLEGE LOVED HIM.

STATUE OF THE GREAT PROFESSOR PHELPS PROPOSED.

A Ready Response From Alumni And The Public.

Brief Sketch of His Career—His Services For Humanity.

[FROM BOSTON GLOBE.]

The proposition to erect a bronze statue of the late Prof. Phelps at Dartmouth College will meet with a ready response not only from the sons of Dartmouth and the members of the medical profession everywhere, but also from thousands of grateful people, who will be only too glad to contribute their mites in acknowledgment of his services to the public. Every Dartmouth alumnus of more than ten years' standing remembers the awe in which he held the keen observer whose name appeared in the college catalog next to that of the president, as Edward Elisha Phelps, M.D., LL.D., professor of materia medica; and every younger graduate has admired the complete museum of medical botany which Dr. Phelps gave to the college.

But it was the world-famed discovery of Prof. Phelps of an infallible cure for those fearful ills that result from an impaired nervous system and impure blood which has endeared the great doctor to the world and made his life an era in the practice of medicine.

Prof. Phelps was born in Connecticut in 1803. He graduated from the military school at Norwich, Vt., in 1820. He studied medicine with Prof. Nathan Smith of New Haven, Conn., and graduated in medicine at Yale in 1824. Impaired health led him to go South for a time, during which he assisted in the survey of the Dismal Swamp Canals, also following his studies in natural sciences, particularly in botany.

In 1828 he began to practice medicine in Windsor, Vt., a town famous for years as the summer residence of many eminent men.

His unusual talent soon brought him reputation and prominence among his professional brethren. In 1835 he was elected to the professorship of anatomy and surgery in the Vermont University. In 1841 he was appointed lecturer on materia medica and medical botany in Dartmouth College. The next year he was chosen professor to the chair then vacated by Prof. Robby, and occupied the chair, the most important one in the country, until a few years before his death, in 1880.

In the fall of 1861 the promptings of his patriotism and his love for military life would not let him be content with the services he could render his own state as a member of the Board of Examiners of Surgeons. He went to the front as surgeon of the United States army, and after the Peninsular campaign was assigned to the charge of the military hospital in Kentucky, which was soon known as one of the most perfectly conducted hospitals in the country. The large per cent. of recoveries in it gave him well-deserved credit.

After the war, when the country no longer needed his services, he returned to his scientific studies with the ardor of a boy. His work was most untiring. His lamp was the last one in the village to be extinguished at night and the first to be lighted in the morning.

He had mastered the teachings of the latest German science. He had made an exhaustive study of the German hospitals. He had for years foreseen the dangers of the American way of living. He went about to find a scientific, common-sense remedy to cure the common evils that, under one name and another, result from an unhealthful state of the nervous system and which, within a score of years, have seemed to be sweeping over the country like an epidemic.

He succeeded.

He gave to the medical profession a celebrated remedy, which has since come to be known the world over as Paine's Celery Compound.

It was Dr. Phelps' prescription, which ever since has been freely used and prescribed by the most eminent of the profession. The formula was furnished to all reputable physicians. They found the wonderful remedy to be exactly what was claimed for it, a great nerve and brain strengthener and restorer. It was demonstrated beyond doubt that Paine's Celery Compound would cure nervous debility and exhaustion, neuralgia, sleeplessness, dyspepsia and all blood diseases.

It was as harmless as it was good, and it was the universal advice of the medical profession that the compound be placed where the general public could secure it, and thousands of people have every year proven the wisdom of this good advice.

The recent advice of Com. Howell to Secretary Blaine to use this compound, which the Commodore publicly said had saved his own life, and the published testimonials of the poet-author Hardy, George Wright and other men of national reputation, has brought the compound into special notice.

As a well-known physician in this city says: "Paine's Celery Compound is not a patent medicine; it is not a sarsaparilla; it is not a mere tonic; it is not an ordinary nerviine—it is as far beyond them all as the diamond is superior to cheap gas."

Her Ladyship.

