

achieved by workers in chemical pathology. A. Logan Turner, in the section on laryngology and rhinology, presents a summary of recent achievements in the correction of nasal deformities by means of paraffin injections. Randolph's article on Otology is devoted largely to a discussion of the methods employed in the treatment of various chronic aural conditions, heretofore considered as almost hopeless from a therapeutic standpoint. The volume is profusely illustrated and completed with an index, which is so arranged as very greatly to enhance its value to the busy practitioner as a work of reference.

An Epitome of Physiology—For Students and Practitioners of Medicine. By THEODORE C. GUENTHER, M.D., of the Norwegian Hospital, Brooklyn, and AUGUSTUS E. GUENTHER, B.S., formerly Assistant in Physiology in the University of Michigan, Ann Arbor. In one 12mo volume of 250 pages, with 57 engravings. Cloth, \$1.00, net. Lea Brothers & Co., Publishers, Philadelphia and New York, 1903.

This is a compact little treatise, free from discursive matter, but giving the established facts of physiology as developed at the present day. It is intended for and especially adapted to the needs of medical and dental students, but it will also prove of value to the practitioner who may wish to post himself on the most recent findings on the subject. No one will deny the value of epitomization, if well done, and while this compendious little work is by no means intended to take the place of the large volumes on Physiology, it certainly provides a handy and legitimate help to a knowledge of essentials to which a thorough understanding of details may be easily added. This Series of Medical Epitomes should not be confounded with the ordinary question compend, made up in question and answer form, for in the epitomes the matter is given connectedly, thus facilitating reading and study, and the questions for convenience in quizzing are appended to each chapter. Helpful illustrations are used where necessary throughout the book.

The American Year-Book of Medicine and Surgery for 1903. A yearly digest of scientific progress and authoritative opinions in all branches of medicine and surgery, drawn from journals, monographs and text-books of the leading American and foreign authors and investigators. Arranged, with critical editorial comments, by eminent American specialists, under the editorial charge of GEORGE M. GOULD, A.M., M.D. In two volumes—Volume I, including General Medicine, octavo, 700 pages, fully illustrated; Volume II, General Surgery, octavo, 670 pages, fully illustrated. Philadelphia, New York, London: W. B. Saunders & Co., 1903. Per volume, cloth, \$3.00 net; half morocco, \$3.75 net. Canadian agents: J. A. Carveth & Co., Parliament Street, Toronto, Ont.

We do not know of any similar publication, either American or foreign, that can compete in any way with this excellent Year-Book, published by W. B. Saunders & Company. It is not an indiscriminate collection of extracts clipped from any
