

THE

“Molimen Menstruale”

which marks the period of
transition from girlhood to womanhood,

depends for its success upon the vital integrity of the blood stream, especially its hæmoglobin content. A chlor-anæmic circulating fluid, with its woeful lack of corpuscular bodies, renders menstrual initiation difficult and almost impossible.

Pepto-Mangan (“Gude”)

because of the rapidity and certainty of its vitalizing effect, comes promptly to nature’s aid in the establishment of **normal functioning** and at the same time markedly improves the general health and condition of the patient. PEPTO MANGAN (“GUDE”) is the one palatable, neutral, organic hæmoglobinogenic.

in bottles of Ξ xi.

Never sold in bulk, that the physician and patient may not be defrauded by substitutes.
