The Dakota words that most resemble I E forms are those
 in daily use, those roots entering into the largest number of
 compounds, those most widely distributed in languages more
 nearly related.

Excluding words repeated in compounds and those contained
 in phrases I have not satisfactorily analyzed, and including
 words derivative rather than compound, I find in Hayden,
 Morgan and Schoolcraft 262 different Iowa words. Of these
 thirty-five as words represent words discussed in this paper;
 thirty-nine others appear to be derived from roots herein dis-
 cussed, a number of them varying from the Dak word only by
 using a different suffix also herein compared. Out of 159 that
 I have been able plainly to trace to Dakota words and roots 121
 are to Dakotan roots and words which seem to be related to I
 E forms. If I had sufficient Iowa material to enable me to find
 Iowa roots independently, I doubt not the resemblance to the
 Dakota would be much increased, and the resemblance to the
 I E in a still greater degree.