Personages of high rank in England are patrons of a great remedy. Bridgefoot House, Iver, Bucks, England. "Lady Edwards has suffered from rheumatism for several years, especially in the knees. She was persuaded to buy St. Jacobs Oil, and after a fortnight's use of it all the rheumatic pains have left her. The relief is such that Lady Edwards will never be without a bottle."

Of Interest to Householders.

The old-established well-known auctioneering firm of C. M. Henderson & Co. will open a sale upon the 15th of the property of Mr. Thomas A. Gregg. This news will be of special interest to householders and all who seek bargains in the house-furnishing line, as the opportunity for obtaining such complete domestic outfits is one which does not occur every day. In looking over the catalogue of this sale one is struck by the variety of the household property to be disposed of, ranging from elegant bedroom suites to manufacturers and vases. To attend this sale would be in the interest of everyone who desires to obtain a well-fitted house at really low rates. Occupying the position before the Toronto public, C. M. Henderson & Co. are content to rest upon the reputation elicited by former sales for so many years, knowing that the general verdict will be in their favor. And it is for this reason they expect a large attendance when the sale of the 15th inst. comes off at 267 Yonge-road, near Bloor-street.

Messrs Cullen, Pool's Island, N.F., writes: "I have been watching the progress of Dr. Thomas' Electric Oil since its introduction to this place, and with much pleasure state that my anticipations of its success have been fully realized, it having cured me of bronchitis and soreness of throat, while not a few of my rheumatic neighbors (one old lady in particular) pronounce it to be a most article of its kind that has ever been brought before the public. Your medicine does not require any longer a sponsor, but if you wish to use it as such, I shall be only too happy to have my name connected with your prosperous undertaking."

Dr. T. A. Slocum's Cod Liver Oil Emulsion of Pure Cod Liver Oil. I guarantee it. For sale by all druggists. 50 cents per bottle.

THE FARMERS' CHIEF COUNCIL.

Election of Officers—Record of the Year's Proceedings.

At the annual meeting of the council of the Agricultural and Arts Association of Ontario, there were present: Messrs. D. McPherson, Lancaster; W. C. Edwards, M.P., Rockland; Joshua Legge, Gananoque; James Haggart, West Huntingdon; W. J. Westington, Plainville; J. C. Snell, Edmonton; N. Awrey, M.L.A., Binbrook; J. C. Rykert, St. Catharines; William Dawson, Victoria; James Rowand, M.P., Dunblane; C. M. Simmons, Ivan; Alvin Rawlings, Forest; Jonathan Sisson, Crown Hill, and H. Wade, Toronto.

The election of officers resulted as follows: President, N. Awrey, M.L.A.; vice-president, James Rowand, M.P., and secretary, H. Wade.

The secretary submitted a report covering the work done in the office during the year 1891. The principal work was the recording of different breeds of animals, the number registered being as follows: Horses—Clydesdale 550, shires 33, draught horses 96; total 679. Cattle—Ayrshire 264, Herefords 56, Devon 41; total 361. Swine—Berkshire 577, Yorkshire 459, Suffolk 15, Poland Chinas 719, Chester Whites 320; total 1990. Sheep—Dorset Horned 181, Suffolk 6; total 187.

The association granted diplomas to 158 graduates from the Ontario Veterinary College.

The treasurer's report showed the receipts during the year to have been from all sources $13,319 and the expenditures $10,815, which left a balance on hand of $2496.

THE ART OF DENTISTRY.

It Has Made Very Remarkable Progress in Recent Years.

"The progress in the art of dentistry has been greater than is generally known," said J. E. Lamb of Boston at the Lindell. "You can see from the swollen condition of my right jaw that I am suffering the torments of a throbbing, thumping toothache, and, though I was advised by my dentist at Boston not to have my tooth pulled, I got up this morning from a sleepless night, thoroughly desperate and determined to have the unruly member plucked out. But when I applied to one of the most eminent students of St. Louis to perform the operation, he, too, after examination, advised me not to have it taken out. When he learned that I was nearly 50 years old he told me that I would have to suffer only two or three days more and the nerve would die of its suffering, my pain would entirely cease and I would have my tooth preserved intact.

