

LET EXPERIENCE SPEAK.

The Opinions of Settlers in the Regina District of Its Capabilities.

What Intelligence, Industry and Small Capital Are Doing.

MR. ROBERT GREEN'S EXPERIENCE.

REGINA, Sept. 19th, '88.

D. W. BOLE, Esq.,

President Regina Board of Trade.

DEAR SIR,—The following statement will show what my farm has produced this year and will give intending settlers an idea of the agricultural products of this district. First I will say, that in 1872 I came from Suffolk, England, to Manitoba, where I resided until 1882. I then came west and located on the N $\frac{1}{2}$ of Section 20, Township 17, Range 19, west of the second principal Meridian, and adjoining the city of Regina. This year (1888) I had eighty acres cropped as follows:

WHEAT.—29 acres, yielding 30 bushels per acre, which will grade No. 1.

OATS.—48 acres, yielding 60 bushels per acre, first-class quality and weighing 42 lbs. per bushel.

POTATOES.—(Early Rose) 3 acres yielding 350 bushels per acre.

The binding of the grain averaged 3 lbs. of binding twine per acre.

I have also a garden consisting of one acre of land on which I raised cabbage, cauliflower, turnips, beets, mangolds, etc., which for size and quality may be equalled but not excelled in any agricultural district in the world.
