

been most successful in Toronto, was as follows. Tonics (especially quinine and acid), stimulants, plenty of nourishment, opiates, and, where flatulence and typhoid exist, small doses of turpentine. In some cases reported, as much as six ounces, or more, of brandy per diem had been given with the result of lowering the frequency of the pulse, and increasing its volume. Externally applications of bags of bran steamed were constantly applied hot to the lower part of the abdomen. Warm vaginal injections and frequent sponging of the parts.—*Cont.*

OBITUARY.

We regret to announce the death of Dr. William Hillier, of Enniskillen, in the month of August, 1871. He was a graduate of Queen's College, Kingston, and a student of Trinity College, Toronto. He practised very successfully in the above locality, and enjoyed a wide spread reputation. By his kindness, skill, and attention, he had won for himself many warm friends among his patients, and was highly respected by his fellow practitioners.

Law Respecting Periodicals, Newspapers, &c

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscriptions.

2. If subscribers order the discontinuance of their periodicals or newspapers, the publisher or publishers may continue to send them until all arrears are paid up, and subscribers are held responsible for all numbers sent.

3. If subscribers neglect or refuse to take the periodicals or newspapers from the office to which they are directed, they are held responsible till they have settled their bills. Sending numbers back, or leaving them in the office, is not such notice of discontinuance as the law requires.

4. If subscribers remove to other places without informing the publisher, and their periodicals or newspapers are sent to the former directions, they are held responsible.