The discovery of the death of tooth-nerves with advancing age is only two or three years old, but in that time millions of teeth have been saved. Formerly, when a man with the toothache went to the dentist's office, it meant either that the tooth was unceremoniously jerked out, root and branch, or the sufferer was subjected to a long and painful operation of plugging. The better class of dentists have ceased nearly entirely to pull the teeth of men and women nearing their climacteric, as they know that the aches are but the last expiring efforts of the nerves to perform their functions. A curious fact in connection with this kind of toothache is that cold water, instead of intensifying the pain, as it usually does, actually soothes it. Another important advance in dentistry is the method of completely sawing a tooth in two and joining the pieces together with a small gold screw. When a decayed speck or streak makes its appearance in a molar now the dentist who knows his business will neither pull the tooth out and substitute for it one of his own make nor fill the hollow with gold to preserve it, but he artfully saws the top of the tooth off close to the gums and, after thoroughly scraping and cleansing the decaying part, welds the two pieces together as firm as before the operation was done."

LIFE INSURANCE.

To License Insurance Agents and Prevent the Evils of Rebate.

The Ontario Life Underwriters' Association met yesterday at the Board of Trade building. They passed a resolution favoring the bill at present before the Legislature concerning the licensing of insurance agents and asked that a clause to prevent the rebate evil be also inserted.

The Rosedale-drive.

The sub-committee of the Board of Works to deal with the matter of the Rosedale-drive met yesterday afternoon.

In 1887 an allowance of 66 feet of nearly two miles for the purpose of constructing a drive through the ravine was made, charging the cost of the expropriation and grading of the road back to the property owners who would secure a new frontage.

The property-owners west of Park-road have been settled with.

The sub-committee met yesterday to confer with representatives of the remaining property-owners to see whether prices could be arrived at satisfactory to the land-owners and the city, without the matter going to arbitration.

Ald. Lamb and Shaw composed the committee; the property-owners were represented by ex-Ald. Boustead and Hastings, Isaac Moody, B. Hughes and J. G. Gibbs.

Mr. Boustead asked if the city proposed to grade the street without giving the owners notice.

Ald. Shaw read a letter from the City Solicitor to the effect that the City Engineer was not required to grade or fence except on his own recommendation, which would be subject to petition against the work.

Mr. Hastings said he had a fully signed petition for the grading up to the level of Park-road from Yonge-street.

Ald. Shaw said the work of grading would not be gone on with before the whole matter was adjusted by the Court of Revision.

The committee saw no good reason for increasing the city's offer and the matter will probably go to arbitration.

The city estimates the value of the land at $30,000, of which about $9000 has been paid already.

New Books at the Military Institute.

The following military publications have been received through His Excellency the Governor-General as a further gift from Her Majesty's War Office to the Canadian Military Institute: Rangefinders, Militia Regulations, 1891; Staff Duties in the Field, Manual for Army Telegraphy, Manual of Saddles and Sore Backs, Establishments for Field Army, Service Abroad, Army Allowances, Pay and Non-Effective Pay, Equipment Regulations, Peace; Regulations for the Volunteer Force, Army and Militia Dress Regulations, Drill for the Army Service Corps, Manual of Signalling, Firing Exercises for Martini-Henry Rifle and for Magazine Rifle; Infantry Sword and Bayonet Exercises; Cavalry Drill (provisional), 1891; Garrison Artillery Drill, Vol. II.; Mountain Artillery Drill, 1891; Siege Artillery Drill; Notes on Electricity; Handbook for Gardner and Nordenfelt Machine Guns; Notes on Explosives; Cavalry Manœuvres in France and Italy During 1890; Administration and Staff Duties; Report of Army Veterinary Department, 1891; List of Service Ordnance; Handbooks of the Russian Army, Russian Troops in Asia, Armies of the Balkan States, Army of Austria-Hungary, French Army and Italian Army; General Wray's Book on "Construction."

The Widow's Mite Burned.

