

PEDLAR'S "PERFECT" TONCAN METAL CULVERTS

Made exclusively from the heaviest gauges of the well-known anti-corrosive **TONCAN METAL** deeply corrugated.

Cannot Rot or Rust.

Impervious to Frost.

Need only ordinary unskilled labor—and little of even that, for quick, permanent installation, without possibility of damage to the Culvert.

OFFICE SPECIALTY FILING SYSTEMS

The illustration below shows the Filing Department and Stationery Stock Room of the new Trust and Guarantee Company, Toronto, equipped with "Office Specialty" Steel Files and "Office Specialty" Steel Shelving.

Your requirements may not be as great as those of this institution. Yet you want the same protection to your vital documents—you want the same quick accessibility to your records and papers,

"Office Specialty" Steel Equipment is *standardized* and *interchangeable*. You buy just enough equipment to take care of your initial needs. After that it's simply a matter of adding to it as your records increase.

So besides getting maximum fire-protection—besides

getting the other utility advantages of "Office Specialty" equipment you are able to keep your fixed investment in equipment at the minimum always, avoiding thereby high interest charges.

We've got two catalogs for business executives—one on Wood and Steel Filing Equipment—the other, just published, on Filing System Supplies. The latter is a genuine text book. Either one, or both, will be sent when requested on business letterhead.
