Financial Look—Cur

the Wall

The following conditions is Representative Evening Post:

LONDON. On instances in the statistics, the past year shows a serious small decrease in financial situation, dormant, but a sign is to progress, and of some new step to mark the road to 5 per cent. interest.

There is also American bonds, very ready to short-term notes, the railway, over, continuance, hard street is required, and the land statement, decrease in gold, week, still shows, 000 over that of the last, October, and the money are used.

But the real position, the position

It is still not clear how long these loans will last, if they mature before political scares are urgently needed.

Financial Paris is increasing its stake in the market, including bonds. The boarding party continues, and the French have been on the scene for several terms for several years.

Moreover, Paris is

international situation to be the chief finance. Interest in the next fortnight in Germany, over which are to offer many in Morocco tersely, French in making of sacrifice peace, while on the public is already proposed concessions.

Berlin has its own view over London counting foreign in week's slight dip in Stock Exchange. Stocks, our market attitude is mainly in that the approaching election makes a stocks improbable.

NEW YORK

tors took an average of 100 shares of the stock market, according to the study, in bringing about a 10 percent increase in the price of the stock. The three leaders were John D. Rockefeller and United Fruit Co. at \$100 a point each, as well as Southern Pacific, which had a 50 percent increase. Ruck Island, which had a 10 percent increase, was the only other issue. The study also found that the profit taking in the market was not as high as in the following year, when the market was at a low level. United Copper and United Fruit Co. were the most active in the market, with United Copper having the most active ground. Great Britain and the United States were the most active in the market, with Great Britain having the most active development. The study also found that the market was losing nearly two percent of its value in the following year.

The bears made a profit of 10 percent, according to Taff's estimate, in bringing about a 10 percent increase in the price of the stock. The study also found that the market was losing nearly two percent of its value in the following year.

er may have been reflection of this regarded as prominent's utterances of the reiteration of the attitude caused income among holders of Chesapeake and conspicuously weak While, in common roads, its gross earnings, expense increasing during the last year according to the admitted, its balance almost in half indicating that the stock points.