TRENTON, Ont., March 11.—A large brick dwelling belonging to Mrs. McColl, a widow, was totally destroyed by fire this morning. Most of the contents were saved. House insured in the Agricultural for $1600.

All Men.

Men, young, old or middle-aged, who are weak, nervous and exhausted, broken down from over work or from any cause not mentioned, should send for and read the book of Lubon, a treatise on diseases peculiar to man. Sent sealed, secure from observation, on receipt of 10c. in stamps. Address M. V. Lubon, 24 Macdonell-ave., Toronto

The Festival of Purim.

This is a great day with the Hebrews. It celebrates the deliverance of the Jews of Persia in the days of King Ahasuerus, through the agency of Queen Esther. Service will be held to-morrow evening at the Synagogue, Richmond-street east, as also early on Sunday morning, when the Book of Esther will be recited by Rabbi Elzas from the sacred scroll.

RADAM'S MICROBE KILLER

ITS SUCCESS STANDS UNPARALLELED.

For General Information.

The following information is offered in general reply to questions arising in the minds of those entering upon a course of treatment by the great Radam remedy.

FIRST—Microbe Killer is not a drug. It does not cure the poisons of disease by counter-poisons of mineral or plant. It is an element and an energy of purification. It cures disease by direct physical disinfection from the living seed principle and germ of disease. It allays the microbic ferment and heals microbic inflammation, sickness and distress, by killing the microbe.

SECOND—Microbe Killer does not cure chronic illness by sudden and violent change, by any instantaneous process. Its first work is that of radical and absolute blood-cleansing, the clearing away of the cause of the illness. But to put out a fire does not restore the fallen walls or the burnt scaffolding and timber. To stop the losses of vitality and the decay of fibre and tissue that goes on under disease is one thing. That is the preliminary and preparatory work of the healing water. But to repair all those losses, to replace the diseased tissue with healthy and undiseased tissue, to give back to the lungs, the liver, the brain, the kidneys, the life principle and life particles they have been deprived of, and to reclothe the limbs with the flesh that has fallen from them under the ravages of the microbes, is another thing. That is the second function, the closing work of the remedy. And that is a process that requires time, because it is a process of growth. It is growth substituted for putrefaction and decay. And as the sun requires time to repair the injuries and the losses that the lightning or the parasite may have inflicted upon the beautiful tree, so Microbe Killer must continue to keep the body and the organs and the blood of man in a disinfected condition till nature has time to repair all the injuries and restore all the physical and vital losses undergone when the system or the organ was alive with Microbes. Therefore, do not begin Microbe Killer for any deep-seated, chronic ailment unless you have an intelligent appreciation of the priceless value of a final cure and the patience to abide the time and course it requires.

Offer for sale all grades of Refined Sugars and Syrups of the Well-known Brand of

Redpath

CERTIFICATES OF STRENGTH AND PURITY.

OFFICE OF THE PUBLIC ANALYST, MONTREAL, Sept. 9th, 1887.

To the Canada Sugar Refining Co., Montreal:

GENTLEMEN,—I have personally taken samples from a large stock of your Granulated Sugar, "REDPATH" brand, and carefully tested them by the Polariscope, and I find these samples to be as near to absolute purity as can be obtained by any process of Sugar Refining.

The test by the Polariscope showed in yesterday's yield 99.90 per cent. of Pure Cane Sugar, which may be considered commercially as absolutely PURE SUGAR.

JOHN BAKER EDWARDS, Ph. D., D.C.L., F.C.S. Public Analyst for the District of Montreal and Professor of Chemistry.

CHEMICAL LABORATORY, MEDICAL FACULTY, MCGILL UNIVERSITY, MONTREAL, Sept. 9th, 1887.

To the Canada Sugar Refining Co.:

GENTLEMEN,—I have taken and tested a sample of your "EXTRA GRANULATED" Sugar and find that it yielded 99.93 per cent. of Pure Sugar. It is practically as pure and good a Sugar as can be manufactured.

Yours truly, G. P. GIRDWOOD.
