

NOTICE BY THE EDITORS.

THE information contained in this Pamphlet relating only to concessions *en Fief et Seigneurie*, made by the English and French Governors in Canada, is to be considered simply as a series of references making part of the Topographical Map of this Province, whereon those references would have been noted had their number and extent permitted it.

Some persons having expressed their surprise at not seeing upon the said Map the distances and true situation of the places determined by a latitudinal and longitudinal projection, the compilers take the liberty to observe that it is not through inattention or inadvertency but upon mature consideration that those lines have been omitted. An explanation of the principles which have guided them in this respect would be tedious and therefore misplaced here: they confine themselves to observe that on Topographical Maps, laid down by large scales such lines are not requisite and that for several reasons they are utterly inapplicable to the Map in question.
